

Fiesta Holiday To Follow AOCS Spring Meeting

Invitation Issued by North Central Section

New Orleans prides itself on being the "Most Interesting City in the USA," and the claim is not unjustified. Famous for its creole cuisine and fine restaurants, its Vieux Carré (Old French Quarter), its night clubs and Dixieland Jazz, the city does have a great deal to offer to everybody. Its personality—easy to sense but difficult to describe—is a mixture of sophistication, honky-tonk and Southern Hospitality, all blended to make New Orleans the unique American city it is.

Plan to be there with your wife to attend the 41st Spring Meeting of the AOCS!

Monarch Travel is happy to announce that it has prepared all the arrangements for the co-ordination of the trip of the members of the AOCS who will participate in this meeting.

The AOCS Group Flight will leave Chicago, O'Hare Airport for New Orleans on May 7, 1967, on Eastern Airlines jet flight No. 243 at 12:00 noon and will arrive at 2:05 P.M.

The return flight from New Orleans to Chicago is reserved for either May 10 or 11, or any other time that is more convenient for the individual member. Of course, Monarch Travel is at your service for any travel arrangements from any other city.

After the intense days of the meeting, why not take a few days of relaxation and fun in Mexico? Mexico is only a few short hours away. Mexico is many worlds, many ages and many cultures. And they are all yours to explore!

You will think time has skipped ahead to the year 2000 when you arrive in Mexico City. Such bold concept in architecture, such daring in design, such creativity! But take another look . . . you are quickly aware of centuries past. Ancient idol motifs on sleek glass apartment houses. To get the feeling of it all, visit the Plaza of the Three Cultures (Tlaltelolco—Aztec; Spanish Colonial, and Modern) or get a full view of the whole city from a 44th floor restaurant atop the Latin American Building. Drive up that steep hill in Chapultepec Park, visit Maximilian's Castle . . . or drop in at the circular Museum of Art. Don't miss the great twin-towered Cathedral, and then walk across the huge Zocalo Plaza. See 20,000 pre-Hispanic art objects in the Diego Rivera Museum. In an hour, go back 2000 years or more and behold the great pyramids of the Sun and the Moon (and the Temple of Quetzalcoatl). These are the pyramids of Teotihuacan, which was the city first begun in 200 B.C. Glide through the floating gardens on a flower-decked barge at Xochimilco!

The NORTH CENTRAL SECTION OF THE AOCS extends to all members a special invitation to join in the FIESTA HOLIDAY to MEXICO CITY, arranged by Monarch Travel. We have reserved a number of seats on Eastern Airlines flight 905 departing New Orleans on May 10, 1967 at 6:55 P.M. and arriving in Mexico City at 8:56 P.M. Transfers, hotel accommodations at the Del Prado Hotel, sightseeing, baggage handling, the service of English speaking guides . . . everything has been carefully planned for a four day stay of fun and relaxation.

The return flight is on Sunday, May 14, 1967, at 11:00 A.M. on Mexicana airlines directly to Chicago, arriving at 3:35 P.M. Or, Monarch Travel can arrange flight to any other city for your return.

Please watch for the brochure and application form that will be sent to you directly in the AOCS mailing. If you have any questions in the mean time . . . call or write to MONARCH TRAVEL, INC., 105 West Adams, Chicago, and we will be more than happy to give the information you wish.

- Tenox food-grade antioxidants
- Tenox antioxidants for edible fats
- Review of antioxidants analyses in food products
- Effective stabilization of inedible animal fats with food-grade antioxidants
- Tenox feed-grade antioxidants for poultry and animal feeds
- Mechanisms of fat oxidation

Learn how to eliminate rancidity problems with these aids from Eastman

Nothing destroys the good name of a food product so quickly as the unsavory odor and flavor of rancidity. Once started, it can't be reversed because rancidity is an oxidative chain reaction. (In fact, it proceeds at an increasing rate.)

Rancidity can be controlled, however, by the use of fat-soluble antioxidants. This literature from Eastman provides a wealth of information and data to guide you in selecting, evaluating and using antioxidants to protect fats and fat-containing foods. Backing up this knowledge is Eastman's fully-equipped laboratories staffed with antioxidant specialists with years of experience in the field. They will be glad to suggest the most effective antioxidant and the best method of employing it in your product. Return the coupon above indicating the literature you want.
