Fatty Acid Report

December 1963 production of animal, vegetable, and marine fatty acids classified under Categories No. 1-11 totalled 35.7 million lb, down 2.2 million lb from November, but up 1.9 million lb from December 1962. Inclusion of tall oil fatty acids put the November production total at ca. 56 million lb.

For the year, production of all fatty acids exclusive of the tall oil types amounted to 441.0 million lb, up 6.6% from the 413.8 million lb reported produced in 1962.

Disposition of fatty acids under these Categories amounted to 34.5 million lb, compared with 38.6 million lb in November and with 31.6 million lb in December 1962.

Finished goods inventories totalled 37.6 million lb on December 31st, ca. 2.3 million lb above the November 30th level. Work-in-process stocks were 19.4 million lb, close to the end of November figure.
