## AOCS short course taking shape

Six persons have been confirmed as speakers for "Detergents Eight-O," the AOCS Short Course on soaps and detergents to be held Sept. 14-17, 1980, at Hershey, Pennsylvania.

Helmut Stupel, chairman for the session on constraints on the industry, has announced three speakers. George C. Schweiker of Philadelphia Quartz will present a review paper on major possibilities for phosphate replacements; SDA President Ted Brenner will speak on government influence on the industry; and Dr. F. Kennedy of Conoco Chemicals Co. will present a paper on raw materials.

In Herman Brown's session on how to make consumer products, Alan Kessler will speak on "Synectics," Erwin

Grob on "The Role of the Private Label Company," and R.W. Dougherty on "How Surfactants are Developed and Geared for Use in Consumer Products."

Ted Matson's session on how to make technical products will consist of two panel discussions. One will cover specific ingredients, the other on the steps involved in developing a product, including panel testing and consumer testing.

The first session of the conference will cover basic raw materials available to the soap and detergent industry.

The concluding session, with short course chairman Irvin Schmolka heading the group, will be a panel of the short course speakers discussing the full short course and answering questions of registrants. □
