

54th
ANNUAL
MEETING
ATLANTA, GA.

An aerial view of Atlanta's skyline evidences the rapid growth and accelerated economy of the past decade.

Atlanta Invites You

Atlanta, the resurgent city, is sited in a locale that a little better than a century ago was marked only as a crossing of Indian trails which wandered over the forested hills; next by roads for oxcarts, then, as a railroad center, a highway crossing, and presently an air line center.

Now Atlanta welcomes the Spring Meeting of the AOCS, and waits to receive those who will attend, as they converge here by road, rail, and air.

The ready adaptation to change in transport has characterized much of the commercial and industrial development of the City. It was an early center for the production of commercial fertilizers, an industry which later contributed much to the agricultural revolution. The infant vegetable oil industry, struggling through technological growth pains, had an important outpost here. The soft drink industry, now such a familiar part of the American scene, leans heavily on early Atlanta enterprise. From these early beginnings a diversified and busy industry has kept pace with the growth and development of a large metropolitan area.

Atlanta, the Convention City of the Southeast, offers visitors to the Spring Meeting many attractions. April finds the area in perhaps its finest dress. For though the dogwoods will have passed their annual show period, other spring flowers should be at their loveliest.

Many points of interest are dispersed over the metropolitan area. The Cyclorama and numerous marked sites

describe the Battle of Atlanta for those inclined to history. Lovers of Uncle Remus stories may visit The Wrens Nest, home of the author, Joel Chandler Harris. Night clubs stand ready to entertain those who seek light relief from a strenuous day. In a golf conscious city you may play the game on a famous course. Sightseeing tours will be arranged. Official program and other plans are soon to be announced.

Atlanta is also known as the Phoenix City, after the fabled bird which grew from its own ashes. The City Seal, symbolic of that resurgence, is reproduced here to remind you to attend the AOCS Meeting in Atlanta, April 21-24, 1963.

Reminder To Authors!

Titles and abstracts (100-300 words) for papers to be delivered at the 54th Annual Spring Meeting in Atlanta should reach Atlanta Program Chairman E. J. Drobka no later than February 15, 1963.

(Address: P. O. Box 5257, Atlanta 7, Ga.)

Northern California Section Holds Final Meeting of Year

The Northern California Section held its last meeting of the year on November 9th at the Engineers Club in San Francisco. Speaker for the evening was H. J. Dutton of the Northern Regional Research Laboratory, U.S.D.A., Peoria, Ill., who recently received the AOCS *Canadian Award of Merit*. Dr. Dutton spoke on "New Techniques for Fats Analysis."

H. J. Dutton addresses the attendants of the final Northern California Section Meeting. Dr. Dutton chose the topic of "New Techniques for Fats Analysis."

The section was honored by the presence of AOCS President, A. E. "Doc" MacGee, who spoke briefly on the importance of individual participation of AOCS members in both local and national activities in order to derive more benefits from their association with both groups.

Chairman, L. A. Goldblatt announced the election of the following 1963 officers: L. O. Cummings, Chairman; Sherman Lee, T. H. Applewhite, and P. J. Cygan, Steering Committee.

The next meeting of the Northern California Section will be held in the spring of 1963.

E. L. JACOBSON
Section Secretary

Taking part in after-dinner conversation, are (left to right), D. S. Bolley, Mrs. F. L. Avera, A. E. MacGee, L. A. Goldblatt, and H. J. Dutton.
