Editorial

Since its foundation in 1986 *Liquid Crystals* has implemented a policy of changing its Editorial Team in order to bring new ideas and new areas of our subject to prominence. Thus members of the Editorial Board normally serve for a period of four years, although in its early years this period has been extended to allow for continuity. This policy has worked well and the Journal has clearly thrived; it has grown in both size and more importantly in stature. Now that the Journal has established itself, it seems an appropriate time to make a change in the co-editorship. It has been agreed, therefore, that Professor Geoffrey Luckhurst will retire from the editorship in June of this year. He will, of course, continue his association with the Journal and will join the Editorial Board. We are delighted to be able to announce that the new Editor is to be Professor George Gray. Professor Ed Samulski will continue as the Editor based in North America. With their complementary knowledge of, and extensive contribution to our subject the continued success of the Journal and its tradition of service to the liquid crystal community are assured.

Accordingly from 1 June 1992, authors in countries other than Africa, the Americas, the Middle East and the Far East should send their papers to:

Professor G. W. GRAY, CBE, FRS
Department of Chemistry
University of Southampton
Southampton SO9 5NH
U.K.

Professor Luckhurst will, however, continue to process those papers which he had received up until the change over.

G. R. LUCKHURST
University of Southampton

E. T. SAMULSKI
University of North Carolina
