## Walter Pons earns Superior Service Award

Walter A. Pons, Jr., USDA research chemist, has been awarded the Department's Superior Service Award for his development of procedures for determining precise amounts of aflatoxins in mold-contaminated mixed feeds, peanuts, cottonseed, dairy and poultry products.

Aflatoxins are poisons secreted by some molds. Pons pioneered in the application of fluorodensitometry to the objective measurement of these toxins on thin layer chromatographic plates.

He joined AOCS in 1947 and recently served on the organizing committee for the Society's 64th Annual Spring Meeting.
