# OIL REFINERY MANAGERS, REDUCE LOSSES NOW! NEW DESIGN! NEW TECHNIQUES!

SYSTEM  
THREE  
"VIDEO"

## LOSS MONITORING • PLUS • LOSS CONTROL SYSTEM WITH (NO MOVING PARTS) MASS FLOWMETERS

New: Video Display Loss Monitor allows more information to be displayed and allows messages to be displayed.

New: Calculations and features to make this the best Loss Monitor ever with three separate loss indications. Relative Loss for tuning the process, Absolute Loss for Inventory purposes, and Batch Loss for short term comparison of absolute losses.

New: Optional Mass Flowmeters — No moving parts, immune to air blows and not effected by air entrainment or by dirty crude oils.

New: Digital Caustic Treat Control — Standard with every Loss Monitor, guarantees your ability to tune the caustic treat for a low loss condition.

New: Automatic Zero Calibrate Manifold System — Simplifies this important operation allowing on-line calibrations without shutting down the refinery. Greatly reduces installation costs.

Warning: Elliott Loss Monitors are protected by U.S.A. Patents.

Send for our latest brochure, and ask about our new Lease/Purchase terms that allow you to pay for the system out of savings. Most refineries only need 7 days out of each month to make the payments the rest is return on investment.
