Need chemical property data? Don't look it up—

Call it up—on your computer, through STN International®

Use your personal computer to find data on millions of organic and inorganic chemicals—all in one place. STN International has many chemical and physical property databases to support your research. In just minutes you'll find actual values for

- physical properties
- thermal/thermodynamic properties
- electrical properties
- magnetic properties
- optical properties

plus toxicity, health and safety, and spectral information.

Data come from familiar and trusted sources: AIChE, Beilstein Institute, CRC Press, Gmelin Institute, National Institute of Standards and Technology, and National Library of Medicine. Search the databases individually or collectively; you need not be an information expert—our NUMERIGUIDE® and CAS REGISTRY files will lead you to the right terminology and the right databases to search.

Property searching on STN—an efficient complement to your printed handbooks, floppy disks, and in-house files.
