

JOURNAL OF THE CHEMICAL SOCIETY

Perkin Transactions II

Physical Organic Chemistry

CONTENTS

- 323 Halogen mobility in S_N2 reactions of carbonyl compounds. Comparisons with aromatic halogen mobility **Joseph Miller and Oi-Ling Ying**
- 329 The electron spin resonance spectrum of γ -irradiated deoxyribonucleic acid: a novel interpretation based on molecular orbital calculations and computer simulations **Antonio Fautitano, Antonio Mele, Armando Buttafava, and Fausta Martinotti**
- 333 A molecular orbital approach to a comprehensive cracking mechanism for linear long chain alkanes in heterogeneous acid catalytic conditions through carbenium ion β -cleavage **Josep Planelles, José Sánchez-Marín, Francisco Tomás, and Avelino Corma**
- 341 Non-enzymatic transamination and β -elimination of DL-S-benzylcysteine catalysed by a potent pyridoxal model **Jun-ichi Kikuchi, Junzo Sunamoto, and Hiroki Kondo**
- 347 Flash photolysis studies of phenyl-substituted phenols, quinones, and corresponding free radicals. Part 4. Kinetics and mechanism of the elementary reaction of oxidation of aliphatic alcohols by aroxyl radicals **Cornelis R. H. I. de Jonge, Igor V. Khudyakov, Sergei L. Krenyov, Vladimir A. Kuzmin, Aleksandr I. Prokof'ev, and Marianne V. Voevodskaya**
- 353 Kinetic study of the base-catalysed reactions of benzaldehyde and thiophene-2-carbaldehyde with acetonitriles **Getano Alberghina, Maria Emanuela Amato, Antonino Corsaro, Salvatore Fisichella, and Giuseppe Scarlata**
- 357 Antitumour imidazotetrazines. Part 5. Crystal and molecular structure of 8-carbamoyl-3-(2-chloroethyl)imidazo[5,1-*d*]-1,2,3,5-tetrazin-4(3*H*)-one (Mitozolomide) **Philip R. Lowe, Carl H. Schwalbe, and Malcolm F. G. Stevens**
- 363 Linear bending in propynyl cation, allene, and propyne systems: do they have flexible structures? An *ab initio* 4 – 31 + G molecular orbital study **Juan Andrés, Reman Cardenas, and Orlando Tapia**
- 367 Hydrolytic cleavage of *p*-nitrophenyl alkanoates in aqueous solutions of cyclodextrins **Gian Maria Bonora, Roberto Fornasier, Paolo Scrimin, and Umberto Tonellato**
- 371 Effects of magnesium(II) ion on hydride transfer reactions from an NADH model compound to *p*-benzoquinone derivatives. The quantitative evaluation based on the reaction mechanism **Shunichi Fukuzumi, Nobuaki Nishizawa, and Toshio Tanaka**
- 379 Reactions of hydroxyl radicals with polymerizable olefins **Richard D. Grant, Ezio Rizzardo, and David H. Solomon**
- 385 An electron spin resonance study of the photolysis of carboxylic acids, neat or in non-polar solvents: regiospecific loss of a hydrogen atom from the α -position **John L. Courtneidge and Alwyn G. Davies**
- 389 Relative reactivity studies for olefin sulphonation with sulphur trioxide in dichloromethane: evidence for concerted [$2_s + 2_s$] cycloaddition **David W. Roberts, Douglas L. Williams, and Donald Bethell**
- 395 Chemical and theoretical studies of tautomerism in meso-aza- and meso-tetra-aza-porphyrins. Crystal structure of 5-aza-13,17-diethyl-2,3,7,8,12,18-hexamethylporphyrinatocobalt(II) **Ajita M. Abeysekera, Ronald Grigg, John F. Malone, Trevor J. King, and John O. Morley**
- 403 Kinetics of the addition of 5-aryltetrazoles to stable substituted benzonitrile oxides **Paolo Beltrame and Gioanna Gelli**

- 409 The photochemical reaction of 1,2-naphthoquinone with hydrogen donors. An explanation of the coupling sites of alkyl and acyl radicals to 1,2-naphthosemiquinone radical **Akio Takuwa, Osamu Soga, and Kazuhiro Maruyama**
- 413 Vitamin B₁₂ model studies. Acrylate migration in the model carbon-skeleton rearrangement leading to α -methylene-glutaric acid **Paul Dowd, Barat K. Trivedi, Moritz Shapiro, and Lalat K. Marwaha**
- 417 A structure–reactivity relationship for the basicity of aza-arenes **Jens Spanget-Larsen**
- 421 Chiral induction in biliverdin covalently bound to amino acids **Ewald Haidl, Daniel Krois, and Harald Lehner**
- 427 On the reaction of 3,5-dimethylpyrazole with acetylenic esters **José Elguero, Antonio de la Hoz, and Carmen Pardo**
- 433 The structure and reactivity of dipyrido[1,2-*a*:1',2'-*d*]pyrazinium cations **Martin R. Bryce, Jeffrey G. Eaves, David Parker, Judith A. K. Howard, and Owen Johnson**
- 437 *N*-Nitroso compounds. Part 3. Hydrolysis of *N,N'*-dimethyl-*N'*-(*p*-nitrophenyl)-*N*-nitrosoarea in aqueous basic solution. Effect of a cationic micelle on the hydrolysis of substituted *N*-nitrosoarea **Kitaro Yoshida, Kazuyuki Yano, and Kazuo Nagamatsu**
- 443 A kinetic electron spin resonance study of ring fission in methyl-substituted cyclobutylmethyl radicals **Bernard Maillard and John C. Walton**
- 451 Crystal structure of acenaphthylene, C₁₂H₈, at 80 K by neutron diffraction **Richard A. Wood, T. Richard Welberry, and A. David Rae**
- 457 Photochemistry of hydroxyalkanones in solution **Maria V. Encinas, Ana M. Rufs, and Eduardo A. Lissi**
- 461 Nucleic acid binding drugs. Part 12. X-Ray crystallographic and conformational studies on the anti-cancer drug *m*-AMSA and its mesyl derivative **Zelda H. L. Abraham, Shirley D. Cutbush, Reiko Kuroda, Stephen Neidle, R. Morrin Acheson, and Grahame N. Taylor**
- 467 The nitrous acid-catalysed nitration of phenol **Usama Al-Obaidi and Roy B. Moodie**
- 473 Modelling ¹³C substituent chemical shifts in 3-aryl-2-cyanoacrylamides. An application of the dual-substituent parameter non-linear resonance (DSP-NLR) method **Sankar P. Bhattacharyya, Asish De, Ajit K. Chakravarty, John S. A. Brunskill, and David F. Ewing**

AUTHOR INDEX

- Abeyskera, Ajita M., 395
Abraham, Zelda H. L., 461
Acheson, R. Morrin, 461
Al-Obaidi, Usama, 467
Alberghina, Getano, 353
Amato, Maria Emanuela, 353
Andrés, Juan, 363
Beltrame, Paolo, 403
Bethell, David, 389
Bhattacharyya, Sankar P., 473
Bonora, Gian Maria, 367
Brunskill, John S. A., 473
Bryce, Martin R., 433
Buttafava, Armando, 329
Cardenas, Reman, 363
Chakravarty, Ajit K., 473
Corma, Avelino, 333
Corsaro, Antonino, 353
Courtneidge, John L., 385
Cutbush, Shirley D., 461
Davies, Alwyn G., 385
De, Asish, 473
de la Hoz, Antonio, 427
de Jonge, Cornelis R. H. I., 347
Dowd, Paul, 413
Eaves, Jeffrey G., 433
Elguero, José, 427
Encinas, Maria V., 457
Ewing, David F., 473
