

Meeting Sparks Interest

(Continued from page 14)

the Canadian Government, and one the United States. They will discuss the international aspects of the fats and oils field.

At 7:30 pm Tuesday, the crowning social affair will begin. The Fall Meeting Dinner Dance will feature music throughout dinner, as well as later in the evening. A "show-stopping" variety of entertainment, including an all-Canadian cast of singers, comedians, etc, has been scheduled. Of course, there will be dancing for all.

Another "first" is to be noted in the form of a special Hospitality Room on the Convention floor. It will be open each day during the Meeting, from 10:00 am to 4:00 pm. This innovation will doubtless appeal to the vast majority as a place to stop, relax, and discuss the current happenings. Coffee will be available throughout the day.

Add to the foregoing the culture and excitement of Toronto, the gay spots, scenic tours, natural parks, excellent golf, and Festivals of Fall Splendor. Little more could be asked.

★ Outstanding Ladies Program Should Draw Record Response

The ladies will open their program with breakfast at O'Keefe Center, the new multi-purpose "cultural heart" of Toronto, where the memorable "Camelot" made its world premiere. Housed here are a continuous variety of attractions, including musical comedy, ballet, drama, review, opera, and symphonic orchestral concerts. O'Keefe Center will be featuring the world premiere of British play "Beyond the Fringe."

There will be a luncheon at the Royal York for all. The four-day convention will be filled with tours, luncheons, music, and fashions. Gifts will be sprinkled throughout these events. Sufficient free time is being left to enable all to visit shops, theaters, and to just plain relax.

The ladies will be interested to note that the spectacular comedy play "Step on a Crack," starring Gary Merrill and Rita Hayworth, will premiere during the Fall Meeting at the Royal Alexandra Theatre. This production will not arrive in the United States for some time.

Information regarding these Theaters will be available at the registration desk.

★ Adventure Into Science and Travel

Anticipating that an unequaled number of AOCS members will attend the Fall Convention in Toronto this October, the following paragraphs are presented for general interest. If a Canada trip is not yet a part of your plans, it is hoped the matter will be given immediate consideration. Rarely can we all combine an outstanding adventure into science with the excitement of travel beyond the borders of our home lands.

Canada can be entered with a minimum of delay and formality. Complete information on border crossing is included in this issue. At key entry points, in the Ontario Government Reception Centers, efficient receptionists will answer questions and supply free maps and information. As you travel over Ontario's highways you'll enjoy visiting scenic government parks and lunching at roadside tables along the way.

Just a short drive from the big cities lie the incomparable central lakeland resort areas. In a setting of sparkling waters, cool forests, clean sand and sun-drenched rock, you will enjoy resort life at its best.

In Canada's south-central area you'll find exciting evidence of rapid expansion and increasing development. You'll see the growth of industry and enjoy the increasing variety of entertainment and cultural activities. Ontario is the industrial, financial, and cultural hub of the nation—the country's "Golden Horseshoe"—stretching from the historic Niagara peninsula around Lake Ontario's western

and northern shores, eastward past the big cities to the picturesque Quinte peninsula. Here too are many fine resorts, lovely beaches and other vacation attractions. Historic forts and monuments recall border wars of centuries past. The daytime bustle and night-life activity of the cities contrast with the quiet charm of the true "north woods."

Ontario has a thriving entertainment industry. Theatre is increasingly active with drama festivals, repertory theatre, intimate revues, and international road companies in the big cities; summer stock in the resort areas; and celebrated Shakespearean festivals. The Canadian National Exhibition and the Royal Agricultural Winter Fair, both held in Toronto, are the world's largest annual shows of their kind.

The land lying between the Humber and Don rivers—which empty into Lake Ontario—is called "Toronto." "Toronto" is of Huron Indian origin signifying a "place of meeting." It has something to delight and entertain every visitor.

Casa Loma, "The Castle on the Hill," was erected by the late Sir Henry Pellatt. It is complete with tower, battlements, secret staircase, underground tunnels, etc. Entering Casa Loma is like stepping back into medieval times. This magnificent edifice was built to entertain a royalty that never came, and is now operated by the Kiwanis Club of West Toronto who donate all proceeds toward the educational, physical, and spiritual betterment of boys and girls.

A unique feature of the Black Creek Conservation Area is the Pioneer Village, depicting houses and other buildings of 1867, the year of Confederation.

Toronto is a city of churches. Many fine examples of modern church architecture can be seen by the visitor in Metropolitan Toronto.

Toronto has many parks and gardens well worth seeing. James Gardens, containing one of the most beautiful rock gardens to be found anywhere, Riverdale Park and Zoo, and the gardens and new floral display at Exhibition Park, to name a few.

The new O'Keefe Center is a multi-purpose theatre center designed to house the best in show business—musical comedy, revue, opera, jazz, symphony, ballet, and drama. Toronto has become a city with varied tastes in entertainment.

A warm welcome and excellent accommodation await; you will enjoy an outstanding scientific program, and all that Canada offers as well.

A popular attraction among visitors to Toronto is "Casa Loma" the only truly old-world French Castle on the North American Continent.
