220TH ANNIVERSARY OF THE ACADEMY OF SCIENCES OF THE U.S.S.R.

The following letter was received from the Ambassador of the U.S.S.R. in Great Britain :

19th May, 1945.

DEAR MR. PRESIDENT,

From June 15th to 28th the 220th Anniversary of the Academy of Sciences of the Union of Soviet Socialist Republics will be celebrated in Moscow and in Leningrad.

The Academy of Sciences of the U.S.S.R. have requested me to inform you of this and to express their hope that The Royal Chemical Society will take part in the celebration of this Jubilee by sending their Representative to the Jubilee festivities.

It will be greatly appreciated by the Academy of Sciences of the U.S.S.R. if you will be good enough to let them know as early as possible the full name, scientific degrees, official capacity and the private address of your Representative to enable the Academy to send their invitation to him.

Yours sincerely,

(Sgd.) F. GOUSEV,

Ambassador of the U.S.S.R. in Great Britain.

The Council are glad to report that Professor F. G. Donnan agreed to represent the Society at the Celebrations and to present the following Address on behalf of the Society :—

THE CHEMICAL SOCIETY

TO THE

ACADEMY OF SCIENCES OF THE UNION OF SOVIET SOCIALIST REPUBLICS.

We, the President, Council and Fellows of the Chemical Society learn with the greatest pleasure that the Academy of Sciences of the Union of Soviet Socialist Republics will celebrate in June 1945 the 220th Anniversary of its Foundation, and we offer our warmest congratulations on this auspicious occasion.

Many scientists of world-wide reputation have been associated with your Academy ever since the early days when Lomonosov won imperishable renown by his remarkable discoveries in physics and chemistry.

In more recent years the election of Semenov and Zelinsky, two distinguished members of the Academy, as Honorary Fellows of the Chemical Society, has signalized our great appreciation of the services the Academy has rendered to the science of Chemistry.

We recognise the very high place which the Academy occupies in the fully organized plan of national development in the Union of Soviet Socialist Republics and the splendid contributions which are now being made, under its direction, to science and to civilisation.

In the period of reconstruction and peaceful development which is now before us we hail with immense satisfaction the part which the members of your Academy, enhancing their fame, continue to play in the progress and development of Science.

Signed on behalf of the Chemical Society this Twelfth day of June One thousand Nine Hundred and Forty-five.

(Signed) W. N. HAWORTH. *President.*

MY DEAR PRESIDENT HAWORTH,

On behalf of the Board of Directors and members of the American Chemical Society I wish to acknowledge with very real appreciation your cablegram just received sending us the cordial greetings from the Officers, Council, and Fellows of The Chemical Society at the time of your 104th anniversary and your sympathy on the great loss which recently came to our Country and the world.

I sincerely trust that the great impediments that have come to both of our organizations incident to the war will soon be removed and that we may go forward together in advancing chemistry and its usefulness to mankind, which is the basic objective of both of our organizations.

Sincerely yours,

le 10 juin 1945.*

MON CHER COLLÈGUE,

J'ai lu ce jour devant nos membres, au cours de la première assemblée générale que nous avons eue depuis le début de la guerre, l'adresse que vous avez bien voulu nous envoyer à l'occasion du meeting du 104^e anniversaire de la Chemical Society of London.

C'est avec une émotion intense que nous avons reçu ce message de nos amis et collègues d'Outre-manche, le premier qui nous arrivait, après tant de dures années d'épreuves et d'oppression, du monde libre et fier qui nous a porté secours et nous a délivré par sa victoire totale.

Au nom de tout nos membres, j'envoie à vous même et à tous nos confrères de la Chemical Society, nos remerciements très sincères pour votre attention qui a touché notre coeur. J'exprime le voeu de voir les liens d'amitié entre nos deux pays et entre nos deux sociétés se resserrer encore plus intimement si possible que par le passé.

Veillez agréer, mon cher Collègue, l'assurance de mes sentiments les plus distingués.

Le Président,
A. GILLET.

MON CHER PRÉSIDENT ET TRÈS HONORÉ COLLÈGUE,

Au nom de la Société Chimique de France dont j'ai l'honneur d'être le Président depuis janvier 1945, je vous adresse tous mes remerciements pour les sentiments si chaleureux et si cordiaux que vous avez exprimés dans votre télégramme du 19 avril.

A mon tour je vous adresse, avec le cordial salut de la Société Chimique de France, l'expression de nos sentiments de vive admiration et de profonde reconnaissance pour la part prise par la Grande Bretagne dans la libération de notre sol et dans le triomphe de la liberté.

Je vous ai adressé aujourd'hui par l'intermédiaire du Ministère des Affaires étrangères un télégramme

rédigé en termes un peu laconiques mais dont voici le texte intégral : " M. le Président de la Chemical Society, Nous partageons votre enthousiasme pour la victoire prochaine et votre foi dans l'avenir de l'humanité. Nous admirons les immenses efforts et les lourds sacrifices de la nation anglaise et de ses alliés pour libérer la France et nous restons profondément fidèles à l'amitié franco-anglaise. Nous vous adressons tous nos vœux pour la prospérité de la Chemical Society à l'occasion du 104ème anniversaire de sa fondation. Tiffeneau."

Il me reste à vous remercier personnellement pour vos très aimables attentions vis-à-vis de la Société Chimique de France et je vous serais très reconnaissant de vouloir bien exprimer tous nos remerciements à vos collègues du Conseil et aux membres de votre Société. Pour ma part j'avais déjà écrit en septembre dernier au Secrétaire de la Chemical Society en le priant d'exprimer à la Chemical Society toute mon admiration pour le magnifique effort de la Grande-Bretagne venant libérer la France. Permettez-moi d'y ajouter mes sentiments personnels d'admiration pour l'apport considérable des chimistes anglais dans le progrès de la chimie et tout particulièrement ceux que vous-même avez réalisés avec vos nombreux élèves dans le domaine des sucres.

Veillez agréer, mon cher Président, avec mes sentiments de vive sympathie, l'assurance de ma considération la plus distinguée.

M. TIFFENEAU.

PROCEEDINGS

OF THE

CHEMICAL SOCIETY.

Minutes of a SCIENTIFIC MEETING

held at Burlington House, Piccadilly, W. 1, on Thursday, October 4th, 1945, at 5 p.m.

The President, PROFESSOR W. N. HAWORTH, D.Sc., F.R.S., was in the Chair and welcomed the visitors present.

MINUTES.

The Minutes of the Annual General Meeting held on April 19th and of the Scientific Meeting held on May 17th were taken as read and were signed.

DR. CLARENCE SMITH.

The Meeting stood whilst the President read the following resolution :

“ The Council have learned with profound regret of the death on June 28th of Dr. Clarence Smith, Editor of the Society's *Journal* since January, 1924. He was appointed Assistant Editor to the Society in 1921 and Joint Editor in 1923.

Dr. Clarence Smith had a wide knowledge of Chemistry and he was a master of literary English. These gifts he placed freely at the disposal of the Society to our great benefit, and in doing so he maintained the high standard of our publications. Dr. Smith gained a world-wide reputation by reason of his expert knowledge of nomenclature, and this has been of inestimable value not only to the Society, but to the whole of the science of Chemistry.

Dr. Smith's death will be keenly lamented by the Fellows of the Society and especially so by those who have contributed during the past 24 years to its publications.

The Council desire to place on record their high appreciation of the great services Dr. Smith has rendered to the Society during his period of office, and they send their deep sympathy to his son and daughter in their bereavement.”

FORMAL ADMISSION OF FELLOWS.

The following were admitted Fellows of the Chemical Society : A. J. Turnbull, H. Gomberg, Miss G. M. Owen, C. F. Buckley, H. V. Stopes-Roe, M. Green, H. Robinson, R. J. Loneragan, A. E. Judd, W. J. PRESENTATION TO MR. S. E. CARR.

It has been suggested that many Fellows of the Society would welcome an opportunity of contributing to a presentation to Mr. S. E. Carr on his retirement from the office of General Secretary after forty-two years of service. The Council decided to invite contributions of not more than ten shillings from Fellows and friends. The nature and date of the presentation will be decided at a later date and notified to contributors.

Contributions should be sent, not later than January 31st, 1946, to Dr. D. C. Martin, General Secretary, at Burlington House, W. 1. Fellows desirous of paying through a bank should cross cheques "S. E. Carr Fund."

ACKNOWLEDGMENTS.

The thanks of the Council have been conveyed to the Association of British Chemical Manufacturers for a gift of £100 under Deed of Covenant, and to Major D. T. Coomber, Dr. S. W. Smith, and Mr. L. S. Theobald for gifts of publications.

ANNUAL REPORTS.

The Council of the Society has decided to change the policy in respect of the *Annual Reports on the Progress of Chemistry*.

It is proposed that, commencing in 1947, a series of reports will be issued in quarterly numbers of approximately 120 pages and in a format similar to that of the *Journal*. The character of the reports will be such as to include :

(1) General reviews of selected topics, the selections to be in accordance with an approved pre-arranged list covering a period of years.

(2) Once annually, a brief general review of the progress of the main branches of chemistry during the year.

(3) Reviews submitted spontaneously by authors. It is intended that these will be submitted either as finished articles or preferably as projects which the Publication Committee may encourage, or in special cases may accept in advance. In this way, it is hoped, that authors will be encouraged to put their best work into surveys of subjects which interest them and that their contributions will have value as original essays besides being surveys.

It is proposed that the *Annual Reports* should continue on the present basis to include 1946, so that in 1947 the *Annual Reports* for 1946 will appear together with the first series of the new quarterly reports bearing the date of the current year, thereby preserving continuity in the serial numbers.

105TH ANNUAL GENERAL MEETING.

The Council has agreed to a proposal to hold the 105th Annual General Meeting in Birmingham on April 25th, 1946.

BUREAU OF ABSTRACTS.

The address of the Bureau of Abstracts has been changed from 56 Victoria Street, S.W. 1, to 9/10 Savile Row, London, W. 1. (Telephone No. REGent 2714.)

NATIONAL COMMITTEE FOR CHEMISTRY.

The President and Professor I. M. Heilbron have agreed to serve as the Society's representatives on the National Committee for Chemistry of the Royal Society in place of Professor C. W. Davies and Mr. F. P. Dunn who are due to retire on December 31st, 1945.

ASSOCIATION FRANCAISE POUR L'AVANCEMENT DES SCIENCES.

Professor F. Joliot, an Honorary Fellow of the Society, represented the Society at the Congrès de la Victoire in Paris on October 20th to 26th, 1945.

PRESENTATION TO MR. S. E. CARR.

It has been suggested that many Fellows of the Society would welcome an opportunity of contributing to a presentation to Mr. S. E. Carr on his retirement from the office of General Secretary after forty-two years of service. The Council decided to invite contributions of not more than ten shillings from Fellows and friends. The nature and date of the presentation will be decided at a later date and notified to contributors.

Contributions should be sent, not later than January 31st, 1946, to Dr. D. C. Martin, General Secretary, at Burlington House, W. 1. Fellows desirous of paying through a bank should cross cheques "S. E. Carr Fund."

ACKNOWLEDGMENTS.

The thanks of the Council have been conveyed to Mr. K. H. Wilks for a gift of Publications.

EDITORSHIP.

Dr. J. E. Driver has been appointed Editor as from January 1st, 1946, in place of Professor C. S. Gibson who is kindly serving temporarily as Acting Editor.

ACCOMMODATION OF THE LIBRARY.

For many years past it has been a problem of increasing urgency to find adequate accommodation for the library of the Society. The only completely satisfactory solution would be a removal to new premises with proper housing for the library, but a drastic reconsideration of all possible ways of finding extra space at Burlington House has now led to new steps which will meet the need for shelving space for a few more years. These steps involve serious additional inconvenience to the Office and Library staffs, but will not for the present cause any interference with the Society's meeting room. At the same time the arrangement of the library reading-room has been improved so as to provide accommodation for a number of additional readers.

ELECTION OF NEW FELLOWS.

The following 23 candidates were elected Fellows of the Chemical Society on November 1st, 1945 :

John Dempster.	John Archer Mills.	Irvine Giles Rankin.
Bernard Thomas Donovan.	Philip Edward Lovering.	James Charles Cyril Ransom.
Francis Barnett Dudley.	John Main McGowan.	Albert John Seavell.

MEETINGS OUTSIDE LONDON.**EDINBURGH.**

"The Structure and Chemistry of Metallic Crystals," by Professor G. D. Preston, M.A., F.Inst.P.

A joint meeting of the Chemical Society, the Edinburgh University Chemical Society, Royal Institute of Chemistry and Society of Chemical Industry was held on November 27th at 7 p.m. in the University, with Miss J. L. Rayment in the Chair. In his lecture Professor G. D. Preston referred to the types of crystals in alloys, the Hume-Rothery Rule, and its applications, etc. Mr. Wilson and Mr. McKail participated in the discussion and a hearty vote of thanks proposed by Mr. Winning was carried enthusiastically.

EXETER.

"The Physical Chemistry of Powders and Fine-structured Solids," by Dr. D. H. Bangham, M.C., M.A.

At the meeting held on November 30th the lecturer referred to the great importance of surface forces in practical fields such as adhesion, lubrication, sintering, flotation, and bulk density of fine powders, and pointed to the wide divergence between existing theory and practice. Many of the properties of fine powders such as sintering probably result from the interplay of surface and elastic forces of the particles; the surface forces bring about deformation of the particles at the points of contact—an essentially irreversible effect. Changes of state in the adsorbed films on solids may underlie many of the puzzling effects encountered in the study of adhesion, etc.

LEEDS.

Tilden Lecture, "Substitution," by Professor E. D. Hughes, D.Sc., F.R.I.C.

A meeting of local Fellows was held on November 26th in the Chemistry Department, University of Leeds, Professor F. Challenger being in the Chair. At the conclusion of the lecture Professor Hughes replied to questions put by Professor M. G. Evans and Dr. A. G. Evans. A vote of thanks proposed by Dr. J. W. Baker and seconded by Dr. P. D. Ritchie was carried with acclamation.

MANCHESTER.

A meeting under the Chairmanship of Dr. F. S. Spring for the reading of the following original papers was held on November 16th in the Chemistry Lecture Theatre of Manchester University :

Professor Cook, after dealing with the use of Colchicine in the treatment of gout, its properties as a mitotic poison and its applications in plant breeding, described degradative and synthetic experiments on its chemical structure. A vote of thanks proposed by Professor E. D. Hughes and seconded by Mr. Neville Thomas, was carried with acclamation.

NOTTINGHAM.

"Some Problems in the Chemistry of the Polysaccharides," by Professor E. L. Hirst, D.Sc., F.R.S.

A meeting was held on November 2nd at University College, Professor J. Masson Gulland, D.Sc., F.R.S., being in the Chair. Professor Hirst described the various methods by which the structure of the polysaccharides has been investigated, and discussed, in the light of results obtained by these methods, the structure of cellulose, starch, and the plant gums. After an interesting discussion, Dr. B. D. Shaw thanked Professor Hirst for his lecture.

"Structural Inorganic Chemistry," by Professor W. Wardlaw, D.Sc., F.R.I.C.

A joint meeting with University College Physical and Chemical Society was held on November 29th at University College, Dr. E. B. R. Prideaux occupying the Chair. Professor Wardlaw reviewed the application of physical methods to the elucidation of the structure of inorganic compounds and showed how the results which have been obtained are putting inorganic chemistry on a much more fundamental basis than hitherto. A vote of thanks to Professor Wardlaw, proposed by Dr. D. O. Jordan, was carried with enthusiasm.
