

Mrs. Arthur Wrigley, Mrs. Fred Barrett and Stan Dominik, president of the Northeast Section.

Fred Barrett speaks on dimer acids

At the October 24th meeting of the AOCS Northeast Section, Fred Barrett of Emery Industries spoke on dimer acids. He discussed their chemistry and manufacture, and postulated structures as well as properties and reactions. The meeting was attended by about 45 members and their guests.

The next meeting of the Northeast Section will be held on Tuesday, December 5th and will include a tour of the Mennen Plant, Morristown, N.J., followed by a dinner at the Black Bull Inn, Mountain Lakes, N.J. The subject of the dinner speaker will be "Vitamin E as a Deodorant."

Left to right: Fred Barrett and Arthur Wrigley of USDA, chairman of the meeting.

Frank White of Foster Wheeler, Joyce Kern of the Fatty Acids Producers' Council and Ernest Gilmont of A. Gross & Co.

filtrex... the direct solvent extraction process that eliminates costly prepressing

FILTREX effectively combines the steps of extraction, filtration and washing. High extraction rates are obtained at low solvent ratios with correspondingly high miscella concentrations. Thorough washing with effective filtration insures low residual oil and solvent in the marc. Efficient solvent removal in the Marc Desolventizing System results in meal commercially free of solvent. FILTREX is designed for compactness of layout, accurately controlled with provisions for safety and ease of operation.

FILTREX plants now in operation on rice bran, soybeans, cottonseed, rapeseed, flaxseed, sunflower seed and various press cakes producing highest quality oils and meals.

ADVANTAGES OF W & S FILTREX PLANTS

- Eliminates pre-pressing
- Eliminates "fines" problem
- Lowest solvent requirements
- Lowest utilities consumption
- Compact installation indoors or outdoors
- Operated easily by one man
- Highest quality oil and meal.
