## 14th Annual Conference on Mass Spectrometry and Allied Topics

The 14th Annual Conference on Mass Spectrometry and Allied Topics will be at the Sheraton-Dallas Hotel in Dallas, Texas. The Conference will be under the auspices of Committee E-14 on Mass Spectrometry of the American Society for Testing and Materials.

### Four Symposia Planned

In addition to contributed papers and to technical meetings of Committee E-14 and its subcommittees, the Con-

ference will include four one-half day symposia in which invited speakers will discuss particular subjects related to mass spectrometry. These symposia, together with those individuals responsible for their arrangements, are as follows: *Ionic Collision Processes*, arranged by C. F. Giese, University of Minnesota; *Solids Studies*, arranged by W. A. Chupka, Argonne National Laboratory; *Advances in Analytical Mass Spectrometry*, arranged by A. G. Sharkey, Jr., US Bureau of Mines; *Instrumentation Developments*, arranged by L. F. Herzog, Nuclide Corporation.

Papers on research and development topics pertinent to mass spectrometry and ionization phenomena are solicited. The deadline for submitting abstracts will be Feb. 15, 1966. Contributed papers and correspondence should be sent to: Dr. H. M. Rosenstock, National Bureau of Standards, Washington, D. C. 20234.

Bound volumes of preprints will be available to conference attendees.

### • Industry Items

NOPCO CHEMICAL COMPANY, Newark, N. J., has purchased the property and equipment of the Marcus Ruth Jerome Company, Pittsburgh. The installation was designed to produce fatty oils, esters, and amines for chemical processing. Nopeco chemical will produce industrial grade lard oil here for use in the manufacture of metals and pharmaceuticals, plus esters and amines for use in a wide variety of chemical specialty products.

The G. BARR COMPANY celebrated its 30th anniversary on Nov. 3, 1965, and the first anniversary of its Niles, Ill., manufacturing plant. In three decades the company has grown from a three-man operation to a packaging supplier capable of a weekly capacity of four million aerosol units and eight million packages. Non-aerosol packaging includes drink mixes, detergents and special items for sample mailings packaged in pouches, cartons, tubes and jars.

# ARMSTRONG SCRAPED SHELL CRYSTALLIZERS

## PILOT CRYSTALLIZER RENTAL UNITS

**Typical Fluids: Animal Oils, Vegetable Oils, Tall Oil, Fish Oils, Paraxylene, Paradi-chlorobenzene, Dewaxing Lube Oils, Many Organic Intermediates**

### APPLICATIONS

Low Temperature Crystallizing  
 Crystallizing Organics or  
 Viscous Fluids  
 Cooling Fluids up to 80,000 cp.  
 Materials with High Boiling Point Rise

12" Inner Pipe Pilot Crystallizer, 10' Scraped Length. 316SS Inner Pipe, C/S Refrigerant Jacket. 3/4 HP Explosion Proof Motor.

REFRIGERATION AND PROCESS KNOW-HOW AVAILABLE  
 VARIETY OF SHELL SIZES AND INTERNAL DESIGNS
