

Additions and Corrections

Preparation and Crystal Structures of *trans*-[Fe(NCMe)₂(Ph₂PCH₂PPh₂)₂][FeI₄]·2H₂O and [Fe{Ph₂P(O)CH₂P(O)Ph₂}₃][I₃]₂

(1993, 69)

J. Elaine Barclay, David J. Evans, David L. Hughes and G. Jeffery Leigh

Page 70. Right-hand side, penultimate line. The sentence beginning 'The only structurally characterised iron(II) diphosphine dioxide complex . . .' should read 'The only structurally characterised iron diphosphine dioxide complex . . .'

The authors would also like to point out that [Fe{Ph₂P(O)CH₂P(O)Ph₂}₃]₂I₂ and [Fe{Ph₂P(O)CH₂P(O)Ph₂}₃][ClO₄]₃ have been described in some detail (T. S. Lobana, H. S. Cheema and S. S. Sandha, *Polyhedron*, 1985, **4**, 717; *Transition Met. Chem.*, 1984, **9**, 330), though not characterised by X-ray structure analysis.
