

**OLD HAND?**

**NEW HAND?**

In the course of our quarter-century in the vitamin A business we've compiled a great deal of information. The fruits of our knowledge are available to those whose work has long involved vitamin A fortification of margarine. If you are such an individual, you probably know this. You also know that our MYVAPACK® Vitamin A comes in batch-size cans; that the labels can be color-coded; that the vitamin A may be custom-blended with vitamin D and carotene or other acceptable colorants. If, on the other hand, you are new to the business of vitamin A fortification of margarine, you may want additional data on these matters.
