## Hazards in the Chemical Laboratory: 2nd Edition

Edited by G. D. Muir

In the five years since the first edition was published, *Hazards in the Chemical Laboratory* has become established as a vital handbook in all types of laboratory environment. However, over this period many developments have taken place which justify changes in scope and emphasis.

This second edition contains completely new chapters on the Health and Safety at Work etc. Act 1974, Reactive Chemical Hazards, and Chemical Hazards and Toxicology. The authors of the chapters in the original volume have also brought their contributions up-to-date in the light of changing attitudes and legislative changes that are in progress. The section dealing with hazardous chemicals has been greatly expanded so as to provide detailed information on the properties, warning phrases, injunctions, toxic effects, hazardous reactions, first aid treatments, fire hazards and spillage disposal procedures for all common laboratory chemicals, together with short notes on the hazardous properties and reactions of several hundred other less common chemicals.

Protective Plastic Binding 480pp 8½" × 6" £7.00 (C.S. Members £5.25)

## Index of Reviews in Organic Chemistry 1976 Cumulative Issue

Compiled by D. A. Lewis and P. Charnock

Since the first Cumulative Issue of this Index was published in 1971, two further supplements have been published—in 1972 and 1973. Unfortunately, owing to production difficulties, supplements were not published in 1974 or 1975. It has therefore been decided that the best solution is to publish a second Cumulative Issue which cumulates the 1972 and 1973 Supplements and new material up to May 1976.

It contains approximately 8000 references as follows:

1972 Supplement (June 1971—June 1972)

1973 Supplement (July 1972—July 1973)

Articles published in the period August 1973—May 1976

Addendum to the 1971 Cumulative Issue

The scope, organization and format of this volume is the same as that of the previous Cumulative Issue.

Paperbound 304pp 11¼" × 8" £6.50 (C.S. Members £4.50)

Orders to: The Chemical Society, Distribution Centre, Blackhorse Road, Letchworth, Herts SG6 1HN

Reactions, natural products, mechanisms, theory and spectroscopy covered comprehensively in

# The Journal of Organic Chemistry

Recognized by many organic chemists as the leading American journal in the field, this biweekly publication brings subscribers over 1,000 articles, notes and communications each year—over 4,000 pages including original contributions on fundamental researches in all branches of the theory and practice of organic chemistry. Improved procedures, accounts

of novel observations or compounds of special interest are also noted. Complete and mail the coupon NOW to join the thousands of organic chemists who find this journal vital in keeping current in the field.
