

Journal of Chemical Research, Issue 6, 1990

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 6, is reproduced below.

- 169 The Preparation of a Gibberellin 19-20-Lactone
(M 1284) **Carlos Cartenn-Lichterfelde, Carole A. Davis, and James R. Hanson**
- 170 Simple and Condensed β -Lactams. Part 12. An Alternative Entry into the 2-Isocephem and 2-Iso-oxacephem Series **Zoltán Greff, Zoltán Horváth, József Nyitrai, Mária Kajtár-Peredy, and János Brlik**
(M 1201)
- 172 Biphenylenes and Heterocyclic Analogues of Biphenylene. Part 7. Preparation of Hexafluoro-1,8-diazabiphenylene and Comparison of the Site of Nucleophilic Substitution with Frontier Orbital Predictions **David B. Adams, John P. Kilcoyne, J. A. Hugh MacBride, and Max Muir**
(M 1301)
- 174 Analytical Study of Concentrated Chloride Media. Part 1. Solubility and Potential
(M 1334) **Catherine Sella and Denise Bauer**
- 176 Intermolecular Calculations on Azine Dimers
(M 1401) **Francisco Torrens, José Sánchez-Marín and Francisco Tomás**
- 178 Syntheses of Unsymmetrically Substituted Dipyrromethanes bearing a Methane-carbon Substituent: Initial Synthetic Approaches to *meso*-(Methoxycarbonylmethyl)-porphyrins related to Chlorophyll-a **Dennis H. Burns and Kevin M. Smith**
(M 1349)
- 180 Micellar Catalysis in the Oxidation of Cyclohexanol by Chromium(vi)
(M 1259) **Ganesh P. Panigrahi and Susant K. Misra**
- 181 Novel Cleavage of a Bicyclo[2.2.1]hept-2-en-7-one System
(—) **Gordon I. Fray and James C. Petts**
- 182 A Kinetic Study of the Acid-catalysed Decomposition of 3,7-Bis(aryloxy)-1,3,5,7-tetra-azabicyclo[3.3.1]nonanes. Observation of an Iminium Ion Intermediate **Michael R. Crampton, John K. Scranage, and Peter Golding**
(—)
- 184 Metallation-induced Rearrangement of Diaryl Phenylphosphonates to Bis(2-hydroxyaryl)phenylphosphine Oxides **Balram Dhawan and Derek Redmore**
(—)
- 186 Novel Pyrido[1,2-*b*][1,2,4]triazines from 1,6-Diaminopyridines **Krum Davidkov Atanasov, Pilar Lafuente, Margarita Quinteiro, Carlos Seoane, and José L. Soto**
- 188 The Chlorination of Ketones with Manganese(IV) Chloride
(—) **Franco Bellesia, Franco Ghelfi, Ugo M. Pagnoni, and Adriano Pinetti**
- 190 Sodium Amalgam in Liquid Ammonia: a Novel and Selective Reagent for the Dehalogenation of Aryl Halides **Eduardo Austin, Rubén A. Alonso, and Roberto A. Rossi**
(—)
- 192 Magnesium-Iodine-Diethyl Ether: An Efficient System for the Deoxygenation of Oxiranes to Olefins
(—) **Pritish K. Chowdhury**
- 194 Stereoselectivity in the Addition of Bromine to 3,3'-Spirobinaphtho[2,1-*b*]pyran **Francis M. Dean, Lalit Prakash, Suraj S. Verma, and Ramji L. Mital**
(—)

N.B. The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.

Dynamic Properties of Biomolecular Assemblies

Edited by S.E. Harding, *University of Nottingham* and A.J. Rowe, *University of Leicester*.

In this important new book the authors have sought to cover recent advances in a range of techniques that can be regarded as 'Dynamic' (Hydrodynamics, NMR, Dynamic Light Scattering, Fluorescence Anisotropy Decay and Electro-Optics), and their application to specific assemblies of biological macromolecules: assemblies involving proteins, nucleic acids and glycoconjugates. Some important advances in the capture and analysis of data (in many cases of the notoriously difficult 'multi-exponential' type) are identified. In vivo, assemblies of biological macromolecules do not always exist in a dilute solution environment – normally far from it – and some attention is paid to the dynamic properties of more concentrated dispersions.

Biochemical Approaches to Cellular Calcium

Methodological Surveys in Biochemistry and Analysis Volume 19(B)

Edited by Eric Reid, *Guildford Academic Associates*, G.M.W. Cook, *University of Cambridge* and J.P. Luzio, *University of Cambridge*.

Methodological Surveys in Biochemistry and Analysis is divided into two sub-series, A: Analysis and B: Biochemistry, which are published alternately. A: Focuses on determining drugs in body fluids, the study of trace organics, and subtle chromatography. B: Focuses on cellular aspects of biochemistry, with different themes relevant to biochemical pharmacology including endocrinology, pathology and muscle function. Each book is an integrated compendium of edited articles, with authoritative international authorship. All volumes contain a thorough subject index and sub-series A has an analyte index too.

Biotransformations

A Survey of the Biotransformations of Drugs and Chemicals in Animals

Edited by David R. Hawkins *Huntingdon Research Centre*

The series has been devised to provide an up-to-date survey of the literature on the biotransformation of pharmaceuticals, pesticides, food additives, and environmental and industrial chemicals in animals. The objective is to provide a comprehensive data base which will allow an increased awareness of patterns in species differences and the influence of chemical structure on biotransformation pathways.

The material has been collated into chemical classes but an additional feature is the definition and allocation of key functional groups for each compound. The functional groups selected are those commonly associated with biotransformation. Indexing these functional groups provides ready access to reports on compounds containing common structural features. An additional index of biotransformation processes and compound names further increases the accessibility of relevant information.

Calixarenes

Series: Monographs in Supramolecular Chemistry

By C. David Gutsche, *Washington University, St. Louis, USA*.

Description and Contents

Calixarenes is the first book to be published in the new 'Monographs in Supramolecular Chemistry' series and is also the first complete survey available of this rapidly developing field. It provides a fascinating and lively account of the history, development and applications of calixarenes, which are probably the world's most readily available synthetic molecular baskets. These basket-shaped compounds possess the ability to hold metal ions, as well as molecules, in their interior and as a result of their extraordinarily easy synthesis from phenols and aldehydes are receiving increasingly wide attention.
