

AOCS to inaugurate placement service at National Meetings

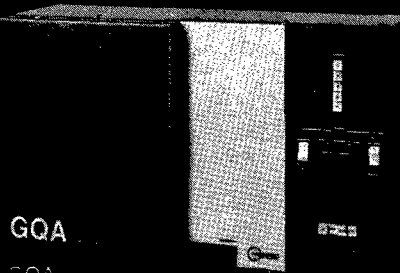

The AOCS Governing Board has approved the establishment of a placement service at its National Meetings. The action was taken by the Board in an effort to make available an important extra service to members and others in industry.

Specific logistics for the service are being formulated at this time and will be announced in the January issue of *JAOCs*. In the meantime, individuals and companies can request more information by writing: Executive Director, AOCS, 508 S. Sixth St., Champaign, Ill. 61820.

Preliminary plans call for the service to provide for listings of both applicants and job openings and for a system to facilitate the scheduling of interviews at National AOCS Meetings. For those individuals and companies wishing to maintain an element of confidentiality in their listings, special provisions are being planned.

The program was not designed as a revenue source for the Society. Unemployed members and all students will be provided with the service without charge. Nonmembers and companies who desire to use the service will be assessed a nominal fee to help defray the costs involved. Fees, as well as registration instructions, will be announced in January.

Introducing Grain Analysis you can Trust!

GQA

The all-new GQA Model 41 Grain Quality Analyzer™ achieves accuracy and reliability previously unattainable.

Second generation design incorporates improved technology via a built-in micro-computer to achieve unprecedented reliability and accuracy in Grain Analysis. Instantly provides percent Protein, Oil, Water and "Other" constituent. No skill required. Automatically self-standardizing for the ultimate in dependability and accuracy. Call or write today for complete details.
