

## Journal of Chemical Research, Issue 10, 1989

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 9, is reproduced below.

- 299 A Spectroscopic Study of the Structures of Some 2-Nitrosoanilines  
(M 2357) **Issa M. El Nahhal** and **Graham S. Heaton**
- 300 Reactions of Allene-1,3-dicarboxylic Esters. Part 8. Syntheses of 2-Methoxycarbonylmethylene-2*H*-thiopyran-3-carboxylic Esters  
(M 2301) **Manfred Pulst**, **Dieter Greif**, **Manfred Weissenfels**, **Gurinder J. S. Doad**, and **Feodor Scheinmann**
- 302 Synthesis and X-Ray Structural Analysis of ( $\pm$ )-2,3,4,4a $\alpha$ ,4b $\alpha$ ,5,6,7,8,8a $\alpha$ ,9,9a $\alpha$ -Dodecahydro-1 $\beta$ -methyl-7-oxo-1*H*-fluorene-1 $\alpha$ -  
(M 2313) carboxylic Acid **Pranab Ranjan Kanjilal**, **Ratna Ghosh**, **Priyobroto Roy Chowdhury**, and **Usha Ranjan Ghatak**
- 304 One-step Synthesis of *N*'-(1-Benzylisoquinolin-3-yl)phenylacetamidinium Trifluoromethanesulphonate Derivatives from Phenyl-  
(M 2323) acetonitriles and Trifluoromethanesulphonic Acid **Brian L. Booth** and **Alan Collis**
- 306 The Synthesis and Chemistry of Azolenines. Part 15. The Mechanism of the 3-Acyl-2-hydroxy-3,4-dihydro-2*H*-pyrrole to 1-Acyl-  
(M 2346) 1*H*-pyrrole Rearrangement **Pak-Kan Chiu** and **Michael P. Sammes**
- 308 Selectivity in Cycloadditions. Part 16. Stereochemistry and Cleavage of the Bisadduct of Benzonitrile Oxide with Pyridine  
(M 2364) **Pierluigi Caramella**, **Valerio Bertolasi**, **Saverio Forte**, **Rita De Franco**, **Tiziano Bandiera**, and **Franca Marinone Albini**
- 310 Synthesis and Characterisation of  $\omega$ -*N*-Oxalyl Derivatives of Some L- and D-Diamino Acids **Peter B. Nunn**, **Lynda Z. Partridge**,  
(M 2401) and **Melvyn R. Euerby**
- 311 Structural Elucidations of Flavones using the <sup>1</sup>H N.M.R. Spectral Shifts of the Peracetates  
(M 2416) **Suraj B. Kalidhar**
- 312 Reactions with Dimethyl Carbonate. Part 3. Applications and Mechanism of Mono- or Bis-methylation of Aromatic Amines with  
(M 2434) Dimethyl Carbonate **Manfred Lissel**, **Ali Reza Rohani-Dezfuli**, and **Gabriele Vogt**
- 313 A Short Synthesis of (*E*)-Di-iodoalkenes  
(—) **Gurinder J. S. Doad**, **David J. Austin**, and **Terence C. Owen**
- 314 Sonochemical Hydrodimerization of Aromatic Carbonyl Compounds  
(—) **Asoke Banerji** and **Sandip K. Nayak**
- 316 The Action of Captopril at a Cellular Level  
(—) **John Reglinski**, **W. Ewen Smith**, and **Jill J. F. Belch**
- 318 Correlation of the Rates of Decomposition and Solvolysis-Decomposition of 1-Adamantyl Chloroformate with Solvent *E*<sub>T</sub>(30)  
(—) Values **Dennis N. Kevill** and **Frederick L. Weiti**
- 320 Cleavage of Thioacetals promoted by Copper(II) Sulphate adsorbed on Silica Gel **Gerardo M. Caballero** and **Eduardo G.**  
(—) **Gros**
- 322 Anchimeric Assistance by the Oxiranyl Group: Mild Alkanolysis of an Enol Ether  
(—) **Naresh K. Sangwan**
- 324 Vibrational Study of Ionic Association in Aprotic Solvents. Part 13. Thermal Desolvation of the Lithium Isocyanate Ion Pair in  
(—) Hexamethylphosphoric Triamide **Jean Rannou**, **Didier Legoff**, and **Martial Chabanel**
- 326 Diastereoisomeric Complexes formed in the Reaction of *N*-Monosubstituted Diaziridines with Palladium Dichloride **Pedro**  
(—) **Faria dos Santos Filho** and **Heloise de Oliveira Pastore**

*N.B.* The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.

*Heinz Falk*

# The Chemistry of Linear Oligopyrroles and Bile Pigments

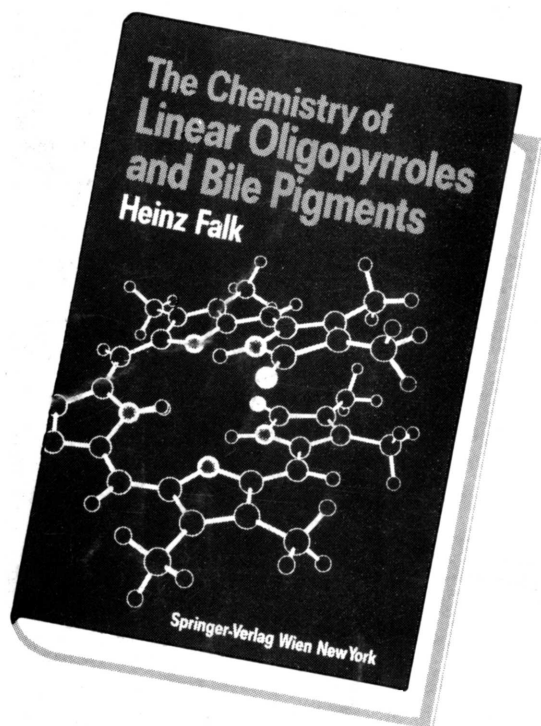

This monograph will be helpful to the specialist or researcher as well as to the newcomer in this interdisciplinary field of linear oligopyrrole chemistry, which ranges from medicinal and biological to physical sciences.

Linear oligopyrroles and bile pigments are important as antenna pigments of photosynthesis, light sensory pigments in plants, and products of animal and human

metabolism. Whereas di-, tri-, penta- and polypyrroles play no part in nature, they are useful as synthons in the synthesis of e.g. porphyrins and corrins, and even as organic conductors.

Discussion of the chemistry of linear oligopyrroles is started with reviews of nomenclature, occurrence, formation, importance, and history. Their structural and stereochemical aspects are illustrated by ball and stick models of X-ray crystallographic determinations as well as by the results obtained by various methods for their state of solution. The synthesis of these compounds is treated in a methodological way providing typical examples instead of listing all syntheses executed so far. Selected physical properties like absorption, emission, chiroptical data, and nuclear magnetic resonance are covered in detail. Nucleophilic, electrophilic, and radical reactions are discussed from the standpoint of semiempirical calculations providing typical examples. Moreover, their photochemistry, carrier mediated transport, skeletal transformations, redox properties, and catalytic function are included.

The book will provide advanced students approaching the subject from a variety of disciplines with the chemical background necessary to cope with the sometimes rather complicated material, but it will also provide the active researcher in this field with a timely review to inspire future work.

1989. 344 figures. XII, 621 pages.
