

30255-30257; Aug. 29, 1986, pp. 30886-30893.

CCC's final ruling on price support differentials for 1986-crop peanuts was announced in the Aug. 21, 1986, *Federal Register*, pp. 29951-29953. In the Sept. 11, 1986, *Federal Register*, pp. 32343-32344, CCC announced a preliminary support price of \$4.77 per bushel for 1986-crop soybeans.

FDA reviews Red 3 status

The Food and Drug Administration (FDA) postponed the closing date of Sept. 3, 1986, to Nov. 3, 1986, for the provisional listing of FD&C Red 3 for use in coloring cosmetics and externally applied drugs and its lakes for use in coloring food and ingested drugs.

FDA said it took the action to provide additional time to review and evaluate a scientific panel report on the color additive. The panel was formed to consider claims that a secondary mechanism might be responsible for tumorigenic effects observed in connection with FD&C Red 3 use in animal testing. Details: *Federal Register*, Sept. 3, 1986, pp. 31323-31324.

FDA nixes fast-food labeling

The Food and Drug Administration (FDA) Sept. 5 denied a petition from the Center for Science in the Public Interest (CSPI) to require label disclosure of food ingredients in fast-food restaurants.

In a letter to CSPI, FDA's Acting Associate Commissioner for

Regulatory Affairs John M. Taylor wrote that the petition submitted had not demonstrated the need to change FDA's traditional policy governing fast-food restaurants. Taylor explained that FDA questioned whether it would be practical or equitable to enforce such a requirement against one segment of the food service industry. He said FDA doesn't have sufficient resources and staff to realistically enforce an ingredient labeling requirement for restaurant foods.

In addition, Taylor said, CSPI failed to explain why FDA should distinguish between so-called "fast-food restaurants," as defined by the CSPI petition, and all other food service establishments.

FDA said it supports voluntary efforts by the food service industry to provide consumers with ingredient information. Details: *Food Chemical News*, Sept. 15, 1986, pp. 24-27.

Inside AOCS

Governing Board okays building

The AOCS Governing Board in September approved the concept for a new headquarters building in Champaign, Illinois, as presented by the society's building committee and architect Bob Gruber of Rettberg-Gruber Architects.

The approved plan calls for construction of an approximately 12,000-square-foot, two-and-a-half story colonial style frame building with brick and clapboard exterior. According to AOCS Executive Director Jim Lyon, the building is designed to meet the projected increase in staff.

The headquarters site is in southwest Champaign in a development being constructed on a former farm within the incorporated city of Champaign. When completed, the development also will include a shopping center, limited office area, condominiums and single-family housing for upper-middle income families. The society is buying approximately 1.5

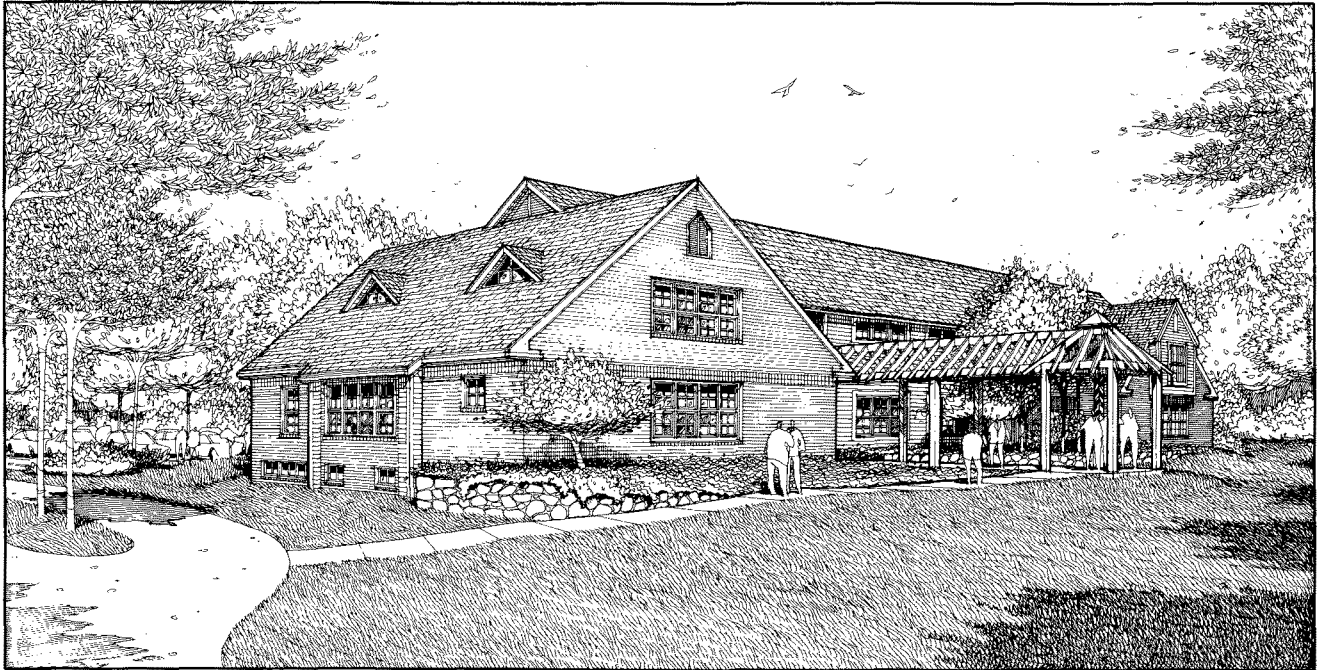

acres in the development.

In September, society officials projected bid documents would be ready by late October or early November. Bid letting and groundbreaking will follow as soon as possible, with the timetable depending on the bids received and weather conditions. According to Lyon, the goal is to move staff into the new facility no later than October 1987.

Currently, the society is renting temporary quarters at 41 E. University Ave., in downtown Champaign. AOCS staff moved out of the former headquarters at 508 S. Sixth St., Champaign, in late July after the society sold its lease to the University of Illinois. The society originally moved its headquarters from Chicago to Champaign in 1971 due to high rent, high employment costs and a lack of space. At that time, AOCS had eight full-time employees. Today, it has approxi-

mately two dozen full-time employees, with future plans to double in size.

Before the decision was made to construct a facility, a site committee and the Governing Board had examined the comparative costs of leasing additional space, adding to the facility on Sixth Street, buying an existing building or building a facility. Their findings showed that in the long term, the advantage was to build, Lyon said. The decision also was made to stay in Champaign, seen as a good environment for academic and scientific interests and a stable community providing quality managerial and professional staff. "AOCS has made a long-term commitment to Champaign-Urbana," Lyon said. "Financially, the decision to move to Champaign was a good one, and it's a good move to stay here." Transportation in and out of Champaign also is adequate, he said.

The planned building is designed to allow future expansion. Although consisting of two and a half stories, it will appear one-and-a-half stories high at some angles, as berming will be used to cover part of the lower level. An open trellis will lead into the front of the building, which faces south. At the back, a "bridge" from the parking lot will be used for an employee entrance. There will be guest parking west of the building. A delivery entrance also will be provided in the rear. North of the employee parking lot will be a grassed area.

The main-level south entrance will lead to the reception area. To the west will be a conference room/

library and the offices of the executive director, assistant to the executive director and support services. To the east will be offices for the technical director, advertising/marketing department, meetings manager, education director and data services/accounting department and space for support personnel. Two stairwells will be provided as well as an elevator, to make the building accessible to the handicapped. The upper level will include production functions, with space for copy editing, typesetting, design and a darkroom, as well as editorial department, support services and a small conference area. The lower level will house inventory and

warehousing, shipping and mailing, and a 1,400-square-foot multi-purpose room.

The AOCs Foundation has been charged by the Governing Board to find ways of financing the project. Current members of the Foundation Action Board are Robert Hastert, chairman; Bernard Szuhaj, vice-chairman; David Kravis, secretary; James Lyon, ex-officio, treasurer; Edward Campbell, John Heilman and Edward Perkins.

Plans were made in September to legally incorporate the AOCs Foundation as a separate entity. Lyon said that papers were being filed to incorporate it as an Illinois non-profit corporation.

Governing Board report

Proposals to restructure the AOCs Governing Board and to build a new headquarters facility were accepted by the Governing Board during a September meeting in Champaign, Illinois.

The restructuring of the Governing Board, which would require approval by AOCs members in a mail ballot, basically would increase to six, from three, the number of members-at-large on the Governing

Board and reduce the length of time each past-president serves on the board. The proposal includes a reorganization of AOCs committees designed to improve communication between committees and between committees and the Governing Board. Procedures for election of president, vice-president, secretary and treasurer would not be affected. Full details will be spelled out in future issues of *JAOCs* and in

material mailed to members with a ballot.

The Governing Board told Executive Director Jim Lyon to "begin as soon as possible to prepare amendments to the Articles of Incorporation and by-laws for a vote by the membership at the business meeting in May of 1987."

Under the proposal, the Governing Board would consist of the President, Vice-President, Secre-

tary, Treasurer, six Members-at-large (with three two-year terms filled in each annual election), the immediate past-president and several ex-officio members. Ex-officio members would include the education programs chairman, technical programs chairman, publications programs chairman and the executive director. All AOCS committees would be designated as belonging to one of several categories: education, technical, administrative, financial, membership or publications. The chairmen of educational committees would serve on an Education Program Coordinating Committee; similarly, the chairmen of committees in the other categories would serve on coordinating committees established in each of those areas. The AOCS President would serve as chairperson for the administrative area coordinating committee; the AOCS Secretary would serve as chairperson of the membership area coordinating committee; the AOCS Treasurer would serve as chairman of the financial areas coordinating committee; and educational, technical and publications committees would be led by a Governing Board appointee who could serve no more than five consecutive one-year terms as chairperson.

With regard to a new headquarters facility, the Governing Board approved purchase of a building site in Champaign and approved a building concept presented by a Champaign architectural firm. The proposed facility would provide 12,000 square feet of space in a two-and-a-half story building in south Champaign. The site is to be purchased with existing AOCS reserve funds. The Governing Board approved appointing a committee to raise \$400,000 through donations and to issue 800 bonds or notes of \$1,000 each, subject to concurrence with the AOCS Investment Committee's building fund-raising subcommittee. AOCS President Arnold Gavin said he will appoint the AOCS Foundation as the committee charged with the fund-raising campaign.

In other action, the board asked the 1987 annual meeting organizing committee to reconsider its budget so that the registration fee can be lowered to no more than \$170

instead of the original estimate of \$180. The board was told that thus far there are 26 technical session topics scheduled to fill 31 half-day sessions in New Orleans. A total of 42 half-day sessions is available.

The Governing Board approved a 1987 budget that shows operating income of \$1,854,800 and expenses of \$1,795,700. The 1985 actual expenses showed operating income of \$1,567,853 and operating expenses of \$1,476,664. The 1986 budget set operating income at \$1,730,700 and expenses at \$1,708,600. The current financial sheets indicate income may wind up about \$12,000 higher than forecast and expenses may be about \$32,000 higher, with a surplus of \$2,100, rather than the originally forecast \$22,100.

The Governing Board authorized a membership survey in 1987 to establish demographic data about AOCS members and to determine what type of information and services they need and expect from the society. Results would be used in planning future activities and publications.

Most other actions concerned routine business matters.

New officers

M.K. Gupta, process specialist for Anderson, Clayton & Co. in Houston, Texas, has been elected chairman of the South Central Section.

Other officers are John Wagner, vice-chairman, and Gerald Hasenhuettl, secretary/treasurer. Wagner is associate director of the Food Protein Research and Development Center at Texas A&M University, while Hasenhuettl is research associate in new technology for Anderson Clayton Foods, Richardson, Texas.

The section, which formed in 1985, currently has approximately 40 members. Attendance at section meetings includes members from Texas, Kansas and Tennessee.

New members

The following persons had applied for membership in the American Oil

Chemists' Society through mid-September 1986. If an applicant was invited to join AOCS by a current member, that member's name appears in parentheses at the end of the listing. The new members' listing is published bimonthly.

President's Club and Honor Roll

The AOCS members listed here have qualified for the 1986-87 AOCS President's Club or Honor Roll. Members who recruit at least one new member qualify for the President's Club; those recruiting three or more qualify for the Honor Roll. President's Club and Honor Roll members receive recognition at AOCS annual meetings. Forms for use in recruiting new members are available from AOCS Headquarters, PO Box 5037, Station A, Champaign, IL 61820 USA.
