

• Names in the News

M. L. Ott

Two AOCS members are among three men recently promoted by the Glidden Company (Durkee Famous Foods.)

M. L. OTT (1948) has been named department manager, process and research development. Mr. Ott will coordinate the technical activities for the process research and fractionation sections.

A. E. THOMAS (1961) has been appointed department manager, chemical research. He will coordinate the technical activities of the organic, physical and analytical chemistry sections of Durkee Research.

R. G. Manning has joined the research and development staff as a member of the analytical chemistry section.

K. J. SMITH has joined the staff of the National Cottonseed Products Association, Inc., as assistant director of research and education.

R. D. STAIN has been appointed refined oil sales manager at the A. E. Staley Manufacturing Co. He succeeds J. E. STEHR, who is accepting a position in the company's financial division.

W. G. THALHEIMER (1965 IA) has been appointed group leader in the foods laboratories of Atlas Chemical Industries, Inc., according to W. C. GRIFFIN (1954), associate director of product development.

D. R. HINKLEY has been elected president of Emery Industries, Inc. Mr. Hinkley succeeds A. W. SCHUBERT, president since 1960, who becomes chairman of the board. J. J. EMERY, grandson of the company's founder, is resigning as board chairman to fill the new position of chairman of the executive committee.

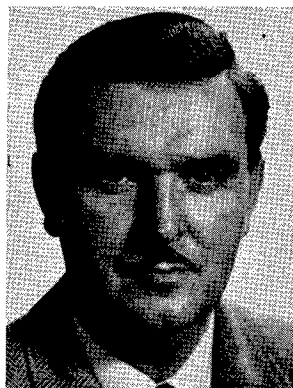

R. C. RICHTER has been named general manager of Nopco Chemical Company operations in Pennsylvania. In the newly created post, he is responsible for the operations of two subsidiary companies, Superior Zinc Company, Bristol, and Nopco Chemical Company, Pittsburgh.

F. A. VANDENHEUVEL (1963) of the Department of Agriculture, Ottawa, Ontario, Canada, was one of 45 chemists and chemical engineers recently elected Fellows of the Chemical Institute of Canada.

RENE TREVINO (1963), has been elected to vice-president—marketing, of the Retzliff Chemical Company, Houston, Texas. He previously had served as general sales manager.

R. Trevino

Los Molinos, S. A., Adds Extraction Plant Operation

Ciudad Obregon, Sonora, Mexico, is a surprisingly modern and progressive municipality on the west coast of Mexico, in close proximity to Guadalajara, Mexico City and Acapulco. This area is becoming the center for large scale oil seed processing, in a program reminiscent of similar expansion in Lubbock, Texas, 15 years ago.

The area is fully irrigated, and cotton and other oil seed production is growing by leaps and bounds. Cotton production of 200,000 bales in 1965 should exceed 300,000 bales in 1966. Soybeans available for crushing should exceed 2,000,000 bushels this year, compared to 1,500,000 bushels last year. In addition there will be 40,000 metric tons of safflower seed and 15,000 metric tons of sesame seed available for crushing.

In anticipation of this increasing oil seed supply, Los Molinos, S. A., has just put into operation an integrated cottonseed plant with miscella refining and with facilities to process virtually every type of oil seed. Further, Los Molinos has recently acquired a second oil mill in Guadalajara which also has miscella refining and a finished products plant.

Within a mile radius of Los Molinos are two neighboring oil mills, Empresas Longoria, which installed a French Solvent Extraction Plant of 400 metric ton capacity two years ago; and Aceita, S. A., which is in the midst of an expansion project involving a French Stationary Basket Extractor installation.

Ciudad Obregon now becomes one of the five municipal areas on the North American Continent containing three or more oil mill solvent extraction plants. The others are Memphis, Tenn.; Lubbock, Texas; Decatur, Ill.; and Cedar Rapids, Iowa.

• New Members

Active

- Paul Bogner, Technical Sales Representative, Sterwin Chemicals, Inc., Los Angeles, Calif.
Nancy Aeberly McHenry, Librarian, Armour Food Research Division, Oak Brook, Ill.
Michael Elmer Mason, Associate Professor, Biochemistry, Oklahoma State University, Stillwater, Okla.
Thomas Jefferson Moore, Assistant Manager, Woodson-Tenent Laboratories, Little Rock, Ark.
Gummuluru V. A. Pantulu, Research Fellow, University of Minnesota, Minneapolis, Minn.
Solomon Shankman, Director, Shankman Laboratories, Santa Fe, Los Angeles, Calif.
Reuben Straus, Director of Laboratories and Research, St. Joseph's Hospital, Burbank, Calif.
Philip M. Vaughan, Jr., Assistant Quality Controller, Best Foods Division, Corn Products, Portsmouth, Va.
Charles Hugh Whiteside, Teacher, Kilgore College, Kilgore, Texas.

Individual Associate

- Jack M. Gill, Director, Research and Engineering, Varian Aerograph, Walnut Creek, Calif.

Active Junior

- William George Doeden, Jr., Analyst Swift & Co., Chicago, Ill.

• Obituaries

R. A. BRUCE (1965), president of Cindet Chemicals, Inc., died in Greensboro, N. C., on May 30, after suffering a heart attack.

J. J. GANUCHEAU (1918), Honorary Member of AOCS since 1964, died July 18, 1966, in New Orleans, La.

E. T. MARCEAU (1925), Emeritus Member, died April 20, 1966.
