Meetings

200 registrants at Detergents Eight-O

Approximately 200 registrants participated in the AOCS Short Course on soaps and detergents held during mid-September in Hershey, PA.

The course, entitled "Detergent Eight-0: Meeting the Needs of the 80s," was structured into four formal sessions, followed by a fifth session reserved for registrants to question speakers. The four formal sessions were: What Constraints Do We Operate Under?, What Do We Have to Work With?, How Do We Make a Technical Product?, and How Do We Make a Successful Consumer Product? The proceedings of each session will be published in *JAOCS* during the first half of 1981. The articles will then be compiled into a single volume.

The course was designed for chemists and chemical engineers in the soap and detergent industry and related fields. It was the first time AOCS has held a soap and detergent short course since 1975; the World Conference on Soaps and Detergents was held in Montreux, Switzerland, during 1977.

Industry News

FDA requires warning on bubble bath products

A statement warning consumers that excess or prolonged use of bubble bath products may cause irritation to skin or urinary tract will be required on bubble bath products after Aug. 19, 1981. The FDA published the regulation in the *Federal Register* on Tuesday, Aug. 19, 1980, p. 55173. Bubble baths are defined as products intended to be added to produce a foam with a surface-active agent as a detergent or foaming ingredient.
