

Computers in Classrooms: Teaching the Teachers

Three big markets for personal computers will exist in years to come: small businesses, homes, schools. Educating the educators is something we can all get involved in.

Photo 1. A large computer installation.

(Courtesy of IBM)

Today there is no reason why every elementary and secondary school should not have computers. Their potential uses are obvious and their cost is remarkably low. But widespread use of computers in classrooms will come only when teachers realize their value. This article discusses the possible uses of computers in classrooms, and describes workshops my associates and I have held for local teachers. My aims, here, are to present the criteria for these workshops, discuss the problems that we faced in organizing them, describe what we learned from our experiences and encourage others to help in this task of "educating the educators."

Facing the Problem

Any reader of this magazine is certainly aware that computers will soon be as much a part of daily life as typewriters, refrigerators, automobiles and television sets. Such everyday items surely must be part of classroom education at all levels. Students must grow up with the computer much as they grow up with the other

products of our culture.

But the computer is not only a new household item, it is also a versatile tool that can aid in education. Computers can handle routine tasks such as grading and record keeping; help in generating class materials and providing self-paced review; and even supply simulated experiences ranging from simple games to complex system tasks. The possible uses of computers in education are unlimited. Now the sharp reduction in the cost of computers has made many of these uses economically feasible.

One obvious problem is that few teachers have the background required to take advantage of computers. Even science and mathematics teachers have seldom had more than a cursory (and often outdated) introduction to computers. These introductions typically treat the computer as a high-powered calculator, capable only of solving mathematical problems. Most teachers share such common public myths as:

1. Computers are intelligent and answer all questions posed

Photo 2. The Electronic Product Associates Micro-68 (exploded view shows components). (Courtesy of Electronic Product Associates)

to them (presumably in an eerie metallic voice).

2. People who work with computers must be wizards or mathematical geniuses. Computers remain remote and mysterious to the "man on the street."

3. Computers are depersonalizing, unimaginative and insensitive. Furthermore, they will eventually take over everything.

4. Computers are always right, or at least think they are. Somehow, though, they can always be outsmarted by a few extraordinary (or even ordinary) people.

5. Computers are large, very expensive and very complex. Average people can only look at an installation like that shown in Photo 1 from behind closed doors.

Even teachers who have some computer background are often unfamiliar with the new, low-cost microcomputers. Since teachers are already expected to be expert in sociology, anthropology, psychology, ecology, health and other subjects, this lack of familiarity can hardly be surprising.

On the other hand, most computer specialists (like myself) are unfamiliar with the problems of elementary and secondary teachers. Their needs and requirements are different from those of teachers at the college level. Elementary and secondary teachers need

solutions to their problems, not just new tools that are difficult to use or understand and will simply clutter the classroom.

The Role of Computer Clubs

The personal-computer movement has some unique characteristics that can be used to solve this educational problem.

- Many personal-computer enthusiasts are newcomers to computing. They can therefore help alleviate fears that only experts can understand computers. Many computer-club members are themselves teachers.

- Personal-computing stores, magazines, conferences and clubs cater to the novice. They provide information at a variety of levels. Furthermore, other hobbyists are often willing to help novices.

- Personal computers are not financially out of reach for most schools. Complete units can be priced as low as \$600, a cost comparable to that of a typewriter or television set.

- Personal computers are designed to be used by non-experts. Their size, appearance and operating methods make them far less forbidding than larger computers and far easier to explain.

Planning a Workshop

The potential for personal computers in the classroom is there but how do you translate

it into reality? The rest of this article will deal with our experiences in offering personal-computer workshops to teachers. I hope you'll get some idea of approaches to take and pitfalls to avoid.

The original idea grew out of a microprocessor course I offer at Grossmont College. Although the course is primarily intended for engineers and technicians, many hobbyists also take it. Among my students was Dr. Russ Cassel, a well-known specialist in computer-aided instruction who is presently retired from the U.S. Air Force and from a professorship at the University of Wisconsin, Milwaukee. It was Russ who suggested we hold a workshop for teachers.

Since I am interested in continuing education and have given some workshops for engineers, I decided that the idea was worth pursuing. Our group finally decided on the following guidelines:

1. We would not assume that attendees had any previous background in computers.

2. We would emphasize the current state of the art in low-cost computers.

3. We would try to emphasize that you didn't have to be either an expert or a mathematical genius to use a computer. One approach would be to have

local teachers and other non-experts explain how they were using computers.

4. We would try to give all participants some hands-on micro-computer experience.

5. We would hold all-day Saturday workshops at no charge.

Our net assets when we started were:

1. Cooperation from Grossmont College, which provided a room, reproduction of materials and some secretarial help. This was largely arranged by Dr. David Lien.

2. Cooperation from a local microcomputer manufacturer, Electronic Product Associates. This manufacturer agreed to supply us with some Micro-68s for the hands-on experience. The EPA Micro-68 is a Motorola 6800-based microcomputer that has a hexadecimal keyboard and display (see Photo 2), and can therefore be used without a terminal. It is also available in more elaborate configurations (see Photo 3) with various peripherals.

3. Help from some local computer enthusiasts, including present and former teachers.

Finding Willing Victims

What we lacked (besides good sense) were teachers (i.e., guinea pigs for this experiment). The obvious place to start was at nearby high

Photo 3. The Electronic Product Associates Micro-68b, a larger version of the original Micro-68. A printer, TV interface, cassette interface and floppy-disk system are available with this computer. (Courtesy of Electronic Product Associates)

WHAT'SIT™

A "DATA BASE MANAGER" FOR YOUR MICROCOMPUTER

Much of the untapped potential of computers lies in their ability to store "data bases" of constantly changing information, and to permit convenient, timely access to it through a one-to-one "conversation" with the person who needs it. Used as a "Data Base Manager," WHAT'SIT can support a disc-resident data base and process queries (as well as updates) in a real-time conversational mode.

APPLICATIONS

Easily implemented on a small desktop computer with as little as 24K of total memory, the WHAT'SIT system can be used in applications like these:

- A salesperson may need to store customer and prospect lists, buyers' names and phone numbers, current order status.
- A professional person may need to index client records, appointment schedules, or technical data needed for frequent reference.
- A contractor might want quick access to material prices and specifications.
- A manufacturer's data base might include customers and suppliers, and recent price quotations issued and received.
- An investor might want to keep tabs on a portfolio of securities, with purchase dates and tax basis information.

OPERATING SIMPLICITY

In response to pidgin English "Requests," WHAT'SIT can store, index, and retrieve information about one or several aspects of your business, hobby, or other application. You are free to intermix unrelated data on a single disc, or to "dedicate" an individual disc to each of a variety of applications.

Since file indexing and disc space allocation are performed automatically, the system can be used without learning complex procedures. And since both queries and updates are processed within a single program, there's no need for the inconvenience and delay of a "menu selector," or for manually switching from one program to another.

In contrast to many programs, WHAT'SIT does not require you to commit yourself in advance to particular data structures, or "record formats." The file structure is never frozen, but develops automatically to adapt to your requirements.

DYNAMIC FILE RESTRUCTURING

This "dynamic restructuring" of the data base takes place through normal use of the system, without operator intervention or reprogramming.

This is how it works: Whatever information you wish to store is automatically cross-indexed under "Subject" and "Tag" headings you designate. Using WHAT'SIT's pidgin English Requests, you may add or change headings, as well as data, at any time. Because the system maintains headings in disc storage, they may be changed readily by the program itself!

CONVERSATIONAL QUERY CAPABILITY

Data retrieval is equally easy. You can query the system directly about any data item on file, or you

may inquire about any heading. All that's required is a pidgin English "Request," such as "WHEN'S DR. JEKYLL'S APPOINTMENT?" System response time is usually a matter of seconds.

Up to two headings may be specified in a single Request, a capability that makes possible versatile cross-indexing within the data base.

INSTALLATION

For easy installation, the WHAT'SIT programs are supplied in the widely available North Star BASIC, and can be installed without modification on any 5-100 bus (8080 or Z-80) computer equipped with a North Star disc system and at least 24K bytes of random access memory (RAM). For other disc systems or non-compatible computers, the programs would require modification.

SPECIFICATIONS

MODEL NS-3, Version 1

Hardware compatibility: Any 5-100 Bus (8080 or Z-80) computer with one North Star disc system and 24K of RAM (random access memory).

Language: North Star BASIC, Version 6 Release 3. Request types: Store, Scratch, Change, Add, Spill (6 types including Indexed, Selective, and Analog), plus special Requests.

Response time: Normally 3 to 10 seconds.

File capacity: 1500 to 3000 entries per disc, depending on average entry length.

Indexing: Every entry automatically indexed by Subject, Tag, Object.

Request length: Up to 100 characters.

Entry length: Up to 30 characters.

WHAT'SIT is available for \$75.00 as a Ready-to-Run System, including three programs on Northstar disc and a 100-page user's manual written in non-technical language. The manual may be optionally ordered for \$25.00. Besides detailed startup and operating instructions, the manual includes complete program listings in BASIC.

schools; so we started to wade through the various bureaucratic levels. Surprise—the people at the first school we contacted were positive and enthusiastic. They had been using a time-sharing system and were anxious to learn about micros. This response was, of course, encouraging, and it turned out to be the only encouragement we would receive from any school.

The general response was: "What are you trying to sell?" "The person who handles computers is on vacation." "We're busy right now with exams, parent-teacher meetings, law enforcement, football, etc., but do call us back (preferably when we're out)." "I'll route the matter to our mathematics coordinator; he (or she, or it) will get back to you. But don't hold your breath."

The lesson here is that you'll need some patience (and some aspirin). Teachers are not lining up, waiting to find out about computers. You have to reach them and sell them on the idea; and that takes time and effort. A few notices or a few telephone calls will not do the job.

Fortunately, we wanted to start small and we had no illusions about a huge crowd. (Remember that we wanted to include hands-on experience.) In fact, our initial group was fifteen, padded by two deans from Grossmont College and a

few ringers from the local computer club.

The Initial Program

The program consisted of two talks: one by me and another by Dr. Melvin Zeddies of United States International University. Mine, "An Introduction to Computers," described what a computer was, what made up a working system, what was presently available and how much it cost, what the future trends might be, where you could get more information, and how you might want to use a computer in the classroom. Copies of the slides are available from me for anyone who is interested.

Dr. Zeddies talked about his experiences in building several small computers for use in a high-school program for gifted students, covering such matters as how to obtain funding, build and maintain the computers, write programs, and provide some continuity in computer operations.

In addition, three local computer enthusiasts—Gary Mitchell, Laura Thomas and Carl Palechek—described their experiences with personal computers. The program was rounded out by a laboratory session which involved writing and executing several short machine-language programs.

In general, our participants found the workshop interesting

Apple II™

the personal computer.

- Smaller
- Games with Paddles & Sound
- Faster
- Color Graphics
- Easier to Use
- Ruggedly Engineered
- More Powerful
- Unbreakable Plastic Case

Not a Kit! Comes complete, ready to hook up to your Color T.V. and begin writing your own programs the very first evening. Apple II uses BASIC, the English-like programming language and has a familiar typewriter-like keyboard. Built to withstand child usage.

Apple II is a complete, self-contained, ready to use computer. Standard features include BASIC and Monitor in ROM (8K bytes), Color Graphics, up to 48K bytes RAM (4K included), cassette interface, Apple GAME I/O connector, typewriter-style ASCII keyboard, high-efficiency switching power supply and plastic molded case. Also included as standard are: 1 demonstration cassette tape, two game paddle controllers and detailed operations manual.

Come in and try it for yourself. You'll love it!

but had some reservations. Our real problem was that the EPA Micro-68 computers were not the type that would be useful at the elementary or secondary levels. These computers are really intended as digital trainers or prototyping systems for engineering applications. Several teachers suggested that they were interested in complete systems with adequate peripherals that could be programmed in a high-level language (preferably BASIC).

Furthermore, we had to show the teachers that personal computers could be a useful classroom tool. Several teachers said they needed to see things that they could use immediately, rather than just hear suggestions. We had to sit down and really think about how to sell teachers on utilizing computers.

The participants generally did not want to assemble kits, attach peripherals or maintain their own computers. They had neither the facilities nor the time for that approach. The only attraction of kits was that they could be purchased as instructional supplies rather than as capital equipment. Most school districts (like many companies and government agencies) have elaborate procedures for purchasing computers. Although these procedures make little sense now that computers are so inexpensive, they will remain an obstacle to computer purchases for many years.

Some Further Efforts

Since that first effort, we have held two more workshops. We now have cooperation from Computer Power and Light, a manufacturer of complete microcomputer systems that include a keyboard, monitor and audio cassettes (see Photo 4). These systems come assembled, and can be programmed in BASIC. The manufacturer provides local maintenance and some software. We are now trying to emphasize the use of computers to aid in remedial education (they have infinite patience), to provide simulated

experience and to help teachers perform routine tasks.

The problem of reaching our potential audience remains a serious one. Clearly a small volunteer group cannot put a massive, continuous effort into publicity, personal contacts and telephone reminders. We are now trying to work through the San Diego County Department of Education and we're hoping the department can handle the difficult task of reaching that audience.

Overall, I think this experience has been useful, even though it is little more than a beginning. In fact, I may have learned more than the teachers since I have become acquainted with school administrations, financing methods, district policies and school problems. I have had an opportunity to see Bob Albrecht in action (he's fabulous), and to meet a large number of concerned educators.

Some Suggestions

Teacher education presents a real opportunity for local computer clubs and enthusiasts. I suggest the following guidelines.

1. Work through your local school district or county department of education. Otherwise the problem of publicity is enormous.

2. Explain computers from the beginning. Don't assume teachers have any background, particularly familiarity with the personal-computer movement. Remember that S-100 bus, Altair, Imsai, floppy disk, RAM, ROM and other such terms are not common knowledge.

3. Emphasize how teachers can use computers to help with everyday classroom tasks. Try to bring in local teachers who have actual experience with small computers.

4. Don't hesitate to include some games and other attention-grabbers—teachers are almost human, after all. Include some useful programs as well.

5. Include some organized hands-on experience, preferably involving programming low-cost computers in BASIC.

Plus \$3.00 handling charge. California residents add 6 1/2% sales tax.

Actual experience is the only way to overcome the fear of computers so many people feel.

6. Discuss sources of additional information and equipment. These sources include computer clubs, stores and magazines. *Calculators/Computers* magazine is a new journal that deals specifically with educational applications. (I will gladly provide a list of selected books and magazines.)

7. Emphasize complete systems that do not require a high level of expertise to build, use or maintain. Explain some of the pitfalls, but don't make the road seem too hard to travel.

8. Be sure to note that we

don't have all the answers yet. The entire personal-computer business is only a few years old, and most of the exciting developments are still ahead of us.

9. Try to get actual systems into schools, even if just for an afternoon. In-school demonstrations help create publicity and encourage students and teachers.

Acknowledgements

I am glad to be able to thank the following people for their invaluable assistance:

Dr. Russ Cassel, whose energy and enthusiasm should be a guide for all of us.

Dr. Melvin Zeddies, a first-

class speaker and educator.

Dr. Jane Gawronski of the San Diego County Department of Education.

Dr. David Lien, Mr. Leslie Phillips and Ms. Margie McMurray of Grossmont College.

Mr. Victor Wintriss and Ms. Patti Neumann of Electronic Product Associates.

Mr. Michael Scholnick, Ms. Dianne Simpson and Mr. Ian Law of Computer Power and Light.

Mr. Wirt Atmar of Ai Cybernetic Systems, for providing a cassette describing Cybernetic's speech synthesizer.

Also—Carl Palechek, Ed Nagy, Gary Mitchell, Laura Thomas, Irv Stafford, Peter Young, Robert King, Lewis

Freud, and many others. John Craig of *Kilobaud* has been a constant source of encouragement. ■

In-Circuit IC Tester

- Allows simple, fast, inexpensive in-circuit testing of most 7400 series ICs, using the well known XOR technique.
- Can monitor an IC for hours and detect an error occurring only once!
- Draws its current (typically 150 mA) from the power supply of the IC under test.
- A known good IC of the same type* is inserted into the socket on the tester, the two eight pos. DIP switches are set as required, and the test clip is placed on the IC to be tested. The tester then monitors all data lines until an error is found.
- Can test any DIP IC meeting the following requirements:
 - + If IC is storage type (latch, counter, etc.) reset or load must be active. (i.e. IC under test and known good IC must start at same state)
 - + If 16 pin: Vcc on pin 16, Gnd on pin 8
 - + If 14 pin: Vcc on pin 14, Gnd on pin 7

MODEL IC77 Kit price \$32 Includes all parts, printed circuit board and pre-wired test clip. *not incl.

PUBLISHER'S REMARKS

(from page 7)

the case: "... the plastic is not strong enough to keep the fasteners in place. After I opened the top a few times both fasteners broke loose." He also found trouble with the cover uprooting the keyboard when he removed it. He particularly had trouble with the color TV monitor and discussed that at great length... including a severe problem he had with radio frequency hash from the computer. He stressed this a couple of times and then went on to gripe that there were no peripherals available for the Apple bus.

He didn't like the game paddles supplied, so a great deal of the article was devoted to his making his own joystick, an engineering triumph of which he seemed extraordinarily proud. He left me with the strong impression that before I could do much with the Apple I would have to duplicate his chore of buying all the parts and building my own joystick. I would then have to dig into the Apple and wire my new control

Byte editor Helmers.

system directly into the computer before I could use it. This would obviously ruin the portability of the unit and I doubt if I could get the bottom cover back on. Phooey.

Helmers didn't like the BASIC supplied. "But the 5K BASIC, even given its string capabilities, is not what one would want to use... The people at Apple have hacked the (BASIC) interpreter... had to sacrifice two statements: LET and REM." This in order to have graphics. He beefed about the lack of the high-resolution software package...

called the applications software "a mixed bag"... didn't like the loose-leaf documentation and the lack of tutorial on how the computer works... and found the documentation "scanty" on the BASIC interpreter.

Absent from the review was any objectivity or discussion of the benefits of the system to the beginning computerist. He said nothing about where one could get applications software for the system... how easy it is to use and to learn... how many people are able to sit down and learn

the fundamentals of microcomputing in a few hours with the Apple, etc. Obviously he had no interest in the tremendous enthusiasm of the Apple owners... any one of whom could have done a far superior job of reviewing the system.

Computer Portraits: Up and Coming

Most of use have run into

Apple controller.

NORTH STAR

DISK ASSEMBLER and DISK EDITOR

Both programs read and write disk files; file size not limited by memory. Assembler will assemble up to ten source files at a time; permits modular programming with programs easily relocated by reassembling at the desired address. Editor does not use line numbers; it searches for strings. Lines may be inserted, deleted and displayed. Large disk source files allow programs to be fully commented.

See us at the NCC Personal Computing Fair, June 5-8, 1978, in Anaheim, Calif.

computer-portrait outfits at shows, shopping centers, fairs, vacation spots, etc. It turns out, according to a release from Centronics (which we'll be publishing) that there are fortunes to be made with these systems.

One of the exhibits at the San Jose show was a portrait system by Micro Works, a new outfit in Del Mar (California, of course). Their price for a complete system was ridiculously low . . . around a quarter that of one of the lowest-priced commercial systems. While the cost of the equipment needed to make \$100,000 in sales (mostly profits) over a six-week period is not relevant if it's under \$50,000 . . . not many locations will produce that amount of dollars . . . so a few bucks saved is a few bucks earned.

Since many computer hobbyists are not totally opposed to making money with their systems, we'd like to have some articles on commercial applications of microcomputers . . . such as for computer portraits.

First European Microcomputer

The European agents for *Kilobaud* have forwarded informa-

tion on NASCOM 1, a micro-computer kit selling for 980 DM (from an address in Trier, W. Germany). The system uses a Z-80 chip and has its own bus structure, which the literature doesn't divulge. They do have a NASCOM to S-100 bus interface board available, so any of the hundreds of S-100 boards can be used with the system. They also have a Kansas City cassette interface available.

The kit includes a full alphanumeric keyboard and character generator. It requires a TV set for video display and a separate power supply (another 130 DM). It appears to have 4K of memory and includes a small operating system (NASBUG) in ROM and its own cassette system, not com-

patible with any other known system (as usual).

My plans are to be in Europe in May, and I hope to have a fuller report on NASCOM after the May show in Paris. Trier is quite near the Luxembourg border, and is not that far from Paris. It is a beautiful old city, with many Roman ruins . . . such as the remains of extensive outdoor baths, and a coliseum for Roman games. I won't have a chance to get up there to see the NASCOM distributor; however, perhaps I will have a chance to visit the factory in the UK on the way to Paris.

Buying Mail Order

There are several firms that are not permitted to advertise in *Kilobaud* because we have had so many complaints about them. But, outside of checking the ads in *Kilobaud*, how can you protect yourself against rip-offs? Not that an ad in *Kilobaud* is positive proof of anything because we get taken in too . . . and of course there are still some credible advertisers who are not running ads in *Kilobaud* for reasons of their own . . . odd as this may seem.

To get your best shot at not getting a bad deal, I suggest the following procedure. This has to do with firms about which you may have a question . . . not steady advertisers in *Kilobaud* such as S.D. Sales, Godbout, etc. Before you plunk a big bunch of money in an envelope, take some precautions.

1. Write a letter to the firm asking for a confirmation of prices and a definite commitment on delivery within two weeks of your order. Keep a copy of this letter in your files.

2. If they do promise delivery within two weeks, it is time to place your order. If they say no, it is time to hold off until they get their act in shape. If you are going to order, send them a certified check or money order for the amount, or the order and a letter explaining exactly what you are ordering, giving every possible detail. State clearly that shipment is to be made within two weeks or else your check is to be returned. Send this letter by certified mail, with a return receipt. This costs a dollar and may be worth it. If you are not extremely clear in your order it could delay things while the firm writes to find out what baud rate you need, etc. Keep a

INNOVEX FLOPPY DISK DRIVE NEW-FULL SIZE \$495 or LESS*

From The Same People Who Brought You The First Diskette and Drive

TO DESIGN YOUR OWN CUSTOM SUB-SYSTEM FOR LESS:

- (1) BUY THE INNOVEX MODEL 410 OR 420 FROM THE MANUFACTURER AT THE OEM VOLUME PRICE OF \$495.

A DIVISION OF
SD SALES COMPANY

couple of copies of the order and check.

3. If you have heard nothing in a month it is time to get into action. Write a letter asking for the return of your money. Send a copy of your order to the firm and point out their promise of delivery within two weeks. Tell them that unless they respond immediately you will take the matter to the mail-order-fraud department of the post office, to your attorney general, and to the Better Business Bureau in his town. Keep a copy of this letter . . . and send me a copy.

4. If you hear nothing further within ten days, it is time to write to the post office, the attorney general, Better Business, and anyone else you can think of who might be interested. By all means, send a copy of the correspondence to me. I don't want to run ads from firms like this . . . and I just might be able to help you get your refund.

Book Manuscripts Wanted

The *Kilobaud* book department has been expanded recently and several books are in the works; more are needed . . . if you are looking for fame and fortune.

A publisher has two major functions, and *Kilobaud* is uniquely suited to both of these. First comes the printing of the book, which can be an expensive proposition. In our case, we edit the manuscript, do the drafting of any schematics, set the type, do needed photography, proof-read the type, lay out the pages, put the type, photos and draftings together on the page, shoot the negatives, make the printing plates, buy the paper, print the book, bind it and ship it. Everything is done right at *Kilobaud*! Few publishers have such a complete setup . . . or one nearly as efficient.

The second function is advertising and distributing the book. Again we have everything, including a magazine to help with the advertising. Our marketing staff prepares promotions for computer stores, bookstores, radio stores, etc. Our sales staff is in touch with all possible book outlets. With over a dozen books now being distributed, we know the market well.

What kind of books are needed? Microcomputer-fundamental books are still selling well, despite the large number of them out there. Books of programs for

microcomputer-users are exceedingly popular. Books on programming sell well. Heck, almost any book on computing sells. What are you waiting for? Wouldn't you like to see your name on a book cover?

If you have a book in the works you can do worse than get in touch with our book department and see if you have something viable. It sure is nice when those royalty checks come in.

Good News and Bad News

Perhaps you've noticed that prices on everything have been inching up. As long as we are all so enthusiastic about supporting an ever-growing government, one that has a strong vested interest in spending, not saving, inflation is going to be a fact of life. You've probably read about the recent postal hike and you may know about the next one that's coming. I sense that something has changed in postal rates for maga-

zines when I have to pay 72¢ a copy to mail an issue of *Kilobaud* and remember when I paid 5¢ each to mail *73 Magazine*.

The excuses include more than postage. Paper has doubled in price in recent months, with the grades of paper we used to use being phased out and forcing us to use what the paper mills are making . . . paper so thin it is getting difficult to turn a page without skipping one or two and hardly noticing it. Printers, needing bigger Rolls Royces and yachts, have upped their take . . . and so it goes.

The bottom line is an increase in *Kilobaud's* one-year subscription to \$18. Since about half of our subscribers opt for a three-year subscription for \$36, and we are not increasing this price, the net to us will be about 11 percent. This will put us back where we were when *Kilobaud* started.

With a very high percentage of the renewals coming through for three years, it will be the newcomers to the magazine who will foot the inflation on the one-year rate.

EDITOR'S REMARKS

(from page 7)

or give me a call for reservations and booth costs.

John Craig, RFD Box 100 D, Lompoc CA 93436, (805) 735-1023.

Article Submission

Hey, if you're going to write an article *don't* send it to more than one magazine at a time, OK? That isn't the way the game is played. I don't think any of us likes to be put in a position of "bidding" on a piece of material (and I won't), but even worse than that are the possible messes that can occur.

My most recent experience involving dual submissions resulted

from a record-keeping error on the author's part. It turned out he had submitted the article to another magazine, forgot about it and then sent it to *Kilobaud*. It initially blew my mind when I saw an article that I'd already bought in print . . . in another magazine.

We finally got things straightened out; but to paraphrase an oft-heard democratic dictum: "One article, one magazine."

NEW PRODUCTS

(from page 17)

age differential of bus signals that are asserted "high."

The Extensys device provides glitch-free signals (no spikes interference, crosstalk) by bringing some well-documented analog techniques from transmission-line analysis to the digital world of S-100 computers.

The "Glitch Grabber," which easily plugs into any open slot on the S-100 bus, features a proprietary self-regulating transistor network that controls voltages and modifies circuitry to handle less or more voltage; the circuitry is activated, however, only when the glitch is there, so it does not load the S-100 bus signals.

The "Glitch Grabber" is also very effective when used in business applications where reliable operations are of prime concern.

Extensys, 380 Bernardo Ave., Mountain View CA 94040.

PET-488 Cable Assembly

The Pickles and Trout PET-488 cable assembly makes your PET computer plug compatible with any IEEE-488 device. The PET computer can become the controller for a wide variety of electronic test equipment and computer peripherals. You can use your PET as the basis for an automated testing system or you can take advantage of the numerous peripheral devices (more appear every month) that can talk to the IEEE-488 bus.

The PET-488 cable assembly plugs directly into the edge connector on the back of the PET computer and has a completely 488 compatible connector on the other end. The cable itself meets all IEEE-488 specifications for

shielding and crosstalk and is 18 inches (.45m) long. Price is \$30 (California residents, please add 6 percent sales tax).

Pickles and Trout, PO Box 1206, Goleta CA 93017.

Professional Software

The Comprehensive Mailing List Program Package, #ML-INS, is a modular program set which enables the user to start and effectively maintain one or more mailing lists. Operations include: Add, Delete, Search, Sort, Auto-Sort and Sequential Print-out. Features include: user-selectable defaults for ease of entry, user-selectable number of labels across page for different printers and label sheets and user-selectable 3- or 4-line address for each independent entry. The program set is written for convenience and ease of use. Available with complete documentation and North Star diskette for only \$25 ppd.

Delivery is from stock. Documentation package only is \$4.50 ppd, fully refundable with order for diskette. Order from: Williams Radio and TV, Inc., Computer Division, 2062 Liberty St., PO Box 3314, Jacksonville FL 32206.

BOOKS BOOKS BOOKS

(from page 12)

impression of two guys talking to each other. The result is a very readable pair of books that are also extremely informative.

The books aren't flawless, of course. The most irritating things are the typographical errors. Fortunately, only a couple of them are likely to cause you any confusion while reading. An errata sheet will be available soon. Sorry, but even though I tried, I couldn't come up with anything else bad to say.

In short, these books are ideal for someone who is just getting into home computing. Even for the more experienced reader, they tie up a lot of the loose ends and show the relationships among things that may not have been clear before.

Kilobaud Classified

Kilobaud classified advertisements are intended for use by those individuals desiring to buy, sell, or trade used computer equipment or software. No commercial ads are accepted.

Two sizes of ads are available. The \$5 box allows five lines of about 22 characters each, including spaces and punctuation. The \$10 box provides ten lines of type — again, each line is about 22 characters. Minimize capital letters, as they use twice the space of small characters. Payment is required in advance with ad copy. We cannot bill, or accept credit. Oversize ads are not accepted. Each subscriber is limited to two (2) identical ads in any given issue.

Advertising text and payment must reach us 60 days in advance of publication. For example, advertising copy for the March issue (mailed in February) must be in our hands on January 1. The publisher reserves the right to refuse a questionable or not applicable advertisement. Mail advertisements to: KILOBAUD CLASSIFIED, Kilobaud, Peterborough, NH 03458. Do not include any other material with your ad, as it may be delayed.

PET owners—train your new PET with this software: try Dictator at \$10 or King at \$7.50, or a tape of 10 games at \$20. Send SASE for complete list. Guaranteed. Dr. Daley, 425 Grove Ave., Berrien Springs MI 49103.

CORRECTIONS

Robert L. Smith of 2300 St. Francis Dr., Palo Alto CA 94303, writes:

"I have some information that may be of use to readers of the article, 'Super Terminal!' (March issue, p. 48), about the Burroughs/Friden 9350-2. There were some unidentified pins on Table 4 (and at least one pin in error). The identification should be as follows:

Pin No.	Function
24	SHIFT ENCODER #1
26	SHIFT ENCODER #2
27	BIT 6 OUT
28	PARITY BIT OUT
32	CONTROL BIT 6 OUT
33	CONTROL BIT 5 OUT
34	CONTROL PARITY BIT OUT
37	CONTROL BIT 7 OUT

Note that in Fig. 6, the missing pin is pin 27.

"It is not impossible to repair and modify the original boards, as I have done so, even before I obtained any original documentation. I did, however, have to generate a fair amount of documentation on my own.

"At least some of the ICs on the original circuit boards are apparently available from Raytheon. I have a limited supply of the various ICs (unused) if anyone is in need of them. I also have some used circuit boards and a fair amount of mechanical and electrical documentation for the 9350. However, I do not have any decent method for copying and distributing most of the documentation because of the large volume of the material."

Chris Kilgus of Phoenix AZ wrote to inform us that the ACIA in Fig. 1 of Don Gille's article "Tuned for Speed" (February issue, p. 59) is an MC 6850 rather than a 6820.

Our address was printed as Box 2485 in the "Mystery Program" in the April 1978 issue. It should be: Tom Rugg and Phil Feldman, PO Box 24815, Los Angeles CA 90024.

IT'S ABOUT TIME!

Finally, a COMPLETE disk utility package for the NORTH STAR MICRO DISK SYSTEM. A MUST for both BUSINESS and hobby systems. PKGUT1 on diskette includes the following four 8080 machine language programs originating at 0 (relocations done no charge): PACKIT - Packs & Unpacks disk files so you can get more storage per disk! CHANGIT - Prints, Dumps and/or Changes data in disk files up to a global level. SORTIT - A generalized sorting utility. COMPIT - File comparison utility. Will compare disk files sequentially or by key and display differences.

Diskette with full user's documentation \$80.00

North Star BASIC games: ROADRACE, EVENWINS, BIORYTHM, 3DTACTAC, and the addictive SUPRWUMPI! PKGN1 (5 games on diskette) \$15.00

VDM-GAMES (require SOLOS or CUTER): Real time ROBOTS and ASTEROID! PKGV1 (2 games on 1200 baud CUTS tape) \$20.00

2708/16 EPROM PROGRAMMER

for the F-8, 6800, 8080, 1802,
or KIM-1 microcomputers.

- RAM starting address.
- PROM starting address.
- number of bytes to be programmed can be easily specified.

Features:

- Includes software for verifying programming.
- Hardware requires only 1 1/2 I/O ports to interface to any microcomputer.
- Low insertion force programming socket.

Assembled and tested w/software \$59.95, Kit \$49.95.
Kit w/out software but w/software instructions \$33.00. We ship 3 days ARO for M.O. or C.O.D. After 1 PM 804-973-5482.

Optimal Technology, Inc.
Blue Wood 127
Earlsville, VA 22936 O10

STAND ALONE VIDEO TERMINAL

Now, a completely self-contained video terminal card for less than \$150.00. Requires only an ASCII Keyboard and TV set to become a complete interactive terminal for connection to your computers serial I/O port. Two units available, common features are: single 5V supply, crystal controlled sync and baud rates (to 9600 baud), computer and keyboard operated cursor control, parity error and control, power on initialization, forward spaces, line feed, rev. line feeds, home, return cursor, and clear to end of line. Power requirements are 5V at 900ma, output std. IV p-p video and serial TTL level data.

Features:	TH3216	TH6416
Display	32 characters by 16 lines 2 pages	64 characters by 16 lines scrolling
Characters	Upper case ASCII	Upper/lower case optional
Baud Rates	300-9600	110-9600
Controls	Read to/from memory	Scroll up or down
Price (kit)	\$149.95	\$189.95

Above prices include all IC sockets

OPTIONS:

Power supply (mounts on board)	\$14.95
Video/RF Modulator, VD-1	6.95
Lower case option (TH6416 only)	10.00
Assembled, tested units, add	60.00

Frequency Counter

\$79.95 KIT

You've requested it, and now it's here! The CT-50 Frequency Counter Kit has more features than counters selling for twice the price. Measuring frequency is now as easy as pushing a button. The CT-50 will automatically price the decimal point in all modes, giving you quick, reliable readings. Want to use the CT-50 mobile? No problem, it runs equally as well on 12 VDC as it does on 110 VAC. Want super accuracy? The CT-50 uses the popular TV color burst freq. of 3.579545 MHz for time base. Tap off a color TV with our adapter and get ultra accuracy — .001 ppm! The CT-50 offers professional quality at the unheard of price of \$79.95. Order yours today!

SPECIFICATIONS

Sensitivity: less than 25mV
Frequency range: 5Hz to 60MHz, typically 65MHz
Gate time: 1 second, 1/10 second, with automatic decimal point positioning on both direct and prescale
Display: 8 digit red LED, 4" height
Accuracy: 2 ppm, .001 ppm with TV time base
Input: BNC, 1 meg ohm direct, 50 ohm with prescale option
Power: 110 VAC 5 watts or 12 VDC 6.7 Amp
Size: Approx. 6" x 4" x 2", high quality aluminum case

PRICES

CT-50, 60MHz Counter Kit	\$79.95
CT-50WT, 60 MHz counter, wired and tested	\$159.95
CT-600, 600 MHz prescaler option for CT-50, add ..	\$29.95

VIDEO TO RF MODULATOR

Convert any TV set to a video monitor. Super stable circuit is glitch-free, tunable over channels 4-6. Runs on 5-15V. Recommended by many computer manufacturers. Std. video input. Complete kit, VD-1 \$6.95

MINI-KITS

FM WIRELESS MIKE KIT

Transmit up to 300' to any FM radio. Sensitive mike input requires dynamic, crystal or ceramic mike. Runs on 3 to 9 volts.

FM-1 \$2.95

TONE DECODER KIT

A complete tone decoder on a single IC Board. Features: 400 to 5000 Hz adjustable frequency range, voltage regulation, 367 IC. Useful for touch-tone including tone burst detection, FSK demod, signaling, and many other uses. Use 7 for 12 button touchtone decoding. Runs on 5 to 12 volts.

Complete Kit, TD-1 \$4.95

LED BLINKY KIT

A great attention getter which alternately flashes 2 jumbo LEDs. Use for name badges, buttons or warning type panel lights.

Complete Kit, BL-1 \$2.95

SUPER-SNOOP AMPLIFIER

A super-sensitive amplifier which will pick up a pin drop at 15 feet! Great for monitoring baby's room or as a general purpose test amplifier. Full 2 watts of output, runs on 6 to 12 volts, uses any type of mike. Requires 6-45 ohm speaker.

Complete Kit, SN-9 \$4.95

MUSIC LIGHTS KIT

See music come alive! 3 different lights flicker with music or voice. One light for lows, one for the mid-range and one for the highs. Each channel individually adjustable, and drives up to 300 watts. Great for parties, band music, nite clubs and more.

Complete Kit, ML-1 \$7.95

SIREN KIT

Produces upward and downward wail characteristic of police sirens. 200mhz audio output, runs on 3-9 volts, uses 8-45 ohm speaker.

Complete Kit, SM-3 \$2.95

POWER SUPPLY KIT

Complete triple regulated power supply provides variable 2.5 volts at 200ma and +3 volts at 1 amp. 500m load regulation, good filtering and small size. Kit less transformers. Requires 6-9V at 1 amp and 18 to 30VCT.

Complete Kit, PS-3LT \$6.95

ECONO-KITS... 19 WAYS TO START YOUR OWN ELECTRONIC INVENTORIES

P32

ECONO-KITS provide you, the hobbyist or technician, with the most popular components in today's home market. These kits save us time and money because most of your components are at arms reach. Each kit is packaged in a clear plastic box for easy storage. It is polybagged and portable. ECONO-KITS contain high-quality components with a comprehensive cross section of the most popular values and styles.

You'll find ECONO-KITS to be the best value on the market today. Choose from any of the 19 kits listed below or buy the whole series. Start building your own inventory today. To order your kits, call us at (516) 582-6258 or send your order in by mail (\$25.00 minimum order, please).

MYLAR FILM CAPACITORS

7 Assorted mylar film capacitors, both air and radial leaded types. From .001 FD thru 47 MFD. 50 thru 600 volts.
Part No. —PK-1 Cost—\$5.95

RESISTOR 1/4 WATT

10 Pieces of 33 most popular carbon resistor values from 10 Ohm thru 10 Meg. 1/4 and 10%.
Part No. —PK-2 Cost—\$3.95

RESISTOR 1/2 WATT

10 Pieces of 33 most popular carbon resistor values from 10 Ohm thru 10 Meg. 1/2 and 10%.
Part No. —PK-3 Cost—\$3.25

CERAMIC DISC CAPACITORS

10 Pieces of 33 most popular values in 1PF thru .1MFD. 50V thru 1KV.
Part No. —PK-4 Cost—\$4.95

ELECTROLYTIC-AXIAL

1 Pieces of most popular axial lead electrolytic values from 1 MFD thru 10 MFD. 16 thru 150 Volt.
Part No. —PK-5 Cost—\$4.95

ELECTROLYTIC RADIAL

1 Pieces with same value range as above but with radial leads.
Part No. —PK-6 Cost—\$4.95

7 TERMINAL STRIPS

50 Pieces of 25 most commonly used configurations.
Part No. —PK-7 Cost—\$2.75

8 TRIMMER POTENTIOMETERS

15 Piece assortment of popular values from 200 Ohm thru 2.2 Meg. vertical and horizontal mount.
Part No. —PK-8 Cost—\$3.50

9 DIPPED TANTALUM CAPACITORS

15 most commonly used values from 1 MFD thru 100 MFD. 6.3 Volt thru 25 Volt. 15 pieces total.
Part No. —PK-9 Cost—\$4.50

10 POWER RESISTORS—3 WATT

24 pieces of standard ohmic values from 47 ohm thru 2.2K.
Part No. —PK-10 Cost—\$5.75

11 POWER RESISTORS—5 WATT

24 Pieces of standard ohmic values from 1 ohm thru 2.2K.
Part No. —PK-11 Cost—\$7.50

12 POWER RESISTORS—10 WATT

24 Piece assortment of standard ohmic values. 47 thru 10K.
Part No. —PK-12 Cost—\$10.50

13 SLIDE AND ROCKER SWITCHES

24 assorted slide and rocker switches in various configurations for a multiple of uses.
Part No. —PK-13 Cost—\$4.50

14 HEAT SHRINK TUBING

10 1 ft. lengths of assorted sizes. Sizes starting at 1/4" dia.
Part No. —PK-14 Cost—\$3.50

15 RECTIFIER DIODES

21 Pieces total. 3 each from 1N4001 thru 1N4007. 50 RV thru 1000 RV. 1 AMP.
Part No. —PK-15 Cost—\$6.50

16 L.E.D.'s

16 Assorted led's. 1 each of the 11 series plus 5 other popular types.
Part No. —PK-16 Cost—\$5.25

17 1 WATT ZENER DIODES

48 Pieces total. 2 each from 1N4728 thru 1N4750.
Part No. —PK-17 Cost—\$9.60

18 500MW ZENER DIODES

44 Pieces total. 2 each from 1N5226 thru 1N5252.
Part No. —PK-18 Cost—\$8.95

19 IC SOCKETS

18 Pieces total. 6 Pieces each of 8 Pin, 14 Pin and 16 Pin Low Profile Dual In Line Sockets.
Part No. —PK-19 Cost—\$6.00

THE SSB \$150 FLOPPY DISCOUNT

Affordable

The tribe at Smoke Signal Broadcasting took our BFD-68 disk system and scalped the price, but not the features to create the ABFD 68 (Affordable Basic Floppy Disk). We appreciate the fact that the computer hobbyist gave us our start and we haven't forgotten you.

\$649 Assembled

Compare Price. Our SS-50 bus compatible disk system is \$150 less than the assembled price of the leading S-100 disk system. And you can at least double that savings when you buy one of the computers manufactured by MSI or SWTPC that use the superior 6800 microprocessor.

Programmable

The BFD-68 is well known for its fine software. The system comes with the best disk operating system available and we offer a multitude of other compatible software products. These include a BASIC interpreter with disk file handling capability. By the way, our DOS now easily handles true random access files as well as sequential. Also, we have a super fast BASIC compiler for business applications. In addition, a Text Editor, 2 Assemblers, a Trace Disassembler useful for program debugging and an Object to Source Code Generator are all stock items available for immediate delivery. A word processor will be available very soon.

Reliable

We delivered our first mini-floppy disk system a year ago — 6 months ahead of any other 6800 based mini system. Thus, we've had twice the experience in building reliability into the system. Our NEW disk controller was designed using all we have learned in the past year about system reliability.

The ABFD-68 contains all the built in reliability of our regular BFD-68 plus you save money by supplying your own cabinet and power supply for the disk.

Available

We've shipped literally tons of our BFD-68 disk system in the past year and have learned to keep our production up with demand. Give us a call and chances are we'll be able to ship you the new ABFD-68 from stock and charge it to your Master Charge or Visa card. Better yet, ask us for the name of the computer store nearest you that carries our complete line of computer products.

MINATURE SOLID STATE 202 VIDEO CAMERA KIT

FEATURING A 100 x 100 BIT SELF SCANNING CHARGED COUPLED DEVICE

THIS UNIQUE UPDATED CAMERA KIT
FEATURES THE FAIRCHILD CCD 202C IMAGE SENSOR

\$5

FEATURES

- Sensitive to infra red as well as visible light
- May be used in a vacuum, under water and high altitude
- May be used in a magnetic environment because there is no high voltage
- All components mounted on parallel 3 3/4" x 6 1/2" single sided boards
- Total weight under 1 lb.

ADVANTAGES

- IN THE FUTURE WE WILL SUPPLY A COMPUTER VIDEO INTERFACE CARD
- All clock voltages operate at 6V requiring no adjustments
- Higher video output signal
- We supply the power board, so only a 5V 1 Amp power source is needed
- The circuitry has been simplified for easier assembly
- Two level TTL output is supplied for interfacing

\$349⁰⁰ KIT

Add \$75.** to assemble and test

We supply all semiconductors, boards, data sheets, diagrams, resistors, capacitors, and 8MM lens. Sorry we do not supply the case, batteries and 5V supply.

Add \$2.00 Postage and Handling

ATTN: FUTURE COMPUTER BUYER

WE ARE PROUD TO INTRODUCE A CONCEPT IN SMALL SYSTEMS COMPUTING WHOSE TIME HAS COME: "THE COMPUTER WAREHOUSE".

"THE COMPUTER WAREHOUSE" PROVIDES A NEW MORE ECONOMICAL WAY TO BUY A TURN-KEY COMPUTER SYSTEM. SPECIFICALLY,

- ◆ WE HAVE ASSEMBLED A VARIETY OF COMPETITELY PRICED SYSTEMS STARTING AT UNDER \$1000.00 .
- ◆ EACH SYSTEM IS EXTENSIVELY PRE-TESTED FOR BOTH HARDWARE AND SOFTWARE COMPATIBILITY.
- ◆ EACH SYSTEM IS SHIPPED DIRECT FROM "COMPUTER WAREHOUSE" STOCK TO AVOID UNNECESSARY DELAYS.
- ◆ EACH SYSTEM IS DESIGNED TO BE UPWARD EXPANDABLE AS ADDITIONAL CAPABILITY IS NEEDED.

TO HAVE YOUR OWN COPY OF OUR FIRST "COMPUTER WAREHOUSE CATALOG" SEND \$1.00, YOUR NAME, AND A MAILING ADDRESS. YOUR CATALOG WILL ARRIVE WITHIN 3 TO 4 WEEKS, DEPENDING ON MAIL HANDLING. IF YOU WANT TO MOVE MORE QUICKLY, CALL 800-227-3035 (SALES ONLY). IN CALIFORNIA CALL 415-431-0640. WE LOOK FORWARD TO YOUR ORDER.

FOR CATALOG INCLUDING PARTS LISTS AND SCHEMATICS,
SEND A SELF ADDRESSED ENVELOPE WITH 24¢ POSTAGE.

UART & BAUD RATE GENERATOR *

Part no. 101

- Converts serial to parallel and parallel to serial
- Low cost on board baud rate generator
- Baud rates: 110, 150, 300, 600, 1200, and 2400
- Low power drain +5 volts and -12 volts required
- TTL compatible
- All characters contain a start bit, 5 to 8 data bits, 1 or 2 stop bits, and either odd or even parity.
- All connections go to a 44 pin gold plated edge connector
- Board only \$12.00; with parts \$35.00

8K STATIC RAM

Part no. 300

- 8K Altair bus memory
- Uses 2102 Static memory chips
- Memory protect
- Gold contacts
- Wait states
- On board regulator
- S-100 bus compatible
- Vector input option
- TRI state buffered
- Board only \$22.50; with parts \$160.00

RS-232/TTL INTERFACE *

Part no. 232

- Converts TTL to RS-232, and converts RS-232 to TTL
- Two separate circuits
- Requires -12 and +12 volts
- All connections go to a 10 pin gold plated edge connector
- Board only \$4.50; with parts \$7.00

DC POWER SUPPLY *

Part no. 6085

- Board supplies a regulated +5 volts at 3 amps., +12, -12, and -5 volts at 1 amp.
- Power required is 8 volts AC at 3 amps., and 24 volts AC C.T. at 1.5 amps.
- Board only \$12.50; with parts \$42.50 excluding transformers

TIDMA *

Part no. 112

- Tape Interface Direct Memory Access
- Record and play programs without bootstrap loader (no prom) has FSK encoder/decoder for direct connections to low cost recorder at 1200 baud rate, and direct connections for inputs and outputs to a digital recorder at any baud rate.
- S-100 bus compatible
- Board only \$35.00; with parts \$110.00

Part no. 111

TAPE INTERFACE *

- Play and record Kansas City Standard tapes
- Converts a low cost tape recorder to a digital recorder
- Works up to 1200 baud
- Digital in and out are TTL-serial
- Output of board connects to mic. in of recorder
- Earphone of recorder connects to input on board
- Requires +5 volts, low power drain
- Board \$7.60; with parts \$27.50
- No coils

Part no. 107

RF MODULATOR *

- Converts video to AM modulated RF, Channels 2 or 3
- Power required is 12 volts AC C.T., or +5 volts DC
- Board \$7.60; with parts \$13.50

Apple II Serial I/O Interface *

Part No. 2

- Baud rates up to 30,000
- Plugs into Apple Peripheral connector
- Low-current drain
- RS-232 Input and Output SOFTWARE
- Input and Output routine from monitor or BASIC to teletype or other serial printer.
- Program for using an Apple II for a video or an intelligent terminal. Board only - \$15.00; with parts - \$42.00; assembled and tested - \$62.00.

RS-232/TTY * INTERFACE NEW

Part no. 600

- Converts RS-232 to 20mA current loop, and 20mA current loop to RS-232
- Two separate circuits
- Requires +12 and -12 volts
- Board only \$4.50, with parts \$7.00

TELEVISION TYPEWRITER

Part no. 106

- Stand alone TVT
- 32 char/line, 16 lines, modifications for 64 char/line included
- Parallel ASCII (TTL) input
- Video output
- 1K on board memory
- Output for computer controlled cursor
- Auto scroll
- Non-destructive cursor
- Cursor inputs: up, down, left, right, home, EOL, EOS
- Scroll up, down
- Requires +5 volts at 1.5 amps, and -12 volts at 30 mA
- All 7400, TTL chips
- Char. gen. 2513
- Upper case only
- Board only \$39.00; with parts \$145.00

MODEM *

Part no. 109

- Type 103
- Full or half duplex
- Works up to 300 baud
- Originate or Answer
- No coils, only low cost components
- TTL input and output-serial
- Connect 8 ohm speaker and crystal mic. directly to board
- Uses XR FSK demodulator
- Requires +5 volts
- Board \$7.60; with parts \$27.50

To Order:

E21

Mention part number and description. For parts kits add "A" to part number. Shipping paid for orders accompanied by check, money order, or Master Charge, BankAmericard, or VISA number, expiration date and signature. Shipping charges added to C.O.D. orders. California residents add 6.5% for tax. Parts kits include sockets for all ICs, components, and circuit board. Documentation is included with all products. Dealer inquiries invited. 24 Hour Order Line: (408) 374-5984.* Designed by John Bell.

THE FIRST TO OFFER PRIME PRODUCTS TO THE HOBBYIST AT FAIR PRICES NOW LOWERS PRICES EVEN FURTHER!

- 1. Proven Quality** Factory tested products only, no re-tests or fallouts. Guaranteed money back. We stand behind our products.
- 2. Same Day Shipment** All prepared orders with cashiers check, money order or charge card will be shipped same day as received.

\$100 PRODUCTS

LOGOS 1 8K STATIC RAM

- ★ Low Power
- ★ Selectable Memory Protect
- ★ Totally Buffered
- ★ Phantom
- ★ Battery Back-up
- ★ Address on 1K boundary
- ★ Requires no front panel
- ★ No wait states

ASSEMBLED & TESTED

250ns. 199.95
450ns. 179.95

KIT

250ns. 149.95
450ns. 125.95

Bare PC Board w/Data \$21.95
Now over 1 year successful field experience
Special Offer Buy (4) 8K 450ns. Kits \$117.00 ea.

IMS 16K STATIC RAM

- ★ Memory mapping
- ★ Phantom
- ★ Address 16K Bound
- ★ Use with or w/o front panel
- ★ Power 2.1 amps typ.
- ★ Uses 2114

ASSEMBLED & TESTED ONLY
450ns. \$439.95 250ns. \$495.95

S-100 32K STATIC RAM

- ★ Address 32K Boundary
- ★ Power 450ns. 2.8 amps typ.
- ★ No wait states on 2MHz
- ★ Fully Buffered
- ★ Phantom can be added
- ★ 2114/TMS4045 or 9135

ASSEMBLED & TESTED KIT
250ns. \$849.00 250ns. \$790.00

Z-80/Z-80A CPU BOARD

- ★ On board 2708
- ★ Power on jump
- ★ 2708 included (450ns.)
- ★ completely socketed

Assembled and tested \$185.00
Kit \$129.95
Bare PC Board \$ 34.95

★ For 4MHz Speed Add \$15.00

TDL COMPATIBLE Z-80 CPU

- ★ Compatible to TDL
- ★ Can be upgraded software & hardware for 4MHz operation

Assembled and tested \$199.95
Kit \$139.95
Bare PC Board \$ 34.95

BYTE USER 8K EPROM BOARD

- ★ Power on Jump
- ★ Reset Jump

Assembled & Tested 94.95
Kit 64.95
Bare PC Board 21.95

Special Offer: Buy 4 kits only \$59.95 each

8080A CPU BOARD

- S100 compatible with 8 level Vector Interrupt fully socketed.

Assembled & Tested \$149.95
Kit \$ 99.95
Bare PC Board w/data \$ 34.95

TARBELL FLOPPY INTERFACE

- ★ S100 Compatible
- ★ Uses CPM
- ★ Jumper Selectable
- ★ Percsi, Shugart, etc

Assembled and tested \$269.95
Kit \$179.95
Bare PC Board \$ 39.95

NOTE: For CPM Add \$70.00
Documentation Add \$20.00

WMC REAL TIME CLOCK

- ★ S100 Compatible
- ★ Two Interrupts
- ★ Software programmable
- ★ 1MHz Crystal Oscillator

Assembled and tested \$179.95
Kit \$124.95
Bare PC Board w/data \$ 29.95

MICRODESIGN MR-16 2716 EPROM BOARD

- ★ Individual Port Address
- ★ Uses Low cost 16K TI EPROMS
- ★ Optional 1K RAM
- ★ Phantom control

Assembled and Tested \$74.95

DUAL TRACE 15 MEGAHERTZ PORTABLE MINISCOPE

\$395.00

**MADE
IN THE
U.S.A.**

**BATTERY
OPERATED!**

FEATURES

- Dual Trace - 2 channel: separate, chopped or alternate modes.
- 15 megahertz bandwidth.
- External and internal trigger.
- Time Base - 0.1 microseconds to 0.5 Sec/div - 21 settings.
- Battery or line operation.
- Automatic and line sync modes.
- Power consumption less than 15W.
- Vertical Gain - 0.01 to 50 volts/div - 12 settings.
- Weight is only 3 pounds.

From the originator of the Digital Voltmeter, Non-Linear Systems comes the MS-215 Miniscope. It is a fine electronic instrument with a great deal of measuring capability and excellent accuracy. Its design is modern, utilizing the latest in low-powered integrated circuits, and it is packaged into the smallest practical size. The instrument fits into many briefcases and tool boxes with room to spare.

Operating characteristics have been chosen so that the MS-215 will make all of the measurements needed in servicing most electronic equipment. It is field-portable so its use is not restricted to the bench.

SPECIFICATIONS:

Vertical Mode: CH1, CH2, CH1 & CH2 (Chopped) & CH1 & CH2 (Alt.)
The Following Specifications apply to each channel

Y Axis Vertical Input: 10mV/div to 50V in 12 Calibrated ranges, as follows:
x1-10mV/div to 10V/div in four ranges, each continuously variable.
x2-20mV/div to 20mV/div in four ranges, each continuously variable.
x5-50mV/div to 50mV/div in four ranges, each continuously variable.
Accuracy is 3%

Input Impedance: 1M ohm shunted by 50 pF.

Bandwidth: DC/DC to 15 Mhz 16 db (DC to 8 Mhz 13 db). AC, same as DC down to 3Hz.

Rise Time: Approximately 23 nS @ 1 division deflection.

Input Voltage: 250 maximum (DC and Peak AC).

Horizontal Mode: Internal Time Base or External Horizontal, switch selectable. In the XY mode, vertical input is through CH1 and horizontal input is through CH2

Bandwidth: DC to 200 KHz (13 db).

Coupling: AC, DC or ground, switch selectable. Low frequency point on AC is 3 Hz.

Input Impedance: 1Meg ohm shunted by 50 pF.

Deflection Factor: 10mV/div to 50V/div in 12 calibrated ranges. The ranges can be calibrated with the CH2 gain control

Input Voltage: 250V maximum (DC and Peak AC)

Time Base: 0.1 uS/div to 0.5 Sec/div in 21' calibrated ranges, as follows:
x1, uS-0.1 uS/div to 100 uS/div. x2, uS-0.2 uS/div to 200 uS/div.
x5, uS-0.5 uS/div to 500 uS/div. x1, mS-0.1 mS/div to 100 mS/div
x2, mS-0.2 mS/div to 200 mS/div. x5, mS-0.5 mS/div to 500 mS/div.
all in four ranges, each continuously variable. (Range increments ar .1, 1, 10, 100.) With vernier in full clockwise position, calibrated time measurements are possible. Accuracy is 3%.

Triggering Internal: Sweep triggered from internal trigger source (In the dual trace modes, the internal trigger source is CH1).
Automatic: Trigger source is internal calibrator frequency. To be used if there is no other trigger source available to synchronize the sweep.
Line: Trigger is derived from line frequency when using the battery charger.
External: Controls function as for internal triggering (1 Megohm input impedance).
Slope: Selects sync to positive- or negative- going waveform.
Coupling: AC
Sensitivity: Less than 1 div for internal trigger and less than 1 volt for external trigger.
Level: Trigger Level control permits continuous adjustment of trigger point in all modes except Auto.
Internal Calibrator: A square-wave signal of 1 volt p-p 15% is provided. Frequency is approximately 1KHz.

Display Graticule: 4x5 div, each division is 0.25 inch. Viewing area 1.1"Hx1.35"W
CRT: Bluish-white phosphor, medium persistence. CRT uses low power filament for low battery drain. Instant on!

Power On-Board Batteries: Three sealed, rechargeable lead acid "D" Cells
Operating Time: Typically 4 hours.
Charging Time Scope Operating: Will run indefinitely but not reach full charge.
Non-operating: Sixteen hours.
External Power: Battery charger 115 vac (220 vac on request). 50-400Hz, less than 15 watts.
Dimensions: 3.1"Hx6.4"Wx8.0"D.
Weight: Three pounds.

Environment Operating Temperature: 0° to 40°C
Shock and Vibration: Designed to withstand normal shock and vibration encountered in commercial shipping and handling.

Accessories Furnished: Tilt stand, battery charger, 2 input cables, and 3 miniature banana plugs.
Optional: Leather carrying case and probes
Warranty: One year parts and labor. Made in the U.S.A.

MS-215 with Rechargeable Batteries and Charger \$395.00

Leather Carrying Case

The leather case has 2 separate compartments. One to hold the scope, other to hold the charger, probe, shoulder strap, etc. The case can be worn on the belt, or over the neck.

The snaps used on the case are "one way", thus accidental striking the case against an object will not undo the snaps or let it be pulled off your belt.

41-140 \$30.

Probes

10 to 1 probe with 10 megohm input.

Probe uses spring hook tip for sure connection. Compensation network located at the connector rather than at the probe, so as to keep size weight to a minimum.

41-141 \$24.

Deluxe Combination Probe

Switchable 10to1/1to1 probe with an assortment of probe tips to suit any situation.

41-3495 \$34.

MS-15 Single Trace version of MS-215

DRESSED ENVELOPE WITH 24c POSTAGE.

TIDMA

With this Tape Interface Direct Memory Access board you can record and play programs without a bootstrap loader (no prom). This can be up and running as fast as putting it in the socket. It takes complete control of the S-100 bus and reads or writes directly into the memory without the need for the microprocessor. It has an FSK encoder/decoder for direct connections to a low cost cassette recorder at 1200 baud, and inputs and outputs for direct connections to a digital recorder at any baud rate. This board is S-100 bus compatible.

Board only \$35.00 Part No. 112; with parts \$110.00 Part No. 112A

APPLE II SERIAL I/O INTERFACE

This serial I/O port works up to 30,000 baud. Software included are, an input and output routine from the Apple monitor or basic to a teletype or other serial printer. Also a program for using the Apple II for a video terminal or an intelligent terminal. It plugs into one of the Apple II peripheral connectors. It uses very low current. The input and output are RS-232.

Board only \$15.00 Part No. 2; with parts \$42.00 Part No. 2A. Assembled and tested \$62.00 Part No. 2C.

To Order:

Mention part number and description. For parts kits add "A" to part number. Shipping paid for orders accompanied by check, money order, or Master Charge, BankAmericard, or VISA number, expiration date and signature. Shipping charges added to C.O.D. orders. California residents add 6.5% for tax. Parts kits include sockets for all ICs, components, and circuit board. Documentation is included with all products. Dealer inquiries invited. 24 Hour Order Line: (408) 374-5984. Circuits designed by John Bell.

Presents The All New VIM-1,6502 Based MICROCOMPUTER SYSTEM By Synertek Systems Corp.

The VIM-1 Has Arrived! Time to Get On-Board!

Don't become stuck in an old technology.
Master the latest, state-of-the-art
Technology of Microprocessors.

Develop insight into the future trends of
microprocessor technology.

VIM-1 Features Include:

- FULLY-ASSEMBLED AND COMPLETELY INTEGRATED SYSTEM that's ready-to-use.
 - ALL IC'S ARE IN SOCKETS
 - 28 DOUBLE-FUNCTION KEYPAD INCLUDING UP TO 24 "SPECIAL" FUNCTIONS
 - EASY-TO-VIEW 6-DIGIT HEX LED DISPLAY
 - KIM-1* HARDWARE COMPATIBILITY
 - The powerful 6502 8-Bit MICROPROCESSOR whose advanced architectural features have made it one of the largest selling "micros" on the market today.
 - THREE ON-BOARD PROGRAMMABLE INTERVAL TIMERS available to the user.
 - 4K BYTE ROM RESIDENT MONITOR and Operating Programs.
 - Single 5 Volt power supply is all that is required.
 - 1K BYTES OF 2114 STATIC RAM onboard with sockets provided for immediate expansion to 4K bytes onboard, with total memory expansion to 65, 536 bytes
 - USER PROM/ROM: The system is equipped with 3 PROM/ROM expansion sockets for 2316/2332 ROMs or 2716 EPROMs
 - ENHANCED SOFTWARE with simplified user interface
 - STANDARD INTERFACES INCLUDE:
 - Audio Cassette Recorder Interface with Remote Control (Two modes: 135 Baud KIM-1* compatible, Hi-Speed 2400 Baud)
 - Full duplex 20mA Teletype Interface
 - System Expansion Bus Interface
 - TV Controller Board Interface
 - CRT Compatible Interface
 - APPLICATION PORT: 15 Bi-directional TTL lines for user applications with expansion capability for added lines
 - EXPANSION PORT FOR ADD-ON MODULES (51 I/O Lines included in the basic system)
 - SEPARATE POWER SUPPLY connector for easy disconnect of the d-c power
 - AUDIBLE RESPONSE KEYPAD
- VIM-1 Manuals: The well organized documentation package is complete and easy-to-understand
VIM-1 CAN GROW AS YOU GROW. It's the system to BUILD-ON.
Expansion features that are soon to be offered:

90 DAY WARRANTY PRICE \$269.00

- TV Interface Card
- BASIC Interpreter
- Resident Assembler/Editor
- Port Expansion Kit
- RAM Expansion Kit

If You Like KIM* You Will Love VIM

VIM-1 PROVIDES YOU WITH ON-BOARD EXPANSION. The printed circuit board includes sockets to add additional ROM, PROM, RAM, or Peripheral Ports when you require them. VIM-1 doesn't require you to build up wire-wrap boards to use these options. VIM-1 option boards are merely plugged into the basic unit to give you the added capability you require. We have maintained KIM* hardware compatibility. Our boards will plug into any KIM* motherboard and card cage.

SUPER SOFTWARE

Synertek has enhanced KIM-1* software as well as hardware. The software has simplified the user interface. The basic VIM-1 system is programmed in machine language. For those users who want to develop in assembly language directly on VIM-1 the optional RESIDENT ASSEMBLER/EDITOR can be purchased and plugged into the ROM/PROM expansion sockets ALREADY PROVIDED.

Similarly, those users wishing to develop in a high level language can purchase VIM-1 BASIC as a nominally priced option. Monitor status is easily accessible, and the monitor gives the keypad user the same full functional capability of the TTY user.

*KIM is a product of MOS Technology.

Other Software Enhancements Include:

- Write Protect of Selectable Memory Areas
- Decimal Point Prompting on Hex Display
- Break Function to Halt Program
- Programmable/Debug/On-Off (Prog. Single-Capabilities)
- Software Breakpoint Feature

Allow 2 to 4 Weeks for Delivery

Quantity Discounts Available Upon Request.

SPECIAL OFFER: Commercial Duty Power Supply Designed For VIM-1 Fully EXPANDED: Fully Enclosed, Regulated Over Voltage Protection, Fused, Grounded AC Cord, and a FULL TWO YEAR WARRANTY.

PROVIDES: +5 V.D.C. @ 10 Amps. & ± 12 V.D.C. @ 1 AMP.

PRICE IF PURCHASED SEPARATELY \$150.00

PRICED IF PURCHASED WITH VIM-1 \$ 95.00

.. We're Growing!

**HEAVY DUTY IBM 735 I/O SELECTRIC BASED TERMINAL
MECHANICS COMPLETELY REFURBISHED—
ALL NEW MICROPROCESSOR-BASED ELECTRONICS—
SWITCH SELECTABLE FOR EITHER ASCII OR EBCDIC OPERATION**

PRICE: \$895

WHAT YOU SHOULD KNOW BEFORE BUYING ANY STANDARD IBM SELECTRIC TERMINAL

- Carriage Return time is about 5 times longer than a standard terminal; therefore, you need to transmit up to 12 null or rubout characters after the standard CR/LF characters to allow enough time for the carriage return. This may require you to rewrite your computer's software. There are other characters which have similar problems such as Index, Tab, Backspace and Shift.
- The mechanics of the IBM Selectric limit the printing speed to a maximum of 14.9 characters per second, therefore it cannot run at 150 baud (15 characters/sec.)
- The standard baud rate for a Selectric is 134.5 and therefore cannot interface with a system having only the standard baud rates such as 110 or 150 without modifying or completely replacing the terminal's electronics.
- Some of the IBM Selectric terminals use a unique character ball and are *not* interchangeable with the standard typewriter ball. The balls for these are more expensive, harder to find, and do not have the font selection.
- The IBM Selectric's printer and keyboard are mechanically linked together and therefore, without sophisticated electronics, it cannot interface with a full-duplex system.
- The Selectric produces only 10 standard control codes versus 34 on a standard ASCII terminal.
- There are several IBM Selectric terminals around and *not all* have the heavy duty Selectric mechanism.

WHAT YOU SHOULD KNOW ABOUT THE IBM I/O SELECTRIC TERMINAL THAT WE ARE OFFERING

- TWO operating systems (switch selectable)
 - A. As a standard IBM terminal using EBCDIC Code at 134.5 Baud. So that it can be used with IBM equipment.
 - B. As a Full 7-bit ASCII terminal at 110 Baud. With the following features;
 1. The terminal operates at 10 cps, but prints at 14.9 cps and has a 150 character buffer to compensate for the long carriage return time. Therefore there is no requirement to rewrite your computer's software.
 2. It generates all 34 of the standard ASCII control codes.
 3. Full or Half-duplex operation.
 4. Generation of parity.
 5. Two modes of operation:
 - a. TTY Mode: Transmits only upper-case codes (for alpha characters only) like a standard TTY even if the shift key is not depressed.
 - b. Typewriter Mode: Transmits both upper and lower-case codes, dependent upon the shift key being depressed or not.
- Has both RS-232 and 20 ma. Current Loop interfaces.
- Remote/Local switch, so it can be used as a typewriter or a terminal.
- Uses the standard IBM Selectric character ball.
- Has a 15" carriage for up to 132 characters per line.
- Platen feed.

EXPANDABLE EPROM BOARD

16K OR 32K EPROM \$49.95 W/OUT EPROM
Allows You to Use Either 2708's For 16K of Eprom or 2716's For 32K of Eprom.

KIT FEATURES:

- All Address Lines & Data Buffered
- Quality Plated through P.C. Board Including Solder Mask and Silk Screen
- Selectable Unit States
- On Board Regulation Provided
- All Sockets Provided W/Board

WE CAN SUPPLY 450As 2708's AT \$11.95 WHEN PURCHASED WITH BOARD.

EXPANDORAM THE ULTIMATE RAM BOARD 32K FOR \$475.00

32K MODEL	
8K	\$151.00
16K	259.00
24K	367.00
32K	475.00

64K MODEL	
16K	\$281.00
32K	519.00
48K	757.00
64K	995.00

THE 32K VERSION USES THE MOSTEK MK4115 RAM AND HAS 8K BOUNDARIES AND PROTECTION & UTILIZES DIP SWITCHES. P. C. BOARD COMES WITH SOCKETS FOR 32K OPERATION

BUY A \$100 COMPATIBLE RAM BOARD AND UPGRADE THE SAME BOARD TO A MAXIMUM OF 64K MEMORY IN STEPS OF EITHER 8K OR 16K AT YOUR OPTION BY MERELY PURCHASING MORE RAM CHIPS FROM S.D. COMPUTER PRODUCTS

THE 64K VERSION USES THE MOSTEK MK4116 RAM AND HAS 16K BOUNDARIES AND PROTECTION & UTILIZES DIP SWITCHES. P. C. BOARD COMES WITH SOCKETS FOR 64K OPERATION

LOOK AT THE FEATURES WE HAVE BUILT INTO THE EXPANDORAM!

- MEMORY ACCESS TIME IS 375 ns
- MEMORY CYCLE TIME IS 500 ns
- POWER REQUIREMENTS ARE:
 - 8 VDC 400 MA DC
 - 18 VDC 400 MA DC
 - 18 VDC 30 MA DC
- ON BOARD INVISIBLE REFRESH
- NO WAIT STATES REQUIRED
- NO CYCLE STEALING NEEDED
- ON BOARD REGULATION
- CONTROL, DATA & ADDRESS INPUTS UTILIZE LOW POWER SCHOTTKY DEVICES
- DESIGNED TO WORK WITH Z-80, 8080, 8085, CPU's

ADD \$50.00 TO ABOVE PRICES FOR FULLY ASSEMBLED AND TESTED BOARDS

Low Cost Cassette Interface Kit \$19.95

Features: Play and record K.C. Standard 2400/1200 Hz tapes, 300 Baud, TTL I/O Compatible, Phase Lock Loop, Both 32 Pin Connector and 8 Pin Males Connector. Comes partially assembled. Oscillator and phase lock loop pre-tuned to K.C. Standard. Selector switch sends cassette data or auxiliary input data to microprocessor. LED indicates logic 1 level.

4K LOW POWER RAM KIT The Whole Works - \$79.95

Full Buffered - on board regulated - reduced power consumption utilizing low power 21L02-1 500ns RAMS - Sockets provided for all IC's. Quality plated through PC board.

*Add \$10.00 for 250ns RAM operation.

8K LOW POWER RAM \$159.95

FULLY ASSEMBLED AND TESTED. NOT A KIT! Imail - Altair - S-100 Bus compatible, uses low power static 21L02-500ns fully buffered on board regulated, quality plated through PC board, including solder mask & pos. dip switches for address select.

*Add \$30.00 for 250ns RAM operation

Z-80 CPU BOARD KIT Complete Kit \$139.

CHECK THE ADVANCED FEATURES OF OUR Z-80 CPU BOARD: Expanded set of 158 instructions, 8080A software capability, operation from a single 5VDC power supply; always stops on an M1 state, true sync generated on card (a real plus feature!), dynamic refresh and NMI available, either 2MHZ or 4MHZ operation, quality double sided plated through PC board; parts plus sockets provided for all IC's. *Add \$10. extra for Z-80A chip which allows 4MHZ operation.

NEW FROM S.D. "VERSAFLOPPY"™ KIT THE VERSATILE FLOPPY DISK CONTROLLER ONLY \$149.00

FEATURES: IBM 3740 Soft Sectors Compatible, S-100 BUS Compatible for Z-80 or 8080. Controls up to 4 Drives (single or double sided). Directly controls the following drives:

- Shugart SA400/450 Mini Floppy
- Shugart SA800/850 Standard Floppy
- PERSCO 70 and 277.
- MFE 700/750.
- CDC 9404/9406.

34 Pin Connector for Mini Floppy. 50 Pin Connector for Standard Floppy. Operates with modified CP/M operating system and C-Basic Compiler. The new "Versafloppy" from S.D. Computer Products provides complete control for many of the available Floppy Disk Drives, Both Mini and Full Size. FD1771B-1 Single Density Controller Chip. Listings for Control Software are included in price. FD 1771B-1 CHIP ALONE \$39.95

S. D. SALES NEW EXPANDABLE EPROM BOARD

16K OR 32K EPROM \$49.95 W/OUT EPROM
Allows You to Use Either 2708's For 16K of Eprom or 2716's For 32K of Eprom.

KIT FEATURES:

- All Address Lines & Data Buffered
- Quality Plated through P.C. Board Including Solder Mask and Silk Screen
- Selectable Unit States
- On Board Regulation Provided
- All Sockets Provided W/Board

WE CAN SUPPLY 450As 2708's AT \$11.95 WHEN PURCHASED WITH BOARD.

INTRODUCING THE SBC-100 (The Z-80 Based, S-100 Single Board Computer)

\$349.00

FEATURES:

- No Front Panel Needed
- Z-80 CPU (2 or 4 MHZ)
- 1K RAM
- 4 ROM/PROM Sockets for 4K/8K of Memory
- SYNCHRONOUS/ASYNCHRONOUS Serial I/O with RS 232 and Current Loop Interface and Software
- Programmable Baud Rate
- Parallel Input Port
- Parallel Output Port
- 4 Channel Timer/Counter
- 4 Vectored Interrupts

S.D. NOW HAS SOFTWARE FOR IT'S CUSTOMERS

CP/M™ DISK OPERATING SYSTEM . . . \$99.95

CP/M is a powerful disk operating system which has become an industry standard. It is compatible with several disk based FORTRAN and BASIC'S. This package includes a CP/M diskette (mini or full size) adapted for S.D.'s SBC-100/VERSAFLOPPY EXPANDORAM board set. Complete documentation is included. (™ CP/M is a registered trademark of Digital Research Corp., Pacific Grove, CA.)

Z-80™ DISK BASED ASSEMBLER . . . \$69.95

Runs on ANY CP/M based disk system. Assembles the official Zilog-Mostek Mnemonics. Contains extensive set of pseudo-ops. Available on mini or full size diskette.

VERSAFLOPPY™ CONTROL FIRMWARE . . . \$24.95

Provides control for VERSAFLOPPY and boots up CP/M. This runs on Z-80, 8080 or 8085 based computers. Available in 2708 or 2758 prom.

SD MONITOR . . . \$49.95

Powerful monitor for SBC-100 single board computers. Includes all VERSAFLOPPY control firmware. Comes in 2716 prom. Available in 4-6 weeks.

VERSAFLOPPY DIAGNOSTIC PROGRAM . . . \$24.95

Provides routines which are helpful in checking out a disk based system Available in 2708 or 2758 prom.

8803 MOTHER BOARD FOR 100 BUS MICRO-COMPUTERS

Price: \$29.50

- Kit includes 12 tantalum capacitors for +5, +12, -12 buses and insulated mounting spacers.
- Along side shown. Components side bare epoxy glass with white markings for component locations.
- 610 epoxy glass board with 2 ounce copper, solder plated and 038 diameter holes for leads.
- Solder mask with solder windows on etched circuits to avoid accidental short circuits.
- Mounts 11 receptacles with 100 contacts (2 rows) on 125 centers with 250 row spacing. Vector part number 8681-2 or mounts 10 receptacles plus interconnections to smaller mother board for expansion.
- Includes etched circuits and instructions for option of active pull-up, or floating terminations.
- Large buses +5V and GND (10 AMPS), ±12V or 16V (10 AMPS). Current ratings are per MIL-STD-775 with 10°C rise.
- Fits in Vector pak enclosures.
- Fits in IMSAI 8080 microcomputer as expansion board.

ELIT-N-WRAP
Wraps insulated wire on .025" square posts FOUR TIMES FASTER than regular manual wrap strip tools.

\$24.50

P180 with two 100' spools of 28 ga. wire \$75.00

P180-4T includes charger, wire \$75.00

NO PRE-STRIPPING!
NO PRE-CUTTING!
SPOOL-FED WIRE

The spooled wire passes through the tool past a sitting edge next to the wrap post. A narrow longitudinal cut is made in the insulation where it passes the square post corner. The heated copper is inserted by the sharp edge (if turns 78 contacts). Insulation is cut where wrapped but not between terminals posts when set straight out of the tool.

600 MHZ. FREQUENCY COUNTER ±0.1 PPM TCXO

OPTO-8000.1

This new instrument has taken a giant step in front of the multitude of counters now available. The Opto-8000.1 boasts a combination of features and specifications not found in units costing several times its price. Accuracy of ± 0.1 PPM or better — *Guaranteed* — with a factory-adjusted, sealed TCXO (Temperature Compensated Xtal Oscillator). **Even kits require no adjustment for guaranteed accuracy!** Built-in, selectable-step attenuator, rugged and attractive, black anodized aluminum case (.090" thick aluminum) with tilt bail. 50 Ohm and 1 Megohm inputs, both with amplifier circuits for super sensitivity and both diode/overload protected. Front panel includes "Lead Zero Blanking Control" and a gate period indicator LED. AC and DC power cords with plugs included.

Gate Times—1 second and 1/10 second
Selectable Input Attenuation—X1, X10, X100
Input Connectors Type —BNC
Approximate Size—3" h x 7 1/2" w x 6 1/2" d
Approximate Weight—2 1/2 pounds
Cabinet—black anodized aluminum (.090" thickness)
Input Power—9-15 VDC, 115 VAC 50/60 Hz
or internal batteries

OPTO-8000.1 Factory Wired **\$299.95**
OPTO-8000.1K Kit **\$249.95**

ACCESSORIES:

Battery-Pack Option—Internal Ni-Cad Batteries and charging unit **\$19.95**
Probes: P-100—DC Probe, may also be used with scope **\$13.95**
P-101—LO-Pass Probe, very useful at audio frequencies **\$16.95**
P-102—High Impedance Probe, ideal general purpose usage **\$16.95**

VHF RF Pick-Up Antenna-Rubber Duck w/BNC #Duck-4H **\$12.50**
Right Angle BNC adapter #RA-BNC **\$ 2.95**

FC-50 — Opto-8000 Conversion Kits:

Owners of FC-50 counters with #PSL-650 Prescaler can use this kit to convert their units to the Opto-8000 style case, including most of the features.

FC-50 — Opto-8000 **Kit \$59.95**
*FC-50 — Opto-8000F **Factory Update \$99.95**
FC-50 — Opto-8000.1 (w/TCXO) **Kit \$109.95**
*FC-50 — Opto-8000.1F **Factory Update \$149.95**

*Units returned for factory update must be completely assembled and operational

TERMS: Orders to U.S. and Canada, add 5% to maximum of \$10.00 per order for shipping, handling and insurance. To all other countries, add 10% of total order. Florida residents add 4% state tax. C.O.D. fee: \$1.00. Personal checks must clear before merchandise is shipped.

BUGBOOK®

Continuing Education Series

THE 555 TIMER APPLICATIONS SOURCEBOOK WITH EXPERIMENTS by Howard M. Berlin W3BH \$5.95

INSTRUCTOR'S MANUAL Necessary for instructor of Bugbook I and II. Answers questions regarding experiments, suggestions for further reading, philosophy of authors approach to digital electronics. A must for self-teaching individuals. \$3.00

OP AMP MANUAL by Howard M. Berlin W3BH \$9.00

CMOS - DESIGNERS PRIMER AND HANDBOOK New expanded version. Starts at basic structure of CMOS devices through integration into VLSI. \$8.50

COMPLETE MANUAL FOR DIGITAL LOGIC by John Weiss and John Brooks. Familiarizes technician or hobbyist with basic theories behind digital clocks. Includes trouble shooting guides, basic characteristics of clocks, soldering techniques, clock component data sheets and construction tips. \$3.95

BUGBOOKS I and II

by Peter R. Roy, David G. Loran, WB4TJ

BUGBOOK III by Peter R. Roy, David G. Loran, WB4TJ \$5.00

BUGBOOK IV by Peter R. Roy, David G. Loran, WB4TJ, Jonathan A. Titas \$15.00

BUGBOOKS V and VI by David G. Loran, Peter R. Roy, Jonathan A. Titas \$19.00 per set

EXPERIMENTS IN DIGITAL ELECTRONICS 8080A microcomputer programming and 8080A microcomputer interfacing. An integrated approach to self-instructed basic digital electronics, breadboarding and 8080A interfacing programming. \$19.00

CMOS - DESIGNERS PRIMER AND HANDBOOK New expanded version. Starts at basic structure of CMOS devices through integration into VLSI. \$8.50

COMPLETE MANUAL FOR DIGITAL LOGIC by John Weiss and John Brooks. Familiarizes technician or hobbyist with basic theories behind digital clocks. Includes trouble shooting guides, basic characteristics of clocks, soldering techniques, clock component data sheets and construction tips. \$3.95

DISCRETE LEADS

SOCKET JUMPERS

Mates with two rows of .025" sq. or dia. posts on patterns of 100 centers and shielded receptacles. Probe access holes in back. Choice of 6" or 18" length.

Part No.	No. of Contacts	Length	Price
924003-18R	26	18"	\$ 5.38 ea.
924003-06R	26	6"	4.78 ea.
924005-18R	40	18"	8.27 ea.
924005-06R	40	6"	7.33 ea.
924006-18R	50	18"	10.31 ea.
924006-06R	50	6"	9.15 ea.

JUMPER HEADERS

Adapter to PC boards for instant plug-in access via socket-connector jumpers. .025" sq. posts. Choice of straight or right angle.

Part No.	No. of Posts	Angle	Price
923863-R	26	straight	\$1.28 ea.
923873-R	26	right angle	1.52 ea.
923865-R	40	straight	1.94 ea.
923875-R	40	right angle	2.30 ea.
923866-R	50	straight	2.36 ea.
923876-R	50	right angle	2.82 ea.

INTRA-CONNECTOR

Provides both straight and right angle functions. Mates with standard .10" x .10" dual row connectors (i.e. 3m, Ainsley, etc.) Permits quick testing of inaccessible lines.

Part No.: 922576-26 No. of contacts: 26 Price \$6.90 ea.

INTRA-SWITCH

Permits instant line-by-line switching for diagnostic or QA testing. Switches actuated with pencil or probe tip. Mates with standard .10" x .10" dual-row connectors. Low profile design. Switch buttons recessed to eliminate accidental switching.

Part No.: IS-26 No. of contacts: 26 Price \$13.80 ea.

PARATRONICS Logic Analyzer Kit Model 100A \$229.00/kit

Analyzes any type of digital system. Checks data rates in excess of 8 million words per second. Trouble shoot TTL, CMOS, DTL, RTL, Schottky and MOS families. Displays 16 logic states up to 8 digits wide. See ones and zeros displayed on your CRT, octal or hexadecimal format. Tests circuits under actual operating conditions. Easy to assemble — comes with step-by-step construction manual which includes 80 pages on logic analyzer operation. (Model 100A Manual - \$4.95)

PARATRONICS TRIGGER EXPANDER - Model 10

Adds 16 additional bits. Provides digital delay and qualification of input clock and 24-bit trigger word. — Connects direct to Model 100A for integrated unit.

Model 10 Kit - \$229.00
Baseplate — \$9.95
Model 10 Manual — \$4.95

BK PRECISION 3 1/2-Digit Portable DMM

Model 2800 \$99.95

- Overload Protected
- 3 high LED Display
- Battery or AC operation
- Auto Zeroing
- 1mv, 1V, 0.1 ohm resolution
- Overrange reading
- 10 meg input impedance
- DC Accuracy 1% typical
- Ranges: DC Voltage: 0-1000V AC Voltage: 0-1000V Freq. Response: 50-400 Hz DC/AC Current: 0-100mA Resistance: 0-10 meg ohm Size: 6.4" x 4.4" x 2"

Accessories:
AC Adapter BC-28 \$9.00
Rechargeable Batteries BP-26 20.00
Carrying Case LC-28 7.50

CSC 100 MHz 8-Digit Counter

MAX-100 \$134.95

- 20 Hz-100 MHz Range
- 8 LED Display
- Crystal-controlled timebase
- Fully Automatic
- Portable — completely self-contained
- Size — 1.75" x 7.38" x 5.63"

Four power sources, i.e. batteries, 110 or 220V with charger, 12V with auto lighter adapter and external 7.2-10V power supply

ACCESSORIES FOR MAX-100:
Mobile Charger BC-28 \$9.00
Charger/Elimator Model 100 — CLA \$3.95
Model 100 — CAI \$9.95

63-Key Unencoded KEYBOARDS Hexadecimal Encoder

This is a 63-key, terminal keyboard newly manufactured by a large computer manufacturer. It is unencoded with SPST keys, unattached to any kind of PC board. A very solid molded plastic 13 x 4" base suits most application. IN STOCK \$29.95 each

19-key pad includes 1-10 keys, ABCDEF and 2 optional keys and a shift key. \$10.95/each

The Incredible "Pennywhistle 103" Kit Only \$129.95

The Pennywhistle 103 is capable of recording data to and from audio tape without critical speed requirements for the recorder and it is able to communicate directly with another modem and terminal for telephone "handing" and communications for the deaf. In addition, it is free of critical adjustments and is built with non-precision readily available parts.

Data Transmission Method Frequency-Shift Keying, full-duplex (half-duplex selectable)
Maximum Data Rate 300 Baud.
Data Format Asynchronous Serial (return to mark level required between each character).
Receive Channel Frequencies 2025 Hz for space, 2225 Hz for mark
Transmit Channel Frequencies Switch selectable: Low (normal) — 1070 space, 1270 mark; High — 025 space, 2225 mark
Receive Sensitivity 48 dbm acoustically coupled.
Transmit Level 15 dbm nominal. Adjustable from -6 dbm to -20 dbm.
Receive Frequency Tolerance Frequency reference automatically adjusts to allow for operation between 1800 Hz and 2400 Hz.
Digital Data Interface EIA RS-232C or 20 mA current loop (receiver is optoisolated and non-polar).
Power Requirements 120 VAC, single phase, 10 Watts.
Physical All components mount on a single 5" by 9" printed circuit board. All components included and optoisolated and non-polar.
Requires a VOM, Audio Oscillator, Frequency Counter and/or Oscilloscope to align.

The Original the 3rd Hand \$9.95 each

Leaves two hands free for working. Clamps on edge of bench, table or work bench. Position board on angle or flat position for soldering or clipping. Sturdy, aluminum construction for hobbyist, manufacturer or school rooms.

DIGITAL STOPWATCH

- Bright 6 Digit LED Display
- Times to 59 minutes 59.59 seconds
- Crystal Controlled Time Base
- Three Stopwatches in One
- Times Single Event — Split & Taylor
- Size 4.5" x 2.15" x .90" (4 1/2 ounces)
- Uses 3 Pentac Cells

Kit — \$39.95
Assembled — \$49.95
Heavy Duty Carry Case \$5.95

Stop Watch Chip Only (7205) \$19.95

New Bipolar Unit
Auto Zeroing
.5" LED
Auto Polarity
Low Power
Single IC Unit

Model KB500 DPM Kit \$49.00

Model KB503 5V Power Kit \$17.50

JE700 CLOCK

The JE700 is a low cost digital clock, but it is a very high quality unit. The unit features a simulated walnut case with dimensions of 6" x 2 1/2" x 1" and utilizes a MAN72 high brightness readout and the MMS314 clock chip.

12 or 24 Hour
KIT ONLY \$16.95

115 VAC

JE803 PROBE

The Logic Probe is a unit which is for the most part indispensable in trouble shooting logic families: TTL, DTL, RTL, CMOS. It derives the power it needs to operate directly off of the circuit under test. Drawing a scant 10 mA max, it uses a MAN72 readout to indicate any of the following states by these symbols: (H) 1 (LOW) 0 (PULSE) P. The Probe can detect high frequency pulses to 40 MHz. It can't be used as MOS levels or circuit damage will result.

\$9.95 Per Kit
printed circuit board

T'L 5V 1A Supply

This is a standard TTL power supply using the well known LM309K regulator IC to provide a solid 1 AMP of current at 5 volts. We try to make things easy for you by providing everything you need in one package, including the hardware for only

JE225 \$9.95 Per Kit

TYPESETTING MONITOR

We have acquired an unusual video monitor. It was originally designed for and used in the photo typesetting industry. As the typesetter composed his copy, the copy would appear on the screen. The tube is a flat type about 6½" x 2¼", since only one line of copy was scanned at a time. Most of the tubes have slight burn marks, but are still usable. We have all the circuitry, and will supply the circuitry with each order. We believe most of these units are in working order, since they were taken out of service when the equipment was upgraded. Looks like a good start to make into your own video monitor at giveaway prices. We have them with and without the CR tubes. Sold as is only.

STOCK No. 5603K Typesetter monitor with tube & circuit diagrams \$22.50 ea. 2/\$40.00
 STOCK No. 5604K Typesetter monitor without tube, with circuit diagrams . \$15.00 ea. 2/\$25.00

TV HOCKEY and SOCCER GAME

plus VIDEOCUBE

For some time we have been selling our VIDEOCUBE, the TV interface between computers, cameras, etc., and your TV set. We sold them in kit form, and to date we have sold over 3,000. We sold the complete VIDEOCUBE, when available, for \$16.95.

We now have a limited number of Hockey-Soccer Video games, complete with VIDEOCUBE interface, at a new low price of \$18.95; previously sold for \$27.50 in kit form. This gives you two games, at two levels of skill, with LED readouts for scorekeeping. This game sold in Boston department stores for \$79.50.

STOCK No. 5495K Complete VIDEO GAME & VIDEOCUBE \$18.95 ea. 2/\$35.00

WIRE WRAP BOARDS LOADED WITH 7400 SERIES ICs

Since last summer, we have been selling 2 wire wrap boards, Our Stock No. 6558K with approximately 100 sockets, and our Stock No. 6559K with approximately 45 sockets. These have been successful, based on your orders and reorders. We now have the same boards, but with the sockets still containing the original SN7400 series ICs that were used in the computer that these boards were designed for. We checked the value of these ICs, against the lowest price ICs in several Electronics magazine, and found that

at the lowest possible surplus prices, the values of the ICs on the 100 socket board ran to over \$40.00. A sample of some of the chips on the board we looked at are as follows: 74H87, 7486, 74107, 7451, 7400, 7404, 7495, 7493, 7492, 74193, 7489 and many others, to numerous to mention. Also on some boards, are a few linears, and phase locked loops. Not everyone needs every chip, but if you are working at all with TTL, this is a great opportunity to get an inventory of the most useful chips at a ridiculous price. We are selling the 100 socket board with about 100 chips, for \$10.00 more than the board itself, and the 45 socket chip for \$5.00 more than the board itself. We will also include with each board, 2 edge connectors with the 100 socket board, and 1 edge connector with the 45 socket board.

DATA ACQUISITIONS SUBSYSTEM	
ADC0817 is a 40 pin CMOS I.C. with an 8-bit analog-to-digital converter, a 16 channel multiplexer and micro processor compatible control logic. Converter features high impedance chopper stabilized comparator, voltage divider with analog switch tree and a successive approximation register. Latched Tri-State outputs for easy u-process interface. Requires only 15 mW of power from single 5V supply. Fast, 100uS conversion time.

LOOKING FOR MEMORY ?

OUR BEST SELLER: ECONORAM II™

S-100 Compatible 8K x 8 in a cost-effective package. Buffering on all lines, 0 wait states with the 8080, low power consumption, configured as two separate 4K blocks for addressing flexibility, handles DMA, memory protect with vector interrupt provision if you try to write into protected memory, fully socketed, gold-flashed edge fingers, solder masked and legended board . . . this is the board that doesn't cut any corners, but cuts the price instead.

(See the 1/77 issue of *Kilobaud* magazine for a product profile that tells just about everything you'd ever want to know about Econoram II . . . or send a self-addressed, stamped envelope to "Kilobaud Article" c/o our address and we'll send you a reprint. But if you really want to be convinced . . . talk to somebody who owns one!)

Kit form: \$135.00 3 kits: \$375.00 Assembled, tested: \$155.00

SUPER MEMORY FOR A SUPER MACHINE: H8 COMPATIBLE ECONORAM VI™

Users of the S-100 buss have found out why our memories are their best value . . . now H8 owners can find out too. This 12K x 8 kit offers the same basic features as our ECONORAM series . . . static design, configuration as two blocks (one 8K and one 4K), switch selected protect, sockets for all ICs, full buffering on address and data lines . . . plus the required hardware and edge connector to mate mechanically with the H8. As a bonus, all sockets and bypass capacitors are pre-soldered to the circuit board so you can start right in on the fun part of building this high-quality memory.

Kit form: \$235.00

NEW! 16K x 8 ECONORAM IV™ KIT

S-100 compatible 16K x 8 memory, with all the same features that have made our Econoram line such a winner . . . including static design, buffering, low power (under 2000 mA), write protect switches, and much more . . . but best of all, Econoram IV actually costs less than dynamic equivalents. You've wanted more memory; and here it is.

COMING SOON: 24K ECONORAM VII™ KIT

Just around the corner for your S-100 buss . . . we think you'll like it. While the price per bit is slightly higher compared to our other memories, you get some nice extras along with the regular Econoram features . . . such as the same current consumption as our 16K board, and some more switches and options. It's static, it's 24K, it's an Econoram . . . watch for it!

SPECIAL!! POPULAR PROCESSOR PRICES

These specials are while-they-last, first come-first served.

PACE 16 bit CPU: \$10.00

8080A prime units: \$5.00 (you've come a long way . . . down!)

8008 (if you have an 8008 system, you should have a couple of spares around): \$2.50

SEMI-FREE OFFER:

It's not totally free, because you have to buy something in order to get it. But send us an order for more than \$50, and you get one of our fabulous T-shirts. Specify S, M, L.

TERMS: Please allow up to 5% for shipping; excess refunded. Californians add tax. COD orders accepted with street address for UPS. For VISA®/Mastercharge® orders call our 24 hour order desk at (415) 562-0636. Prices good through cover month of magazine.

FREE FLYER: These are just a few of the items we carry for the computer enthusiast. We also stock a broad line of semiconductors, passive components, and hobbyist items. We will gladly send you a flyer describing our products upon receipt of your name and address.

CPU POWER SUPPLY KIT

Here is an economical power supply for small computer systems or digital bench work. Delivers 5V @ 4A with crowbar overvoltage protection; also gives ±12V @ ½A per side. Adjustable negative bias supply, 5 - 10V @ 10 mA. All in all, if you need a small power supply, you can't beat the performance or the price. If on the other hand you need a bigger supply . . . we just might have something for you soon.

10 SLOT MOTHERBOARD

Whether implemented as an add-on to existing systems that need more room, or as the nucleus of a stand-alone system, this S-100 compatible motherboard fits the needs of the budget-minded enthusiast. Our price includes all edge connectors, along with active termination circuitry that promotes accurate and reliable data transfer. Lots of bypass caps and extra heavy power line traces contribute to efficient operation. Heavy duty epoxy glass board, with a solder mask for easy soldering.

#CK-015, \$90.00. Kit form only.

18 SLOT MOTHERBOARD

All the same features and advantages of the 10 slot version, including our active termination circuitry. Complete with 18 edge connectors.

#CK-016, \$124.00. Kit form only.

DB-25 RS-232 SUBMINI-D CONNECTORS

Male plug, #CK-1004, \$3.95; female jack, #CK-1005, \$3.95; plastic hood for male connector, #CK-1006, \$0.90.

EDGE CONNECTORS

There are edge connectors, and there are Edge Connectors. These are the kind where the pins don't fall out, thanks to the bifurcated contacts. (We use the same connectors with our motherboards.)

#CK-1001: 100 pin edge connector with gold plated 3 level wrap posts. Mates with Altair/MSAI peripherals. \$5 each or 5/\$22.

#CK-1002: Same as above, but with soldertail pins on 0.25" centers. (Mates with IMSAI motherboard). \$5 each or 5/\$22.

#CK-1003: Same as above, but with soldertail pins on 0.14" centers. (Mates with Altair motherboard). \$6 each or 5/\$27.50.

DEALERS: Our dealer plan is alive and well . . . and making both store owners and customers happy. If you're missing out on this action, get in touch with us and we'll send you our dealer information packet.

IS HARD COPY STORAGE A PROBLEM?

Kilobaud, as thick as it is, is more like a floppy when it comes to standing on the bookshelf. Try the Kilobaud Library Shelf Boxes, ... sturdy corrugated white dirt resistant cardboard boxes which will keep them from flopping around. We have self-sticking labels for the boxes, too, not only for Kilobaud, but also for 73 Magazine ... and for Personal Computing, Radio Electronics, Interface Age, and Byte. Ask for whatever stickers you want with your box order. Hams may want our labels for CQ, QST or Ham Radio. They hold a full year of Kilobaud ... or 73. Your magazine library is your prime reference, keep it handy and keep it neat with these strong library shelf boxes ... One box is \$2.00, 2 boxes are \$3.00 and eight boxes are \$10.00. Be sure to specify which labels we should send. Have your credit card handy and call our toll-free order number 800-258-5473, or use the order card in the back of the magazine and mail to:

KILOBAUD LIBRARY SHELF BOXES Peterborough, NH 03458

IT'S EASY AND FUN TO BUILD YOUR OWN TEST EQUIPMENT WITH ICs

IC TEST EQUIPMENT \$4.95*

ICs have greatly simplified even the most sophisticated pieces of test equipment, making them fun to build. You can save thousands of dollars by building your own equipment and have a test lab which would make a university jealous.

A brand new book, IC TEST EQUIPMENT, has construction projects for making 37 pieces of test equipment. Square wave generator, pulse generator, timer, audio synthesizer, AFSK generator, sync generator, counters, capacity meter, etc.

Order this book today and get started building your own lab.

Use the order card in the back of the magazine or itemize your order on a separate piece of paper and mail to: KILOBAUD BOOK NOOK, Peterborough NH 03458 or phone toll free 800-258-5473

WHO'S BEHIND THE kilobaud™?

**This chap behind the Kilobaud
is the driving force behind
a new microcomputer system
. . . using the 6100.
Does that give it away?
Watch out for the dealer network
he's getting together.**

LAST MONTH'S MYSTERY READER

Last month's "Who's Behind the Kilobaud" was Steven Pereira, president of the Microcomputer Store in Nashua. Nashua now has three-going-on-four computer stores, which is remarkable considering its size. New Hampshire's freedom from a sales tax, which saves substantial dollars on a computer system, is drawing many companies to Nashua. Among the many new factories put in recently were a couple by DEC.

READ IT YOURSELF!

If you are not yet a subscriber to Kilobaud, we need you and you need us. There is a lot of data in Kilobaud that you will want to have on hand . . . the magazine is like a continuing encyclopedia of microcomputing and programs. You never know when you are desperately going to need something from a past issue . . . and you'll want it immediately. The cost per year is not significant . . . \$15 at present for \$24 worth of magazines.

You may have noticed that Kilobaud has more articles than any of the other magazines. If you'll keep track of how long it takes you to read Kilobaud as compared to the other computer magazines, you'll see you are getting a great bargain at \$15 per year.

Kilobaud • Peterborough NH 03458

beginner's • introductory

● **THE STORY OF COMPUTERS** by Donald D. Spencer is to computer books what *Dick and Jane* is to novels . . . extremely elementary, gives the non-computerist a fair idea of what the hobbyist is talking about when he speaks computer lingo. Attempts to explain what computers are and can do to a spouse, child or any un-electronics-minded friend. \$4.95.*

● **HOBBY COMPUTERS ARE HERE** If you (or a friend) want to come up to speed on how computers work . . . hardware and software . . . this is an excellent book. It starts with the fundamentals and explains the circuits, the basics of programming, along with a couple of TVT construction projects, ASCII-Baudot, etc. This book has the highest recommendations as a teaching aid for newcomers. \$4.95.*

● **THE NEW HOBBY COMPUTERS!** This book takes it from where "Hobby Computers Are Here" leaves off, with chapters on Large Scale Integration, how to choose a microprocessor chip, an introduction to programming, low cost I/O for a computer, computer arithmetic, checking memory boards, a Baudot monitor/editor system, an audible logic probe for finding those tough problems, a ham's computer, a computer QSO machine . . . and much, much more! \$4.95.*

● **HOME COMPUTERS: 210 Questions & Answers** by Rich Didday. Two books aimed exclusively at the novice computer hobbyist/home computer user. Written in a rather unusual style which has a beginner asking questions which are answered by a person with a substantial background in computers and personal computing. The questions are just the kind beginners come up with . . . and the answers are presented in easy-to-understand terms (usually with a diagram to illustrate the point). Both the hardware and software aspects of home computing are covered from A to Z. An index in both books makes them ideal as reference material for anyone. Volume I: Hardware — \$7.95*; Volume 2: Software — \$6.95*.

● **MICROCOMPUTER PRIMER** by Mitchell Waite and Michael Pardee. Describes basic computer theory, explains numbering systems, and introduces the reader to the world of programming. Describes the world of microcomputing in "real world" terminology. No better way of getting involved with the exciting new hobby of microcomputing. \$7.95.*

● **MICROPROCESSORS FROM CHIPS TO SYSTEMS** by Rodney Zaks is a complete and detailed introduction to microprocessors and microcomputer systems. No preliminary knowledge of computers or microprocessors is required to read this book, although a basic engineering knowledge is naturally an advantage. Intended for all wishing to understand the concepts, techniques and components of microprocessors in a short time. \$9.95.*

● **INTRODUCTION TO MICROPROCESSORS** by Charles Rockwell of MICROLOG is an ideal reference for the individual desiring to understand the hardware aspects of microprocessor systems. Describes the hardware details of computer devices in terms the beginner can understand, instead of treating the micro chip as a "black box." General information about hardware systems is provided. Specific systems are not described and programming is only briefly discussed. \$17.50 US and Canada, \$20 elsewhere.*

● **AN INTRODUCTION TO MICROCOMPUTERS, VOLS. 1 AND 2** by Adam Osborne Associates, are references dealing with microcomputer architecture in general and specifically with details about most of the common chips. These books are not software-oriented, but are invaluable for the hobbyist who is into building his own interfaces and processors. Volume 1 is dedicated to general hardware theory related to micros, and Volume 2 discusses the practical details of each micro chip. (Detailed review in Kilobaud #2) Volume 1 — \$7.50*; Volume II — \$12.50.*

● **HOME COMPUTERS: A BEGINNERS GLOSSARY AND GUIDE** this book is intended as a quick reference source for beginners. Included is a general introduction to microcomputers, a simple application & sample system, the history of microcomputers & their uses, and an introduction to some actual equipment. A chapter on number systems includes a number conversion chart, binary arithmetic from conversions to divisions, and a discussion of octal and hexadecimal numbers. A good background to read technical literature and computer equipment specifications. \$6.95.*

computer games

● **WHAT TO DO AFTER YOU HIT RETURN** PCC's first book of computer games . . . 48 different computer games you can play in BASIC . . . programs, descriptions, muchly illustrated. Lunar landing, Hammurabi, King, Civel 2, Qubic 5, Taxman, Star Trek, Crash, Market, etc. \$8.00.*

● **SCELBI'S GALAXY GAME FOR THE "6800"** Here's a new twist in computer games by Robert Findley/Raymond Edwards. "Galaxy" pits the operator of a spaceship against alien craft, as well as such variables as speed, time, and ammunition. No two games are the same! \$14.95.*

● **BASIC COMPUTER GAMES** Okay, so once you get your computer up and running in

BASIC, then what? Then you need some programs in BASIC, that's what. This book has 101 games for you, from very simple to real buggers. You get the games, a description of the games, the listing to put in your computer and a sample run to show you how they work. Fun. Any one game will be worth more than the price of the book for the fun you and your family will have with it. \$7.50.*

● **SCELBI'S FIRST BOOK OF COMPUTER GAMES** Need a game for your 8008 or 8080 microprocessor? Has three popular games, "Space Capture," "Hexpaw," and "Hangman." Complete flowcharts, logic description, program listing, and instructions are provided. A must for the game freak! \$14.95.*

* Use the order card in the back of this magazine or itemize your order on a separate piece of paper and mail to: Kilobaud Book Department • Peterborough NH 03458. Be sure to include check or detailed credit card information. For orders under \$10.00, add \$1.00 shipping and handling.

software • programming

● **DISCOVERING BASIC — A Problem Solving Approach** by Robert E. Smith deals with progressively more complex problems which allow the reader to discover the vocabulary of BASIC language as he develops skill and confidence in putting it to work. Clear and concise explanations. Problems used cover a wide range of interests — insurance, geometry, puzzles, economics, etc. \$6.85.*

● **BASIC New 2nd Edition.** by Bob Albrecht. Self-teaching guide to the computer language you will need to know for use with your microcomputer. This is one of the easiest ways to learn computer programming. \$4.95.*

● **A QUICK LOOK AT BASIC** by Donald D. Spencer. A perfect reference for the beginning programmer. Assumes that the reader has no previous programming experience and is a self-teaching guide for the individual desiring to learn the fundamentals of BASIC. \$4.95.*

● **MY COMPUTER LIKES ME ... WHEN I SPEAK BASIC** An introduction to BASIC ... simple enough for your kids. If you want to teach BASIC to anyone quickly, this book is the way to go. \$2.00.*

● **FUN WITH COMPUTERS AND BASIC** by Donald D. Spencer, contains an easy-to-understand explanation of the BASIC Programming Language and is intended for persons who have had no previous exposure to computer programming. Over half the book is devoted to problems using games, puzzles, and mathematical recreations. A superior book for self-teaching and learning computer programming. \$6.95.*

● **SIXTY CHALLENGING PROBLEMS WITH BASIC SOLUTIONS** by Donald Spencer, provides the serious student of BASIC programming with interesting problems and solutions. No knowledge of math above algebra required. Includes a number of game programs, as well as programs for financial interest, conversions and numeric manipulations. \$6.95.*

● **THE SECRET GUIDE TO COMPUTERS** Parts 1, 2, and 3 by Russ Walter. **Part One** describes computers in general, and after reading for ten minutes you will be writing simple BASIC programs! **Part Two** discusses computer applications. It's one thing to master the syntax of a language such as BASIC and another to solve problems using the new tool. **Part Three** describes programming languages. Ever heard of APL and QLISP? BASIC is not the only language used to program computers. 7th Edition. Part I - \$2.75*; Part II - \$2.50*; Part III - \$3.50.*

● **SOME COMMON BASIC PROGRAMS** published by Adam Osborne & Associates, Inc. Perfect for non-technical computerists requiring ready-to-use programs. Business programs, plus miscellaneous programs. Invaluable for the user who is not an experienced programmer. All will operate in the stand-alone mode. \$7.50 paperback.*

● **Scientific Research Instruments' BASIC SOFTWARE LIBRARY** is a complete do-it-yourself kit. Written in everybody's BASIC immediately executable in ANY computer with at least 4K, no other peripherals needed. Vol. I contains business and recreational programs and is 300 pages. Vol. II is 260 pages and contains math, engineering, sta-

tistics and plotting programs. Vol. III contains money managing, advanced business programs such as billing, A/R, inventory, payroll, etc. Vol. IV contains general purpose programs like loans, rates, retirement, plus games: Poker, Enterprise (take charge while Capt. Kirk is away), Football and more! Vol. V is filled with experimenter's programs including games, pictures and misc. problems like "logic." Vols. I & II \$24.95,* Vol. III \$39.95,* Vol. IV & V \$9.95 each,* Vol. VI \$49.95,* Vol. VII \$39.95.*

● **MICROPROCESSOR PROGRAMMING for Computer Hobbyists** by Neill Graham is for the hobbyist interested in intermediate and advanced techniques of programming and data structuring. Written to take up where the computer manufacturers' instruction manuals and the introductory programming language texts leave off. \$8.95.*

● **ADVANCED BASIC — Applications and Problems** by James Coan is for those who want to extend their expertise with BASIC. Offers advanced techniques and applications. \$7.95.*

● **8080 PROGRAMMING FOR LOGIC DESIGN** Ideal reference for an in-depth understanding of the 8080 processor. Application-oriented and the 8080 is discussed in light of replacing conventional, hard-wired logic. Practical design considerations are provided for the implementation of an 8080-based control system. \$7.50.*

● **8080 SOFTWARE GOURMET GUIDE AND COOKBOOK** If you have been spending too much time developing simple routines for your 8080, try this new book by Scelbi Computing and Robert Findley. Describes sorting, searching, and many other routines for the 8080 user. \$9.95.*

● **6800 PROGRAMMING FOR LOGIC DESIGN** Oriented toward the industrial user, this book describes the process by which conventional logic can be replaced by a 6800 microprocessor. Provides practical information that allows an experimenter to design a complete micro control system for the "ground up." \$7.50.*

● **6800 SOFTWARE GOURMET GUIDE & COOKBOOK** If you have been spending too much time developing routines for your 6800 microprocessor, try the new book by Scelbi Computing and Robert Findley. Describes sorting, searching, and many other routines for the 6800 user. \$9.95.*

● **FORTRAN PROGRAMMING** by Donald Spencer. FORTRAN was designed for complex numeric calculations; and possesses extended I/O capability. It is easily learned, as it is an English-like computer language. \$7.50.*

● **FORTRAN WORKBOOK** by Donald Spencer. Provides practical examples and problems to solve. Flowcharting is also discussed. Almost all micros support BASIC — it won't be long before FORTRAN is commonplace. \$3.95.*

● **CHEMISTRY WITH A COMPUTER** by Paul A. Cauchon, contains a collection of tutorial, simulation and problem-generation computer programs. Usable with almost any chemistry course in the high school or college level. \$9.95.*

*Use the order card in the back of this magazine or itemize your order on a separate piece of paper and mail to: Kilobaud Book Department • Peterborough NH 03458. Be sure to include check or detailed credit card information. For orders under \$10.00, add \$1.00 shipping and handling.

Kilobaud Book Department

hardware

● **MICROPROCESSOR INTERFACING TECHNIQUES** by Austin Lesea & Rodney Zaks will teach you how to interconnect a complete system and interface it to all the usual peripherals. It covers hardware and software skills and techniques, including the use and design of model buses such as the IEEE 488 or \$100. \$9.95.*

● **TTL COOKBOOK** by Donald Lancaster. Explains what TTL is, how it works, and how to use it. Discusses practical applications, such as a digital counter and display system, events counter, electronic stopwatch, digital voltmeter, and a digital tachometer. \$8.95.*

● **CMOS COOKBOOK** by Don Lancaster. Details the application of CMOS, the low power logic family suitable for most applications presently dominated by TTL. Required reading for every serious digital experimenter! \$9.95.*

● **TVT COOKBOOK** by Don Lancaster, describes the use of a standard television receiver as a microprocessor CRT terminal. Explains and describes character generation, cursor control and interface information in typical, easy-to-understand Lancaster style. \$9.95.*

● **BUILD-IT BOOK OF DIGITAL ELECTRONIC TIMEPIECES** by Robert Haviland is a data-packed guide to building every time-keeping device you can imagine: rugged ship-board clocks, second-splitting digital IC chronometers, decorator digital clocks, a precision timer, a frequency-period meter, a tide and moon clock, an automatic alarm setter, etc. Including full-size printed circuit board layouts. \$6.95.*

● **THE "COMPULATOR" BOOK** — Building Super Calculators & Minicomputer Hardware with Calculator Chips by R. P. Haviland, provides ideas, design info and printed circuit boards for calculator chip projects, measure time, tie in with a Teletype to create a virtually infinite memory system, and countless other functions. \$7.95.*

TEST EQUIPMENT LIBRARY

● **VOL I COMPONENT TESTERS** Build your own test equipment and save a bundle (and have a lot of fun). Volume I of the 73 Test Equipment Library shows you how to build and use transistor testers (8 of 'em), three diodes testers, 3 IC testers, 9 voltmeters and VTVMs, 8 ohmmeter, 3 inductance meters, and a raft of other gadgets for checking temperature, crystals, Q, etc. \$4.95.*

● **VOL II AUDIO FREQUENCY TESTERS** If you're into audio such as digital cassette recording, RTTY, Baudot vs ASCII, SSTV, SSB, Touchtone or even hi-fi you'll want to have this book full of home built test equipment projects. Volume II \$4.95.*

● **VOL III RADIO FREQUENCY TESTERS** This is of more interest to hams and CBers: test equipment you can build for checking out transmitters and receivers, signal generators, noise generators, crystal calibrators, GDOs, dummy loads. \$4.95.*

● **VOL. IV IC TEST EQUIPMENT** Become a trouble-shooting wizard. All you need to know about pulse, audio and sync generators, frequency counters, digital component testers, logic probes and more! Plus a cumulative index for all four volumes of the 73 Test Equipment Library. \$4.95.*

general

● **COMPUTER DICTIONARY** by Donald D. Spencer. Defines words and acronyms used by computerists in a clear, easy to understand style. This reference is a must for the individual getting started in the world of microcomputers. \$5.95.*

● **MICROCOMPUTER DICTIONARY** This microcomputer dictionary fills the need to become quickly acquainted with the terminology and nomenclature of the revolution in computers. There is also a comprehensive electronics/computer abbreviations and acronyms section. \$15.95*

● **THE UNDERGROUND BUYING GUIDE** Here is a handy guide for the electronics enthusiast. Over 600 sources of equipment and literature are provided. Cross-referenced for ease of use. Electronic publishing houses are also listed. \$5.95 each.*

● **1976 PERIODICAL GUIDE FOR COMPUTERISTS** is a 20-page book which indexes over 1,000 personal computing articles for the entire year of 1976 from Byte, Creative Computing, Digital Design, Dr. Dobbs Journal, EDN, Electronic Design, Electronics, Interface Age, Microtek, Peoples Computer Company, Popular Electronics, QST, Radio Electronics, SCCS Interface and 73 Amateur Radio. Price \$3.00.* New January — June 1977 Edition (includes Kilobaud) — \$3.00.*

● **TYCHON'S 8080 OCTAL CODE CARD** Slide rule-like aid for programming and debugging 8080 software contains all the mnemonics and corresponding octal codes. Also available, Tychon's *8080 Hex Code Card*, same as above only has hex codes instead of octal. \$3.00 each.*

amateur radio books

● **NOVICE STUDY GUIDE** The most complete Novice study guide available. It is brand new. This is not only invaluable for anyone wanting to get started in amateur radio; but also it is about the only really simple book on the fundamentals of electricity and electronics. \$4.95.*

● **GENERAL CLASS STUDY GUIDE** Takes over on theory where the Novice book leaves off. You'll need to know the electronic theory in this to work with computers and you'll not find an easier place to get the information. \$5.95.*

● **SSTV HANDBOOK** This excellent book tells all about it, from its history and basics to the present state-of-the-art techniques. Hardbound \$7,* Softbound \$5.*

● **VHF ANTENNA HANDBOOK** This new handbook details the theory, design and construction of hundreds of different VHF and UHF antennas. Packed with fabulous antenna projects you can build. \$4.95.*

● **WEATHER SATELLITE HANDBOOK** Simple equipment and methods for getting good pictures from the weather satellite. Dr. Taggart WB8DOT \$4.95.*

● **THE NEW RTTY HANDBOOK** is a brand new 1977 edition and the only up-to-date RTTY book available. The state-of-the-art has been changing radically and has made all previous RTTY books obsolete. It has the latest circuits, great for the newcomer and the expert alike. \$5.95.*

* Use the order card in the back of this magazine or itemize your order on a separate piece of paper and mail to: Kilobaud Book Department ● Peterborough NH 03458. Be sure to include check or detailed credit card information. For orders under \$10.00, add \$1.00 shipping and handling.

NEW ADDITIONS TO THE KB BOOK NOOK

● **MICROPROCESSORS FROM CHIPS TO SYSTEMS** by Rodney Zaks is a complete and detailed introduction to microprocessors and microcomputer systems. No preliminary knowledge of computers or microprocessors is required to read this book, although a basic engineering knowledge is naturally an advantage. Intended for all wishing to understand the concepts, techniques and components of microprocessors in a short time. \$9.95.*

● **YOUR OWN COMPUTER** by M. Waite and M. Pardee. The personal computer has been touted as the next consumer product. But most individuals still wonder why. Much technical material has been written but there is little material for the average individual without an extensive background in electronics. This book removes the stigma of complexity that surrounds the computer and has succeeded in providing a simple easy-to-understand guide to these units. \$1.95.*

● **BEGINNING BASIC** by Dr. Paul Chirlian provides a really basic BASIC that covers all the topics in simple, easy-to-understand language. Nothing is left out, everything is presented in clear, step-by-step fashion. This book will make a good BASIC programmer of any reader. \$9.95.*

● **THE COMPUTER QUIZ BOOK** by Donald D. Spencer is written for readers who would like to test themselves on basic computer concepts. It may be used effectively by students, teachers, laymen, programmers, personal computer users, or anyone else interested in checking their knowledge of computer concepts. \$5.95.*

● **PAYROLL WITH COST ACCOUNTING - IN BASIC** by L. Poole & M. Borchers includes program listings with remarks, descriptions, discussion of the principle behind each program, file layouts, and a complete user's manual with step-by-step instructions, flow charts, and simple reports and CRT displays. Payroll and cost accounting features include separate payrolls for up to 10 companies, time-tested interactive data entry, easy correction of data entry errors, job costing (labor distribution), check printing with full deduction and pay detail, and 16 different printed reports, including W-2 and 941. Price only \$12.50.*

● **HOW TO BUY & USE MINICOMPUTERS AND MICROCOMPUTERS** by Wm. Barden, Jr. This book discusses these smaller brethren of computers and shows how the reader can become a part of the revolution - how he can own and use a functioning computer system in his home to do a variety of practical or recreational tasks. \$9.95.*

● **Microprocessor Lexicon - Acronyms and Definitions** Compiled by the staff of SYBEX is a convenient reference in pocket size format. Sections include acronyms and definitions; part numbers and their definitions; S-100 signals; RS232 signals; IEEE 499 signals; microcomputer and microprocessors; JETDS summary (military) and a code conversion table \$2.95.*

● **HOW TO PROGRAM MICROCOMPUTERS** by Wm. Barden, Jr. Here is a guide to assembly language programming of the Intel 8080, Motorola MC6800, and MOS Technology MCS6502 microprocessors. It is written especially for beginning programmers with hobbyist microcomputers based on one of these three chips. The topics covered range from data manipulations at the bit level up to data handling of tables and lists, and from simple adds and subtracts up to floating-point operations. \$8.95.*

● **TAKE A CHANCE WITH YOUR CALCULATOR** Lennart Rade wrote this book to help you to discover the world of probability with your programmable calculator. You will need NO previous experience either in probability theory or in programming to learn both from this book. \$8.95.*

● **A STEP BY STEP INTRODUCTION TO 8080 MICROPROCESSOR SYSTEMS** by D.L. Cohn & J.L. Melsa. This microprocessor book is written for people who don't know anything about microprocessors but who wish they did. The step-by-step presentation does not require any computer or electronics background, so anyone who is interested can follow it. However, the book is not only intended for beginners. Engineers and technicians who are familiar with electronics will find the software descriptions valuable in updating their skills. Computer professionals will find the detailed treatment of the 8080 architecture and instruction set useful. Price \$7.95.*

● **YOUR HOME COMPUTER** by James White, is an introduction to the world of personal microcomputing. Written in clear and understandable language, this book tells you everything you want to know about home computing and gives the computer novice a painless introduction to microcomputer technology and terminology, beginning with what computers are and how they work. This basic book requires no prior knowledge or experience in electronics or computing.

It provides information about home computer kits, guidelines for selecting and building your own microcomputer, how to use your home computer and what you can do with it, lists of computer stores, clubs, periodicals, and answers to many more of your questions about microcomputers and the jargon surrounding the personal computing scene today. \$6.00.*

● **INSTANT BASIC** by Jerald R. Brown. For the personal computer enthusiast or the user of DEC's BASIC PLUS language, here, finally, is a new book to teach you BASIC. It teaches BASIC to beginners using interesting programming ideas and applications that will be easily understood by the home computer programmer. BASIC PLUS users know that the two languages are very similar, so this book can be used by them as well. This is an "active participation" workbook, designed to be used with your home computer so you can learn by doing! Ideas are slowly introduced in a nonmathematical context so the beginner can quickly learn good programming techniques. \$6.00.*

● **PROGRAMMING IN PASCAL** by Peter Grogono. The computer programming language PASCAL was the first language to embody in a coherent way the concepts of structured programming which had been defined by Edsger Dijkstra and C.A.R. Hoare. As such it is a landmark in the development of programming languages. PASCAL was developed by Niklaus Wirth in Zurich; it is derived from the language ALGOL 60 but is more powerful and easier to use. PASCAL is now widely accepted as a useful language that can be efficiently implemented, and as an excellent teaching tool. This book is intended for people who want to write programs in PASCAL. It does not assume knowledge of any other programming language and it is therefore suitable for an introductory course. \$9.95.*

we're looking for someone serious about personal computing!

8-bit? 16-bit? The better of the two? The question is elemental — hardly worth consideration. What matters is your "machine's" CPU, its "architecture," and most importantly its instruction set. That's where the power is and that's exactly why we're telling you about the KD11-F. The KD11-F is the CPU we chose for the Heath H11. It's built by DEC, is the same CPU that's the cornerstone of the popular LSI-11 family, and is the main reason our 16-bit is the most powerful 16-bit in its price class! Bells and whistles? Hardly!

Fact: The KD11-F has eight registers. Six of which are general-purpose and non-dedicated! That alone means virtually unlimited programmer flexibility!

Fact: Most computers in the 16-bit class use three types of instructions (memory reference, operate or accumulator control, and I/O instructions). The KD11-F accomplishes all data manipulations with a single set of instructions — which results in very efficient operation!

Fact: The KD11-F's PDP-11 instruction set has the most

powerful repertoire of instructions of any computer in its price class.

What it all boils down to is that the Heathkit H11 gives you fantastic flexibility, unparalleled high-speed program execution, and unmatched performance!

Our H11 CPU isn't for everyone. It's for someone serious about computing... someone like you!

the world's most powerful microcomputer comes home

Computer hobbyists have always wanted the power and speed of professional machines. But they've had to settle for less. Professional machines were too expensive. Not anymore. Now there's the Heathkit H11.

Professional performance, kit price. The H11 uses Digital Equipment Corporation's 16-bit LSI-11 CPU. Exactly the same CPU found in the famous DEC PDP-11 - probably the most popular commercial and industrial computer in the world. So now a low-cost kit gives you the speed, power and throughput of the world's most popular professional computer.

Software and support. As an H11 owner, you have access to an incredible range of software - editor, relocatable assembler, linker, absolute loader, debug program, I/O executive program, dump routines, BASIC and FOCAL. And, by joining the DEC user's group (DECUS), you can have access to one of the largest software libraries in the world. And there's more to come. Much more.

Of course, the H11 executes the powerful PDP 11/40 instruction set which includes over 400 commands. And the fully assembled KD-11F CPU board includes 4K x 16 bits of memory. The backplane accepts up to six additional modules (memory, serial and parallel I/O, etc.) Heath will soon introduce a dual floppy with a disk operating system to take

full advantage of the H11's power. And the H11 is fully compatible with all DEC LSI-11 accessories.

Heath documentation is second to none. You get illustrated step-by-step instructions on how to build the kit, thorough explanations of the software and comprehensive operating instructions. If you want to see for yourself, we'll send you the entire manual set (#HM-1100) for just \$25. And you can apply the cost to the price of the computer.

With the Heathkit H11, you can enjoy power, speed, versatility and potential no 8-bit machine can match. And the H11 costs little more than lesser computers - just \$1295.*

Don't settle for less than the best. A close look in the latest Heathkit catalog will convince you that the H11 is the best home computer you can buy.

DEC, DECUS, PDP and FOCAL are registered trademarks of Digital Equipment Corp.
*Mail order, FOB, Benton Harbor, Michigan. Retail price slightly higher.

why the last bus is the best bus

HAPPY INTERTUBE™

784 Reasons to Celebrate

The party's over for all dumb terminals and a lot of smart ones too. But, at \$784 (quantity one), the party's just beginning for Intertec's INTERTUBE.

Standard features to celebrate include a full 24 line by 80 character display, 128 upper and lower case ASCII characters, reverse video, complete cursor addressing and control, an 18 key numeric key pad, special function keys, blinking, a self-test mode, protected fields, line and/or character editing capabilities, eleven special graphic symbols and an RS-232 printer port.

You'll discover even more reasons to celebrate when you sit down in front of an INTERTUBE. Our special AccuDot focusing technique produces crisp, sharp characters on a non-glare screen. INTERTUBE's Z-80 processor assures extreme flexibility with operator oriented features to boost the efficiency of both software and programmers. And, if service is ever required, INTERTUBE's well-designed modular component layout insures quick service by a nationwide factory-trained network providing more than 250 local dealer and service center outlets.

INTERTUBE's combination of price and performance can satisfy your requirements whether it be a sophisticated data entry application or a simple inquiry/response environment. So, there's really no reason to think "dumb" when you can afford to be so smart!

There's an INTERTUBE celebration going on near you. Contact us at one of the numbers below for the name and location of the nearest party. We'll be surprised if you don't come (BYOB). Happy INTERTUBE!
