CONTENTS

- 845 <sup>1</sup>H NMR study of the substituent transmission effects through SO<sub>2</sub> and CO groups in *p,p'*-disubstituted derivatives of phenyl phenacyl sulphones (β-keto sulphones) **Alfons Borchardt, Andrzej Kopkowski, Zdzisław Kornacki, and Andrzej Zakrzewski**
- 849 Studies on the activation pathway of phosphonic acid using acyl chlorides as activators **Jacek Stawinski and Mats Thelin**
- 855 Syntheses and crystal structures of seven alicyclic diols which crystallise with layer structures instead of the helical tubuland inclusion lattice **Stephen C. Hawkins, Marcia L. Scudder, Donald C. Craig, A. David Rae, Razman B. Abdul Raof, Roger Bishop, and Ian G. Dance**
- 871 The tautomeric equilibria of thio analogues of nucleic acid bases. Part 3. Ultraviolet photoelectron spectra of 2-thiouracil and its methyl derivatives **Alan R. Katritzky, Mirosław Szafran, and Geneviève Pfister-Guillouzo**
- 877 Molecular orbital studies of molecular exciplexes. Part 1: AM1 and PM3 calculations of the ammonia-oxygen complex and its solvation by water **Ivan Juranić, Henry S. Rzepa, and MinYan Yi**
- 885 Molecular structures determined by intramolecular attractive steric interactions. Dynamic NMR and molecular mechanics investigation of 1,6-dimethylcyclo-octatetraene **J. Edgar Anderson and Peter A. Kirsch**
- 891 The addition of cyanide ion to *N*-alkyl-3-carbamoylpyridinium ion in hexadecyltrimethylammonium bromide reversed micelles: the effects of alkyl chain length **Ayako Goto and Hiroshi Kishimoto**
- 897 <sup>13</sup>C Chemical shift sensitivity to charge in delocalized carbocations and its relation to ring current anisotropy **Bertil Eliasson, Dan Johnels, Ingmar Sethson, Ulf Edlund, and Klaus Müllen**
- 901 Conformational analysis of some four-carbon 2,2'-bridged biphenyls **Parviz Rashidi-Ranjbar and Jan Sandström**
- 907 Mechanisms of nucleophilic reactions of 4-benzoyl-4-methylcyclohexa-2,5-dienone and its benzoyl substituted derivatives **Lorraine B. Jackson and Anthony J. Waring**
- 915 Menshutkin reactions of aliphatic diamines with methyl iodide in acetonitrile-methanol mixtures. Evaluation of the role of the non-reacting nitrogen atom **Yasuhiko Kondo, Hideyuki Kambe, and Shigekazu Kusabayashi**
- 921 An NMR study of the equilibria involved with benzotriazole, carbonyl compounds, and their adducts **Alan R. Katritzky, Subbu Perumal, and G. Paul Savage**
- 925 Application of coupled oscillator theory to conformational analysis of glycosides with aromatic groups **Masato Kodaka**
- 931 Radical cations and anions from some simple polythiophenes: an ESR investigation **Angelo Alberti, Laura Favaretto, Giancarlo Seconi, and Gian Franco Pedulli**
- 937 Gas phase oxygenation of benzene derivatives at *ca.* 300 K with O(<sup>3</sup>P) atoms produced by microwave discharge of N<sub>2</sub>O. Part 1. Rates and mechanism of phenol formation **Veronica M. Sol, Michiel A. van Drunen, Robert Louw, and Peter Mulder**
- 943 A quantitative molecular-orbital study of the structures and vibrational spectra of the hydrogen-bonded complexes H<sub>2</sub>O·NH<sub>3</sub>, H<sub>2</sub>CO·NH<sub>3</sub>, and (H<sub>2</sub>O)<sub>*n*</sub>, *n* = 2-4 **Henry S. Rzepa and MinYan Yi**
- 953 Exploring the inclusion properties of new clathrate hosts derived from tartaric acid. X-Ray structural characterization of the free ligands and their selective interaction modes with alkylamine guests **Israel Goldberg, Zafra Stein, Edwin Weber, Norbert Dörpinghaus, and Sybille Franken**

- 965 The alkaline stability of (5*Z*)-7-([2*RS*,4*RS*,5*SR*]-4-*o*-hydroxyphenyl-2-trifluoromethyl-1,3-dioxan-5-yl)hept-5-enoic acid, ICI 185282. A remarkable intramolecular hydride transfer from a trifluoromethyl substituted carbon atom **Jethro L. Longridge and Stuart Nicholson**
- 971 Organophosphorus compounds. Part 43. A molecular mechanics study: the structural effect of cyclic esters of phosphorus-based acids in hydrolytic reaction **Xiugao Liao, Shusen Li, and Chengye Yuan**
- 975 Electron spin resonance studies of electron capture processes. Part 7.  $\sigma^*$  (3-electron covalent bond) radical anions of halogenoimidazoles **Martyn C. R. Symons and W. Russell Bowman**
- 981 Photochemistry of substituted cyclic enones. Part 7. Flash photolysis of 3-phenylcyclopent-2-enones and 3-phenylcyclohex-2-enone **John M. Kelly, T. Brian H. McMurry, and D. Neil Work**
- 985 Structural aspects and conformational analysis of 1,1-dichloro-2,2-bis[*p*-(*N,N*-dimethylamino)phenyl]ethane **Amitabha De**
- 989 Epoxidation of alkenes catalysed by Mn<sup>II</sup> (Schiff base) complexes **Dan D. Agarwal, Rajendra P. Bhatnagar, Rajeev Jain, and Savita Srivastava**
- 993 Synthesis and photophysical properties of fluorescent anthracenophanes incorporating two polyoxadioxoalkane chains **Jean Hirschberger, Jean-Pierre Desvergne, Henri Bouas-Laurent, and Pierre Marsau**
- 1001 Determination of the tautomerism of 5,5-disubstituted analogues of 6-amino-2-thiouracil by <sup>1</sup>H and <sup>13</sup>C nuclear magnetic resonance spectroscopy **Bozenna Golankiewicz, Joanna Zeidler, and Mariusz Popenda**
- 1005 Optical resolution of the  $\alpha$ -tocopherol spiro dimer and demonstration of its fluxional nature **Henry M. Fales, Helen A. Lloyd, James A. Ferretti, James V. Silverton, Donald G. Davis, and Hideo Kon**
- 1011 A conformational study of diterpenoid lactones isolated from the Chinese medicinal herb *Andrographis paniculata* **Craig J. Medforth, R. Shihman Chang, Gai-Qing Chen, Marilyn M. Olmstead, and Kevin M. Smith**
- 1017 The excess basicity of alkali metal methoxides in methanol **Alessandro Bagno, Gianfranco Scorrano, and Francois Terrier**
- 1029 Marked effect of the shape of solvent molecules on molecular recognition in the oxidation of associating thiols **Tadashi Endo, Hiromichi Takei, Takashi Isago, Kazuo Guro, Yutaka Nakajima, Jun-ichi Kato, and Masato M. Ito**
- 1035 1,3-Dipolar cycloadditions of cyclic nitrones with trisubstituted alkenes **Sk. Asrof Ali and Mohammed I. M. Wazeer**
- 1041 Electrochemistry of some ethyl  $\alpha$ -bromo(dihalophenyl) acetates and electrochemical synthesis of diastereoisomeric diethyl 2,3-bis(dihalogenophenyl)succinates **Leonardo Mattiello, Carlo De Luca, and Liliana Rampazzo**
- 1045 Kinetics and thermodynamics of the structural transformations of thiamine in aqueous media. Part 5. Interaction of thiamine with SDS micelles **Jean Michel El Hage Chahine**
- 1051 Collisionally activated dissociation of 1-benzylxypyridinium cations **Alan R. Katritzky, Zofia Dega-Szafran, Clifford H. Watson, and John R. Eyler**
- 1059 An isochoric probe of the role of solvent structure in the kinetics of neutral hydrolysis of two 1-acyl-1,2,4-triazoles in aqueous solution **Jan B. F. N. Engberts, Jan V. Haak, Michael J. Blandamer, John Burgess, and Heather J. Cowles**
