

Chevreul Medal Awarded to AOCS Member for Eighth Time

Since 1963, the Association Francaise des Techniciens des Corps Gras has awarded the Chevreul Medal to outstanding recipients in order to honor foreign or French leaders in the field of lipid research. Eugène Chevreul was a nineteenth century French chemist noted for his work on fats and soaps and the medal has been established in his memory.

W. O. Lundberg

This year the medal has been awarded to W. O. Lundberg ('44) of the United States and to Roger Francois of France. This is the eighth time that an AOCS member has been awarded the coveted medal. Dr. Edgar Piret, Scientific Attache, American Embassy in Paris, represented Dr. Lundberg at the presentation.

Dr. Lundberg, besides being Editor of the AOCS's LIPIDS journal, is Executive Director and Professor of Biochemistry at The Hormel Institute, University of Minnesota. Mr. Francois is Honorary Director of the Institute des Corps Gras.

Previous winners who have been AOCS members are: Giovanni Jacini ('51) of Italy, Marcel Loncin ('54) of Belgium, A. R. Baldwin ('44) of the United States, Henryk Niewiadowski ('68) of Poland, Charles Paquot ('52) of France, Jan Boldingh ('68) of the Netherlands and A. C. Frazer ('64) of Great Britain. Other winners have been G. Champetier of France, T. P. Hilditch of Great Britain, J. Martinez Moreno of Spain, Miss Marie Therèse François and Pierre Desnuell of France, and C. Trottmann of France.

New Research Station Opened by Harrisons & Crosfield

A new Research and Development Laboratory was opened on July 10, 1970, at Camberley in Surrey, England, by J. F. E. Gilchrist, Chairman of Harrisons & Crosfield. The ceremony was attended by more than seventy distinguished guests from the United Kingdom and overseas including the High Commissioner of Malaysia.

The Laboratory is believed to be the only one outside the producing countries owned by a commercial organization specifically built and equipped to carry out a comprehensive program of palm oil and natural rubber research. Its main objective will be to improve the quality of the plantation products offered by Harrisons & Crosfield to world markets and to extend their use into new applications. Considerable emphasis will be given in its work to palm oil, of which the Group handles more than ten per cent of world production, and where for some years they have been making intensive efforts to meet buyers' quality requirements.
