ERRATUM

In "Applications of Pulsed NMR to Fatty Emulsions" by J. Trumbetas, J.A. Fioriti, and R.J. Sims, [*JAOCS* 53:722 (1976)], on page 725 there is an expression for percent interaction which reads

$$\frac{45.5 \times 100}{38.8} - 100 = 7.0 \text{ (at 25 C)}$$

This should read

$$\frac{41.5 \times 100}{38.8} - 100 = 7.0 \text{ (at 25 C)}$$

The number 45.5 should read 41.5.
