

New Products

- Lovibond's Automatic Colorimeter measures refined edible oil colors automatically and reads out in Lovibond units, up to 40 yellow and 20 red. The unit measures optical density of samples at two points in the spectrum, approximately equal to the colors of the Tintometer red and yellow filters. The unit is designed to ignore the effect of bubbles and suspended particles. Information: Tintometer Information Service, PO Box 17, Bloomingdale, NJ 07403.

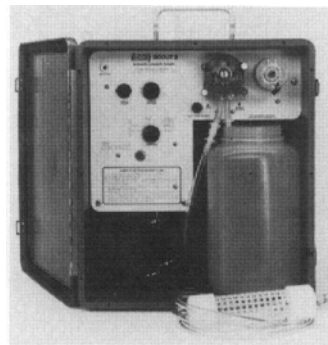

- Shandon Southern Instruments has improved its 2-liter Automatic Tissue Processor to include an optional vacuum embedding unit that plugs directly into the processor. Information: Shandon Southern Instruments Inc. 515 Broad Street, Sewickley, PA 15143.

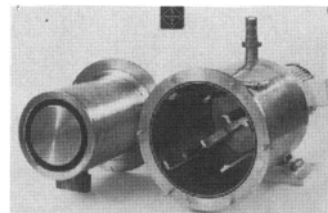

- Perkin-Elmer's Model 240B Elemental Analyzer for carbon, hydrogen and nitrogen analysis includes an auto sampler, programmable calculator/data analysis system, and autobalance for automatic weighing of samples. Information: Perkin-Elmer Corp., Instrument Division, Main Avenue, Mail Station 12, Norwalk, CT 06856.

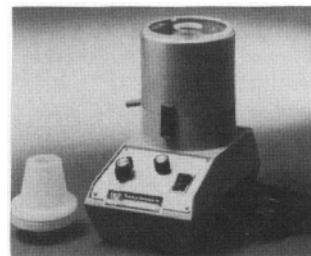

- Altron-Eco-Supply B.V. of The Netherlands has developed a new automatic filtration unit for cleaning of polluted surface water, waste water and recycled water. The "Rozka-filter" is now available for export to North America. The unit is available in a variety of standard sizes. Information: Netherlands Consulate General, Commercial Division 659, One Rockefeller Plaza, New York, NY 10020.

- N-Con's automatic sampler collects samples of sewage or industrial wastes for analysis at a rate from one sample every three hours to eight samples per hour. Volumes collected are infinitely adjustable from 10 ml to 300 ml. Information: J.S. Beach Jr., N-Con Systems Co., Inc., 308 Main St., New Rochelle, NY 10801.

- Fryma-Maschinen AG has introduced its Fryma-Coolmix, a continuous scraped surface heat exchanger with rotating wiper blades to scrape the product from the heat exchange surface for constant and quick cooling (or heating). Information: Fryma-Maschinen AG, PO Box 235, CH-4310 Rheinfelden, Switzerland.

- Technilab Instruments Inc. says its new Filtermatic centrifugal filtering system is designed for accelerated separations of laboratory scale suspensions, emulsion and high speed filtration of solvents. Information: TechniLab Instruments Inc., Pequannock, NJ 07440.

- Centrico Inc. is unveiling advanced Westfalia dairy centrifuges and related food processing machines this month, including its brand new Westfalia Butter Blender BMA 10000.

- Bel-Art Products is marketing newly designed unbreakable gas sampling bulbs with choices of injectable septum end, two-way stopcock end, or three-way stopcock end. Information: Bel-Art Products, Pequannock, NJ 07440.
