

## Nominations Being Accepted for MacGee Honor Student Program

Nominations for awards from the MacGee Honor Student Program for the AOCs Spring and Fall Meetings of 1965 are now being accepted. These awards will give outstanding graduate students an opportunity to hear technical sessions at Houston and Cincinnati and to participate in all the activities of the Meetings. Those chosen will receive an all-expense-paid-trip, including round trip air fare, registration and activities fees, hotel room and meal expense.

The award, under the sponsorship of the AOCs Education Committee, N. H. Kuhrt, Chairman, and the MacGee Program sub-committee, under the direction of S. S. Chang, was designed to stimulate interest in the field of fats and oils.

Nominees must have been enrolled in their present graduate school for at least one year and must have conducted research in the field of lipids for their dissertations. Judgment of nominations will be based upon the academic status and experience of the Nominee, recommendation of his major professor and a statement from the Nominee on his interest and research plan in the field of fats and oils.

Any faculty member of a college or university may nominate students for the award. Nomination forms will be sent to those who have attended at least one AOCs meeting or have published at least one technical paper in the JAOCs during the previous year. Requests for information and nomination forms should be sent immediately to S. S. Chang, Food Science Department, Rutgers, The State University, New Brunswick, N.J.

## • Names in the News

V. K. Babayan (1948) has been elected a Vice President of Stokely-Van Camp, Inc., Indianapolis, in charge of research and quality control. He resigned from Drew Chemical Co. after 23 years of service.

A. K. Smith, pioneer and international authority in research on uses for soybean protein, retired Dec. 1 from the USDA Northern Utilization Research Laboratory, Peoria, Ill., after 22 years of service there. He will continue writing, editing and consulting in his field.

V. K. Babayan

A. K. Smith

The Pillsbury Company has announced three personnel changes in Chemical Division research and development. H. W. Smeal has been promoted to technical manager, process development; C. E. Villars joins the company as senior scientist; and D. C. Fellenz has been named technical service manager.

C. W. Given has joined the Market Research Department of Emery Industries, Inc., Cincinnati, Ohio. His initial responsibilities will include conducting of market analysis for the firm's organic acids and esters.

H. D. Lloyd has been appointed to the sales staff of The R. J. Brown Co., and will work out of the Detroit Division.

C. W. Schroeder has been appointed to the newly-created position of Administrative Assistant to the Director of Technical Research of Thomas J. Lipton, Inc., Englewood Cliffs, N.J. He will be responsible for all matters pertaining to project assignment and control.

Hays Sullivan, Burdette, Ark., was re-elected president of the American Soybean Association at their recent 44th annual convention; G. M. Strayer, Hudson, Iowa, was re-elected executive vice president and secretary-treasurer; J. C. Meade, Lafayette, Ind., was elected vice president, succeeding J. L. Trisler, Fairmount, Ill.

S. V. Militello has been promoted by Spencer Kellogg Div. of Tectron, Inc. to technical service representative, working in association with district sales managers in Cleveland and Cincinnati.

N. R. Lockmiller has been appointed Manager of Special Products for the Corn Div. of A. E. Staley Mfg. Co. He will direct distribution of chemical products derived from corn and soybeans for use in food processing, pharmaceuticals and other industries.

A. G. Schrodtt has been appointed Scientific Director of Packard Instrument Co., responsible for their laboratory functions and projects. Dr. Schrodtt has most recently been President and Director of Research and Development of his own consulting firm.

A. H. Wallace, Vice-President of the R. J. Brown Company and manager of the Cleveland plant, retired December 31, 1964, after 34 years of service in the coatings industry. As the company's first salesman, he introduced their solvents into the Chicago market and the southeastern states. He became Vice-President in 1950 and assumed charge of the Cleveland and Ohio operations in 1952.
