

Journal of Chemical Research, Issue 7, 1987

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 7, is reproduced below.

- 213 The Synthesis and Attempted Cyclization of Some α -Acyloxy Carbohydrate Epoxides **Keith Jones, John McEvoy, William W. Wood, and Ian L. Scott**
(M 1774)
- 214 Synthesis of Some Substituted Adamantane-2,4-diones **A. K. M. Fazlul Huque, Mohammed Mosihuzzaman, S. Asghari Ahmed, M. Giasuddin Ahmed, and Rolf Andersson**
(M 1701)
- 215 Synthesis of 5-Amino-4-chloro-4,5-dihydroisoxazoles and 4-Chloroisoxazoles **José Barluenga, Miguel Tomas, Luis Angel Lopez, Jesús Jardón, and Vicente Gotor**
(M 1763)
- 216 Polymeric Ketimines of 1,4-Dihydroxyanthraquinone and Diamines and their Metal Complexes **Hans R. Hahnel and Wolfgang Sawodny**
(M 1885)
- 217 Direct Amination. Part 3. Reactions of Indole and 2-Methylindole with Primary Aromatic Amines **Lucedio Greci, Pierluigi Stipa, and Giorgio Tosi**
(M 1967)
- 218 Synthesis of 3β -Rhamnosyloxy- $5\beta,14\beta$ -androstan-14-ol and its 17-Acetoxy and 17-Hydroxy Derivatives **Marek M. Kabat, Alicja Kurek, Marek Masnyk, Kurt R. H. Repke, Werner Schönfeld, Jürgen Weiland, and Jerzy Wicha**
(M 1711)
- 220 Studies on Sugar Nitro-olefins. Part 8. The Steric Course of the Reactions with 3-Aminocrotonic Esters **Rosario Fernández-Fernández, Antonio Gómez-Sánchez, Manuel Rico, and Juana Bellanato**
(M 1728)
- 222 Studies on Sugar Nitro-olefins. Part 9. Reactions of 3,4,5,6,7-Penta-*O*-acetyl-1,2-dideoxy-1-nitrohept-1-enitols with Acyclic 1,3-Dicarbonyl Compounds **Rosario Fernández-Fernández, Jose Galán, and Antonio Gómez-Sánchez**
(M 1748)
- 224 Intramolecular 1,3-Dipolar Cycloadditions. Part 1. A Facile Synthesis of Benzimidazo[1,2-*d*]- and Quinazolino[3,2-*d*]-[1,2,3]-triazolo[1,3-*a*][1,4]benzodiazepines **Ghulam Mohiuddin, Padala Satyanarayana Reddy, (the late) Khalil Ahmed, and Chengalvala Vankata Ratnam**
(M 1839)
- 226 Novel Intramolecular Reductive C—C Coupling during Borohydride Reduction of Dispiro{naphthalene-1,2'(1'*H*)-naphtho[2,1-*b*]pyran-3',1"-naphthalene}-2(1'*H*),2"(1'*H*)-dione and Similar Dispironaphthalenones **Tirumalai R. Kasturi, Poreddy Amruta Reddy, Gowravaram Madhusudhan Reddy, Gonibella J. Raju, Kailasam Venkatesan, Tayur N. Guru Row, Vedavati G. Puranik, and Sudam S. Tavale**
(M 1901)
- 228 Electrochemical Alkylation of Dichlorodiphenyltin **Christian Feasson and Marguerite Devaud**
(M 1869)
- 230 Carbon-13 and Nitrogen-15 Nuclear Magnetic Resonance Study of a Degenerate Rearrangement of a Bicyclic 1,3,2-Oxazonia-phospholane Salt involving Nitrogen Exchange at Tervalent Phosphorus **Jean Paul Picavet and Henri Sliwa**
(M 1953)
- 232 Natural Acetylenes. Part 61. Fungal Polyacetylenes and the Crepenynate Pathway: the Biosynthesis of Some C_9 - C_{14} Polyacetylenes in Fungal Cultures **George C. Barley, Uli Graf, Cathryn A. Higham, Maha Y. Jarrah, Ewart R. H. Jones, Ian O'Neill, Ruiji Tachikawa, Viktor Thaller, John L. Turner, and Anthony Vere Hodge**
(M 1801)
- 234 Natural Acetylenes. Part 62. Fungal Polyacetylenes and the Crepanynate Pathway: Experiments Relevant to the Biogenesis of the Acetylenic Bond **Iain W. Farrell, Cathryn A. Higham, Ewart R. H. Jones, and Viktor Thaller**
- 236 A Novel Synthesis of 4-Phenyl-1,2,3,4-tetrahydroisoquinolin-4-ols with Zerovalent Nickel **Masaru Kihara, Yukio Ishida, and Shigeru Kobayashi**
- 238 The Reaction of Trimethylchloro- and Trimethylbromo-silane-Dimethyl Sulphoxide Reagent Systems on Alkenes. Synthesis of 2-Chloroalkyl and 2-Chlorocycloalkyl Methyl Sulphides **Franco Bellesia, Franco Ghelfi, Ugo M. Pagnoni, and Adriano Pinetti**
- 240 Reaction of *N*-Unsubstituted Azoles with Benzonitrile Oxide: Formation of Oximes of *N*-Benzoyl Azoles **Antonio de la Hoz, Carmen Pardo, and José Elguero**
- 242 Polarographic Study of Aldrithiol-4 (4,4'-Dithiodipyridine) **Juan M. Antelo, Florencio Arce, Maria J. Lopez, Manuel Sastre, and Angel Varela**

N.B. The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.

NEW BOOKS FOR ORGANIC CHEMISTS AND BIOCHEMISTS

Enzyme Mechanisms

Edited by M. Page
Huddersfield Polytechnic

Hardcover approx 560pp
ISBN 0 85186 947 5
Price £95.00 (\$183.00)
RSC Members price £60.00

The mechanisms of enzyme catalysed reactions are now understood at the molecular level. Understanding how enzymes work is the first step towards the successful application of enzymes as catalysts in large scale synthesis both in the laboratory and industry. The design of new drugs as enzyme inhibitors is advanced by a knowledge of the reaction mechanism.

This book has several contributors who are experts in their own field, and each emphasises the important role that mechanisms play in building the bridges between chemistry and the biological sciences.

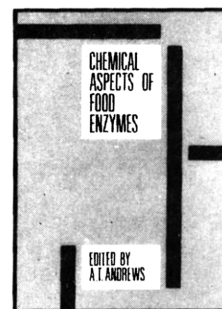

Enzyme Mechanisms discusses the chemistry and mechanisms of enzyme catalysed reactions and is suitable for readers of advanced undergraduate level and above.

Chemical Aspects of Food Enzymes

The use of food enzymes to facilitate an industrial manufacturing process has many attractions compared to purely chemical reaction mechanisms. These include the speed of reaction, the fact that the reactions take place under mild conditions and, most importantly, that they are highly specific, often stereospecific. The mild conditions reduce energy costs and the high specificity minimises the need for downstream processing. There are problems however with enzyme stability, enzyme reactor poisoning and enzyme hygiene. The efficiency of the reaction can be reduced by build-up of product concentration and the adsorption of inactive components such as lipids or other biopolymers.

The manufacture of cheese, beer, bakery products and other fermented produce employs enzymes in their earliest applications. The use of enzymes in a more sophisticated manner can present difficulties with regard to the huge tonnages of materials that need to be processed.

This publication reviews current applications of enzymes in food processes. It should stimulate interest and point the way forward in this area of vital importance.
