On the Cover

Since the U.S. Food and Drug Administration granted low-erucic acid rapeseed oil generally recognized as safe (GRAS) status in 1985, canola has been the focus of increasing interest by U.S. food manufacturers, processors and growers. In the Features section beginning on page 1560, *JAACS* newswriter Anna Gillis examines the inroads made in the U.S. by canola and explores the factors that currently limit its growth. The cover photograph of canola was provided by the Canola Council of Canada.
