Rybern Steen Gillaspie, regional chemist, Stewart's Inc., Memphis, Tenn.  
Robert M. Gilpin, vice president, George W. Gooch Laboratories Ltd., Los Angeles, Calif.  
Peter David Henise, research chemical engineer, Lever Brothers Company, Edgewater, N. J.  
Teddy Lee Lynch, plant chemist, Wishbone Plant, Thomas J. Lipton Inc., Kansas City, Mo.  
Charles R. McKibben Jr., analytical laboratory supervisor, Procter and Gamble Company, Cincinnati, O.  
Roger C. Miller, vice president, George W. Gooch Laboratories, Los Angeles, Calif.  
Stanley Phillip Rock, research chemist, DCA Food Industries Inc., New York, N. Y.  
Sydney Harold Shapiro, assistant research director, Armour Industrial Chemical Company, Chicago, Ill.  
Arthur L. Smith, laboratory manager, The Procter and Gamble Manufacturing Company, Sacramento, Calif.  
Joseph Ray Southwell, owner, Southwell Laboratory, Oklahoma City, Okla.  
James Edward Winstanley, chemist, Trans World Refining Corporation, Jersey City, N. J.

#### Active Junior

Frederick Whiton Knapp, student, Department of Food Science and Technology, University of California, Davis, Calif.  
Richard Metcalf Prouty, research assistant, Department of Animal Husbandry, University of Minnesota, St. Paul, Minn.

#### Individual Associate

Robert L. Klein, vice president, Capital City Products Company, Columbus, O.  
Timothy L. Mounts, chemist, U.S.D.A., Northern Regional Laboratory, Peoria, Ill.  
Carlos Rollan, laboratory chief, Jabon Federal, Buenos Aires, Argentina  
Peter (Shew Kong) Young, organic chemist, E. F. Drew and Company Ltd., Ajax, Ontario, Canada

## New York Program Building Up

**A**LREADY one abstract has been received (as of early May) and what look like 10 promises have been received by the chairman of the technical program committee, W. C. Ault of the Eastern Regional Research Laboratory, Philadelphia, for the 34th fall meeting, which is to be held in New York, October 17-19, 1960, at The New Yorker.

Because of his desire to arrange the program in as effective a manner as possible, Dr. Ault is asking for more promises and more information about plans on an urgent basis. Deadline for the receipt of definitive abstracts by him has been set for July 25. Abstracts should be truly descriptive of the work to be reported and about 100-300 words long. Complete information about abstracts and papers is being mailed to the membership, as advance publicity for the meeting.

Other planners are at work too, the respective chairmen of exhibits, entertainment, ladies' events, and so on. Henry G. Salomon of L. A. Salomon and Bro. expects to sell more than 60 exhibit spaces and has already sent out his first mailing to prospective exhibitors. Eugene I. Marshaek of the Bunge Corporation has been screening entertainment ideas for some time, and the ladies' chairman, Mrs. E. A. Lawrence of Port Washington, N. Y., has also had on her thinking cap.

A cocktail party is planned for Sunday from 6 to 9 p.m., also for Monday from 6 to 8, after which the evening will be free for theater, etc. The banquet or dinner dance is scheduled for Tuesday.

Various committees will meet during the convention, and the Governing Board will convene on Sunday, October 16, at 2 p.m., with R. W. Bates in the chair.

## Back Issues Needed

The Society office would like to acquire by gift or purchase the following back issues:

1924—January, April, July, October  
1926—January, February, March, April, June, July, August, October  
1927—January, March  
1931—December  
1932—February, March, April, June, July, October, November  
1933—January, April, June, July, September  
1934—June, July, September, November  
1935—January, February  
1936—April, December  
1940—April, May  
1942—January, February  
1950—November  
1952—November  
1954—February, March  
1959—January, September

so that orders from various institutions to complete volumes may be filled. The issues, if donated, may be sent express collect to the American Oil Chemists' Society at 35 E. Wacker Drive, Chicago 1, Illinois. Correspondence is invited from those who have issues to sell.

## Gives Fatty Acid Talk

John Hardiman of the Kessler Chemical Corporation, Philadelphia, spoke on "New Developments in Fatty Acids and Esters" before the Northeast Section of the American Oil Chemists' Society June 7 at Whyte's restaurant, New York, on the annual ladies' night. This was the last program of the season.
