We've put the heart into this installation!

Solvent Extraction Plant from Rosedowns for maximum oil yield.

Rosedowns have put their heart into this Soya Bean processing installation in Holland . . . its called a Rosedown Rotocel Extractor, which is manufactured under licence from Blaw Knox. The Rotocel process has proved itself time and again by producing the highest quality products of extracted oil and meal having oil contents as low as 0.2%.

Rosedowns offer a complete service from beginning to the end. Planning a Mill, to erecting it, manufacturing plant to installing it . . . we could go on . . . and on .

Rosedown's back up is the finest there is . . . anywhere .

Now that's just like Rosedowns!
