

## Journal of Chemical Research, Issue 8, 1987

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 7, is reproduced below.

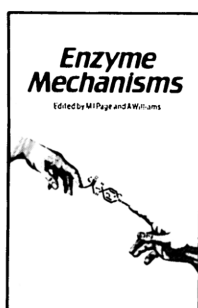

- 245 Nitrile Sulphides. Part 9. Synthesis of 3-Arylisothiazoles  
(M 2051) **Marion C. McKie** and **R. Michael Paton**
- 246 Studies of Swedish Marine Organisms. Part 8. Three Novel Minor Polyhydroxylated Steroidal Glycosides from the Starfish  
(M 2085) *Crossaster papposus* L. **Leif Andersson**, **Lars Bohlin**, **Raffaele Riccio**, and **Luigi Minale**
- 247 The Synthesis of 3-Chloro-4-nitro- and 4-Amino-3-chloro-benzyl Alcohols  
(M 2133) **Nicholas A. Silk** and **Carl N. Martin**
- 248 Organometalloidal Compounds with *o*-Phenylene Substituents. Part 13. Crystal and Molecular Structure of 2,3,7,8-Tetra-  
(M 2001) methoxy-selenanthrene **Christian Schiffling** and **Günter Klar**
- 250 Nitrosolates and Related Compounds. Part 10. Crystal and Molecular Structure of Potassium Aminomethylnitrosolate **Peer**  
(M 2012) **Berges**, **Winfried Hinrichs**, **Carl von Schlabrendorff**, and **Günter Klar**
- 252 Rearrangement of *N,N'*-Diphenylsulphamide: A New Sulphonanilide Product. Amine Exchange in Diphenylsulphamide and  
(M 2037) Sulphonanilides **William J. Spillane**, **Francis A. McHugh**, **Desmond Cunningham**, and **Patrick McArdle**
- 254 Facile Syntheses of Four-, Five-, Six-, and Seven-membered Heterocyclic Compounds by the Reaction of Hydrazines and Thio-  
(M 2067) semicarbazides with  $\alpha$ - and  $\beta$ -Halogenoacyl Halides in a Two-phase System **Tadashi Okawara**, **Rie Kato**, **Naohiko Yasuda**, **Tetsuo Yamasaki**, and **Mitsuru Furukawa**
- 256 Synthesis of [1,2-<sup>13</sup>C<sub>2</sub>]Cadaverine and its Incorporation into Five Quinolizidine Alkaloids **David J. Robins** and **Gary N.**  
(M 2101) **Sheldrake**
- 258 The Synthesis and Chemistry of Azolenines. Part 9. Complete <sup>13</sup>C N.m.r. Assignments for Some 3,5-Diaryl-2*H*-pyrrole-  
(M 2121) 2,2-dicarboxylic Esters, and their 3,4-Dihydro Analogues, and the Influence of Aryl Ring Substituents **Margaret W. L. Chung** and **Michael P. Sammes**
- 260 Crystal and Molecular Structures of Some Triphenylarsonium Acetylides **George Ferguson**, **Ian Gosney**, **Douglas Lloyd**,  
(M 2140) and **Barbara L. Ruhl**
- 262 Total Syntheses of Mono-, Di-, and Tri-propionic Porphyrins for Studies on the Mechanism of Haem-Apoprotein Reconstitution  
(M 2171) **Ravindra K. Pandey**, **Irene N. Rezzano**, and **Kevin M. Smith**
- 264 Triazene Drug Metabolites. Part 5. A Simple Direct Synthesis of 3-Alkoxyethyl- and 3-Alkylthiomethyl-1-aryl-3-alkyltriazenes  
(M 2216) from 1-Aryl-3-hydroxyethyl-3-alkyltriazenes **Jim Iley**, **Eduarda Rosa**, and **Leonor Fernandes**
- 266 The Structure of Perchlororubian  
(M 2201) **Heather J. Cowe**, **Philip J. Cox**, **R. Alan Howie**, and **Ronald H. Thomson**
- 268 An N.m.r. Study on the *E-Z* Isomer Distribution of some *N*-Alkyl thienylmethyleneamines  
(M 2025) **Salim S. Al-Showiman**
- 270 Solvent Effects on the Stereoselectivity of Lithium Aluminium Hydride Reductions of *N*-Substituted 1-Benzoyl-1-phenyl-  
(—) methanimines **Benito Alcaide**, **Carmen López-Mardomingo**, and **Joaquín Plumet**
- 272 Concerning the 'Unusual' Properties of a Solvolytically Generated Simple Silicium Ion  
(—) **Dennis N. Kevill**
- 274 Synthesis of Steroidal 1,5-Benzothiazepine Derivatives  
(—) **Mohammad Mushfiq** and **Nadeem Iqbal**

*N.B.* The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.

# NEW BOOKS FOR ORGANIC CHEMISTS AND BIOCHEMISTS

## Enzyme Mechanisms

Edited by M. Page  
Huddersfield Polytechnic

Hardcover approx 560pp  
ISBN 0 85186 947 5  
Price £95.00 (\$183.00)  
RSC Members price £60.00

The mechanisms of enzyme catalysed reactions are now understood at the molecular level. Understanding how enzymes work is the first step towards the successful application of enzymes as catalysts in large scale synthesis both in the laboratory and industry. The design of new drugs as enzyme inhibitors is advanced by a knowledge of the reaction mechanism.

This book has several contributors who are experts in their own field, and each emphasises the important role that mechanisms play in building the bridges between chemistry and the biological sciences.

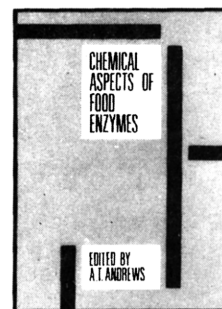

*Enzyme Mechanisms* discusses the chemistry and mechanisms of enzyme catalysed reactions and is suitable for readers of advanced undergraduate level and above.

## Chemical Aspects of Food Enzymes

The use of food enzymes to facilitate an industrial manufacturing process has many attractions compared to purely chemical reaction mechanisms. These include the speed of reaction, the fact that the reactions take place under mild conditions and, most importantly, that they are highly specific, often stereospecific. The mild conditions reduce energy costs and the high specificity minimises the need for downstream processing. There are problems however with enzyme stability, enzyme reactor poisoning and enzyme hygiene. The efficiency of the reaction can be reduced by build-up of product concentration and the adsorption of inactive components such as lipids or other biopolymers.

The manufacture of cheese, beer, bakery products and other fermented produce employs enzymes in their earliest applications. The use of enzymes in a more sophisticated manner can present difficulties with regard to the huge tonnages of materials that need to be processed.

This publication reviews current applications of enzymes in food processes. It should stimulate interest and point the way forward in this area of vital importance.
