## "Facts, Not Theory--A Scientific Approach To The UFO Phenomenon"

Theme of the 1973 Midwest UFO Symposium to be Held Saturday, June 16  
At the Plaza Inn, 45th & Main Streets, Kansas City, Mo. 9 AM - 10:30 PM

Speakers: Thomas H. Nicholl, John F. Schuessler, Ted Phillips, Adrian Vance, Stanton T. Friedman, Dr. J. Allen Hynek and Including a 90-Minute Documentary Film "Unidentified Flying Objects" by United Artists.

Complete Program and Ticket Information in May Issue, SKYLOOK  
(Not given in this issue as majority of our subscribers will not receive SKYLOOK until after June 16--we're sorry to say.)

SKYLOOK was first published in September 1967. Your editor also became the publisher in 1969 and SKYLOOK has been published every month since.

We were proud to be named the official publication of the Midwest UFO Network, May 1969.

You do not have to belong to MUFON to subscribe to SKYLOOK; but if you are a member, you'll find the best way to keep up with the organization plans and progress is by reading Director Walter H. Andrus' "Message" in each issue, along with "Organization Notes."

SKYLOOK is staffed by and for adults. Our policy is to tell it as it is, and we make every effort to separate fact from fantasy in investigating and reporting UFO's.

Readers are invited to send in reports. Credit will be given for material used, but anonymity promised when you request it.

The deadline for copy for next month's issue is always the 20th of this month. Please send material in as early as possible as we hold open only two pages for the morning mail of the 20th.

Mail all material for SKYLOOK to the editor. Enquiries re MUFON should be directed to Walter H. Andrus, 40 Christopher Ct., Quincy, Ill. 62301.

---

Where to Order MUFON Publications

The Field Investigator's Manual - guidelines, techniques and suggestions on how to conduct UFO sighting interview, investigation, report forms etc. Price: \$1.50 to MUFON members; \$2.00 to non-members, USA and Canada; outside, \$2.75. Order from Midwest UFO Network, Inc., 40 Christopher Ct., Quincy, Ill., 62301.

1971 Conference Proceedings - \$3.00 in US and Canada; \$3.75 elsewhere. UFO Study Group of Greater St. Louis, Inc., Box 9, O'Fallon, Mo. 63366. 1972 Conference Proceedings - a big book, speeches made at 1972 Conference, and a wealth of material on UFOs. \$3.25 in USA and Canada, \$4.00 elsewhere. Order from Midwest UFO Network, 40 Christopher Court, Quincy, Ill. 62301.

The above are highly recommended by your editor.

---

## A Message From Your Director

MUFON has outgrown its regional name many times in the past year as we spread throughout North America. It is a pleasure to announce that John B. Musgrave, 10510 - 86th Ave., Edmonton, Alberta, Canada T6E 2M6 has been appointed Provincial Director for Alberta. John is Investigation Chairman for the Edmonton UFO Society and is already submitting some of the best UFO sighting reports in his file plus current news clips.

Our search for a man with the interest, enthusiasm, and leadership to serve as State Director for Iowa has culminated in the assignment of Ralph C. DeGraw, Route 1, Hazelton, Iowa 50641, Telephone: AC319-636-2620, to this post. As the former State-Section Director for Buchanan and Fayette Counties, Ralph has selected Leroy R. Latham, 132 -2nd. Ave., N. W., Oelwein, Iowa 50662, Telephone: AC 319 283-2416 to fill the position of State-Section Director for Fayette County. Leroy has been a MUFON Field Investigator since December 27, 1971.

Charles G. Kahlert, Ph. D., 224 Harvard Lane, Seal Beach, Calif., 90740, Telephone: AC 213 596-0988, has volunteered to serve as a Consultant in Engineering to MUFON as well as a Field Investigator. Elmer Kral, State Director for Nebraska, has filled a vacancy in Douglas and Sarpy Counties with the selection of George R. Wilken, 9424 Ohio, Omaha, Nebr. 68134, Telephone: AC 402 393-4962 as State-Section Director. George is a meteorologist with the National Weather Service. Additional training in geology, geography, and oceanography helps to "round out" George's educational background.

MUFON is fully cognizant of the fine work being done by competent and reputable UFO organizations, societies, and publications throughout the world. Where such organized groups exist, we will select individuals within those societies to serve as "Representatives" for MUFON to act as liaison between the groups. We will thus be providing a liaison contact as a means of sharing UFO research, sighting reports and mutual activities. Joseph M. Brill, widely known for his specialized research in "UFO's Behind the Iron Curtain," through SKYLOOK articles and the 1972 Midwest UFO Proceedings, has been appointed to the staff position of "International Coordinator" for our Representatives in foreign countries outside of North America. Developing a competent contingent of translators also becomes one of Joe's responsibilities. Mr. Brill's address is 228 North 12th St., Quincy, Ill., 62301, U.S.A.

Mr. Harold H. Fulton, 81 Sutherland Crescent, Palmerston North, New Zealand, has previously been appointed to the position of MUFON Director for New Zealand, and will serve in this capacity. Harold is best known throughout the world as the Dominion President of Civilian Saucer Investigation (N.Z.) and as editor of their publication "Flying Saucers", changing the name later to "Space Probe." Mr. Fulton will coordinate speaking engagements for Dr. J. Allen Hynek when he visits New Zealand during the middle of August 1973. We extend the "hand of friendship" to Mr. Fulton, who has established an enviable record in the field of Ufology.

On May 8, 1973, Henry McKay, Michael Sinclair and John McDonald arranged for the Toronto UFO group to meet in the home of Dr. George Owen and his wife Iris at 10 Sherbourne St., Toronto, Ontario, M4W-2T2. Your Director had the pleasure of meeting with this distinguished group, sharing current UFO sighting reports and describing MUFON as an organi-

## The Carlyle Lake UFO Skywatch and Picnic To Be Held July 21st and 22nd.

---

The annual UFO Skywatch and All Day Picnic will be held at the Boulder Access to Carlyle Lake in Illinois on July 21st and 22nd.

The Skywatch will kickoff the week-end event, starting at dusk on Saturday. Dr. Willard P. Armstrong will direct communications post set-up around the lake. Mr. John Preisack, Assistant Director of the McDonnell Planetarium in St. Louis, will be present to point out the heavenly bodies and answer questions from those of us who are not familiar with astronomy. We hope the rainy season will have passed and we will have clear viewing--to continue as long as anyone is interested.

The All Day Picnic will start promptly at 10:00 AM on Sunday with the morning hours spent in "socializing" and getting acquainted, with the pot-luck dinner at noon. Those attending are asked to bring a contribution to the dinner. Drinks will be furnished by the picnic sponsors.

Mr. Lucius Farish, UFO researcher and writer, will be the guest speaker in the afternoon program. Also speaking will be Mr. Walter H. Andrus, Director of MUFON; John F. Schuessler, Assistant Director of MUFON and Director of the UFO Study Group of Greater St. Louis, whose subject will be "UFOs - A Scientific Fact"; and Mr. Clarence O. Dargie, State Section Director of MUFON, who will speak on "UFOs and the Bible."

A new feature this year will be a flea market sponsored by the UFO Study Group of Greater St. Louis, and will consist of donated articles--UFO books, antiques, arts and crafts or whatever "you" wish to contribute. Proceeds will be used by the Study Group to help finance the many fine projects the group makes available to the public at no charge. Many have enjoyed lectures and films sponsored by the group, and plans are being made for future presentations.

Another feature of the program we'll reserve as a "surprise"--and you'll be interested!

The Boulder Access is located northeast of Carlyle, Ill. on the Boulder-Ferrin Road. Follow the arrows from the Boulder-Ferrin Road sign on Highway 50, and you can't miss it. Or, if you like, send a self-addressed, stamped envelope to Mrs. Rosetta Holmes, 1690 Hill Drive, Carlyle, Ill., 62231 for a map of the area.

The Boulder Access is a delightful spot for recreation with a large area for campers and tents. There is swimming, boating, hiking and you can even ski! A beautiful wooded area surrounds the shelter house, providing a playground for children, and cool shade for those who want to relax and visit. It is suggested you bring your own lawn chairs. While there are picnic tables and benches, all may be taken as the day goes into the afternoon hours, and you'll enjoy the convenience of having your own chair.

For those who would like to make motel reservations, we recommend two located north of Highway 50 on 127. They are the Hi-De-Ho Motel, Phone: 618-594-2474 and the Motel Carlyle, 618-594-2444.

Each year the skywatch and picnic grows in attendance and popularity, and we hope to make this one the best ever! You don't have to belong to any UFO group to attend--you don't even have to be interested in UFOs; but if you aren't when you arrive, we guarantee you will be when you leave!

This is a "fun" event--you won't meet a stranger at the picnic--and you'll probably join others who have attended in the past and made lasting friendships. The informal atmosphere promotes the feeling of good will and fellowship that results in all saying, "I'll be back next year."  
---Rosetta Holmes

Interest in Piedmont, Mo. UFOs Continues - Physics Department Head Says Lights Follow High Frequency Paths - Research Chemist Says "Plasma"

\*\*\*\*\*

The Piedmont UFO story continues. News clips continue to come in, and again we thank all who send them--too many for separate listing, but each one appreciated.

In a story out of the St. Louis "Post-Dispatch" John H. Mullen, a research chemist working primarily in the field of plasma gas at the McDonnell Douglas Research Laboratories made two trips to Piedmont to satisfy his own curiosity, not in connection with his work. He is an amateur astronomer and took a 400-power telescope with him. He saw some of the UFOs pointed out by viewers and said they were definitely stars.

He says stars do have an unusual appearance in the Piedmont area because of the lakes and high water causing excess moisture in the air, giving a prism or rainbow effect to bright stars, especially near the horizon.

"I didn't see any of the glowing balls that have been reported, but the people who have sighted them give descriptions that exactly fit hot plasma gas. Plasma balls never have been completely verified, but they are akin to ball lightning," Mullen said.

Glowing balls of plasma gas usually are reported in the general area of high-voltage power lines, Mullen said. All reports of the glowing balls of light in the Piedmont area have been near a high-tension line, he said.

In the May 3rd edition of the Malden "Press-Merit," a story out of Cape Girardeau states that Dr. Harley D. Rutledge, head of the physics department at Southeast Missouri State University, at Cape, says the mystery lights he has observed in the Piedmont, Mo., area appear to follow very high frequency omnidirectional (VOR) flight paths.

Dr. Rutledge, one of a university team attempting a scientific study of the phenomenon, said he observed four lights April 13, three from the north and one from the south, following VOR lines.

"I am not going to speculate, but just report what I observed," he said. "However, we are looking for correlations in our data to give us a clue as to the type of phenomena."

VOR beacons emit a high frequency omnidirectional signal, used by pilots in navigation along their flight paths. Two of the moni-range signals intersect above Brushy Creek near Piedmont. These paths are from a station at Vichy, in the south central part of the state, to Malden in the Bootheel, and from Farmington, Mo., to Walnut Ridge, Ark.

Rutledge said the first light he observed was about 7:15 p.m. He described it as "a white light, brighter than any of the stars, which did not appear to have any shape." He said it passed in front of him and his observers, from north to south at an angle of 10 degrees, and was visible about three minutes. The second sighting was at 7:27, the third at 9:20 and the final sighting at 10:45. At a distance, the lights appeared to have color, but seemed white as they approached.

He checked the Federal Aviation Administration which confirmed there were no airplane flights in the Brushy Creek area at the time of the sightings.

Dr. Sidney Hodges, Prof. Milton Uekeke and Dr. James E. Sage are working with Dr. Rutledge in their "Project Investigation"--equipment used includes radio communications, photography, light spectrum and polarization measurement.

Dr. Rutledge also checked with the Smithsonian Astronomical Observatory in Cambridge, Mass., on the possibility that the lights could be caused by satellites.

"But Al Cornell, director of the Worldwide Moon Watch Team at the observatory told me he was of the opinion that what I observed could not be lights due to satellites in orbit," Dr. Rutledge said.

At Charleston, Mo., roughly 50-60 miles east of Piedmont, Mrs. Dorothy Thompson was getting ready to watch the 8 o'clock movie on TV, the night of April 6. Her television set went off, then came back on and she saw a bright light flash in her kitchen. She looked out the back door and an egg-shaped object was at treetop level. The top was red and the bottom solid white. The lights did not flash and it made no sound, she reported to "The Daily Standard," Sikeston, Mo., which carried the story on April 17. "As God is my witness, it really happened to me," she said. "One may be skeptical about such things, but when one sees it with their own eyes, they know it is so! . . . it was really weird and unnerving."

Ron Jaynes, of the "Daily Standard" staff received a call about 8:45 p. m. April 18 that three UFOs were sighted west of Malden. They were flying in a triangular pattern and seemed to be moving very fast. Each had red, green and amber lights which were flashing. Jaynes viewed the objects for about five minutes, then called the Blytheville, Ark. Air Force Base. At that time, they reported nothing on the radar and reported no known planes in that area. The only known aircraft were about 60-80 miles west of the area in which the lights were seen. The radar did pick up two small objects that were stationary and which the air base watched for about 40 minutes. They classified these as ground objects.

Forty minutes later Jaynes called back to the air station. While he was talking to them, they picked up three objects in a triangular pattern that were apparently moving. The person manning the radar said he couldn't explain it, but there was something there.

The radar operators at the air station said they had heard about the sightings, apparent UFOs, but had not been contacted before to check on them. This account appeared in the April 19th "Daily Standard."

In the mean time in the Wayne County "Journal-Banner," readers continue to report seeing UFOs, even in the items known as "country correspondence"--neighborhood news from various surrounding areas. Example--under "Ellsinore News" the following: "Mrs. Nada Jett tells us she recently saw one of the Unidentified Flying Objects flying low at the Crites Corner home of Mrs. A. S. G. Carnahan, 4 miles west of Ellsinore."

One Piedmont farmer reported damage to his fences because of excited horses and cows running from UFOs. Another farmer said he was watching Channel 12 on television and the channel automatically changed to Channel 8 (which he never gets) when a UFO passed over his home. Both men said their night lights (set for from dusk to daybreak) went out when the UFO passed over their farms.

It was reported that a "landing site" had been found in a wooded area near Ellsinore, but investigation disclosed that a tree had been struck by lightning and splintered about 20 feet above ground. Trees in the area having "scars" were examined and it was apparent these were caused by falling branches over a period of several years.

This is SKYLOOK's third report on the Piedmont area sightings. We hope our readers will continue to send in news clips, and we'll do our best to keep you informed on the latest developments.

-----  
Note to Readers: A sample copy of SKYLOOK is 45¢ by mail; 35¢ at the SKYLOOK table at the Kansas City symposium.

## Was Occupant of UFO Doing A Sky Walk? - A Report From Pennsylvania

On the night of April 15, 1973, at 10:55 o'clock, the lone witness had just passed the Manor (Pa.) Power Plant and was going around the bend coming up on the Wegley road when he observed a very large, white glowing object across the railroad tracks and just above the trees. The whole area was lit up by the glow from the object.

The observer pulled off the road and got out of his car to watch the object about 70-100 yards distant, and 400 yards east of the power plant. The object appeared to be about 10 feet above the tree-top level and lit up the entire area with a "burning white glow." It was described as being about 36 feet in diameter and "like a spinning top." The light seemed to stay at the same intensity but was diffused on the edges. The object had a dome structure on top, with two or three rings of lights around the main section. There were square windows emitting different colored lights. The witness is not positive, but believes one row of lights was white, another red, and the third of blue and green.

The most interesting aspect of the sighting as reported to Stan Gordon, Director of the Westmoreland County UFO Study Group and State Director for MUFON, was the witness stating that "something" was out from the object and he compared it to "how the Apollo men walked out in space, some kind of image like that."

Out from the left center of the object appeared to be some type of rope or beam of light that extended out some 30 yards and was attached to some type of form. The witness was not quick to say it was a human form, but described it as "like a torso or bulk about 8 to 10 feet tall and purple or orange in color."

The witness did not actually see the object being retracted back into the craft but compared its disappearance to a string of lights all on one circuit going out when you turn the switch. As soon as this happened, the object took off "like a meteor" and disappeared toward Harrison City. The object had been "spinning" while in a stationary position.

The witness stated he had left the engine running and the lights on when he left his car. In about 3-4 minutes, the engine stopped "just like that" (a click of the fingers) and the headlights went as dim as a weak flashlight. When the object left the scene, the lights came on "real bright"--the witness started his car and went on to a gas station where he called the state police to report what he had seen.

He said he had heard a high-pitched sound "like a spinning top makes" when the object took off. "You could hear the trees blowing," he said, as the object went over them.

The police referred the witness to Stan Gordon who reports the man was shaken by his experience and his voice was trembling as he described his experience.

Other sightings were reported that night by a dozen witnesses or more in a mile area comprising the two small communities of Penn and Manor outside the city of Jeanette. It is a desolate area and is draped with 500 KV. high tension power lines and has frequently been the scene of unexplained UFO activity over the years.

Some of the sightings reported that night were quickly identified as aircraft in the area, but it is obvious that a number of observers saw the same, or similar object, as reported above. It was quickly established that a sky ad aircraft from the M and D Corporation of Latrobe was not in use.

Editor's Note: We hope to report the other sightings at a later date. As we didn't have room for the complete report, we selected the most interesting sighting. In reading it, remember it was backed up by other reports, some with more than one witness.

Missouri Man Sees UFO -- Bill Brady, an employe of the Auto Body Chrysler plant at Fenton, Mo., was at the back of his home in St. Louis, about 9:20 PM March 8, 1973 when he saw a glowing, orange-colored object moving at terrific speed about 75 feet above the ground. The object appeared to be about 40-45 inches in diameter and was disc shaped. When first seen it was hovering. The night was dark with no moon, but the orange glow from the object was so bright Brady could see objects (his childrens' toys included) on the ground of his back yard. He stepped outside for a better view, and the object moved off at "terrific speed" in "a cork screw" motion and seemed to drop sparks compared to sparks off hot metal. The witness spoke to five other adults in the area, who also saw the object, but did not want their names used in the report made to David Schroth and Bill Christian, of the UFO Study Group of Greater St. Louis.

Iowa Sighting Recalled --Mrs. Helen T. Wark, 16 E. Parkway Ave., Chester, Pa., 19013, would like to know if others saw the same unidentified sky object she and other witnesses observed sometime between August 3-15, 1968. Mrs. Wark was visiting friends in Fairfield, Iowa, and all were sitting on the lawn watching the Pleiades meteor shower. To their surprise a round object with a yellow-white glow and a black ring around the center passed overhead and later returned, again overhead, but apparently at a much higher altitude. There was no sound of a motor, but a faint humming sound could be detected. No one present believed the object to be a plane, but had no solution. We hope some of our Iowa readers will check their files for sightings at this time--and let us know what they find.

Another Round Object With Band Seen -- Andre Lipa, of LaGrange, Ill., and a friend were on a fishing trip near Fremont, Wisconsin, in 1962 when they saw an object whose description fits the object seen by Mrs. Wark (above). It was May 23rd on a clear night with a full moon. The two men saw the object about 2 AM. When first seen the object was overhead heading west. It stopped briefly, hovered, moved to the north and then again to the west where it disappeared from view. Lipa said the object was round, a bright orange in color and seemed to have a wide band around the middle. There was no sound. The report was made to Larry P. Rybak, a MUFON state-section director for Illinois.

MUFON Investigator Tells of Sighting -- Larry P. Rybak, now state-section director of MUFON for Illinois, recalls UFOs seen by himself and three companions in the spring or early summer of 1966. They were in a car on Ogden Avenue, Naperville, Ill., about 9 PM when all observed three oval-shaped objects moving in formation in the western sky. They stopped the car to get out for a better view of the objects which hovered and moved from right to left in aimless fashion, then suddenly "flew off north faster than anything known" in formation and disappeared. The objects were described as being as bright or brighter than a full moon and surrounded by "a slight fuzz." There was no sound and no vapor trail. The men reported the sighting to the police and to the air force.

Youths Photograph UFO in California -- Richard Coimbra and Curt Huettnner, both 15, Thousand Oaks, California, were filming a movie for a class on Feb. 8, 1973. Using still photography the youths had mounted the wording for a title shot on a piece of glass and were shooting skyward to catch the effects of the clouds.

They took a picture of an object which they estimated to be perhaps 800 feet in the air and one half to three quarters of a mile away from their site. Curt thought the object might be 70 feet in diameter. "It was silent. There was no hum, flame or smoke and it looked to be rotating. We saw it for about 30 seconds then it went behind the trees and clouds and out of view."

Before seeing the object, the boys noticed three or four regular commercial planes in the area and at first thought the object they photographed to be one, then were convinced it was not.

Curt, who is interested in the space program, thinks the object could be some kind of government experiment. Richard, who says both his father and his grandfather have seen UFOs, thinks intelligent life from some other galaxy may have been piloting the aircraft.

A picture of the "UFO" and a report of the sighting appeared in the March 20th edition of the Thousand Oaks "News-Chronicle" and was sent to us by Lt. Col. R. F. Bowker, a MUFON state section director for California, along with his report of an interview with Curt Huettnner.

UFO Crosses Road in Front of Michigan Couple -- On the night of December 2, 1972, Mr. and Mrs. Charles E. Stanley and their granddaughter, Lisa Baker, 8, were driving from Adrian to Saline, Michigan when they observed what appeared to be a metallic object with a long yellow tail to the right of their car. This object curved and flew across the road in front of them at a distance of approximately 50 feet. It then continued its arc to the left where it disappeared as if "turned off." It is interesting to note that Saline is 13 miles from Dexter, Michigan, the site of the 1966 "swamp gas" sighting.

Stanley, 47, of Ann Arbor, has been employed as a machine set-up man with the same firm for nearly 30 years. He impressed the investigator, Robert L. Stinson, a State-Section Director for MUFON, as being a sincere, mature person who has been troubled by his experience and is desperately trying to find some explanation for the sighting. Mrs. Stanley, employed as check auditor in the bookkeeping department of an Ann Arbor bank, made an equally good impression. Neither were versed on UFOs and did not "believe" in them prior to their experience.

The weather was unseasonably warm for December and the sky was partly cloudy. There was some snow on the rolling farm fields near Saline.

The Stanleys were returning to Ann Arbor by way of Saline following a church meeting and a shopping trip in Adrian. They were heading northeast on U. S. 12 (Michigan Avenue), a route quite familiar to them as they had traveled it many times. Mrs. Stanley was at the wheel of their 1972 Oldsmobile and the sighting took place at approximately 1½ miles southwest of Saline at 10:15 PM. No other cars were nearby at the time of the sighting, nor do they recall any conventional aircraft in the vicinity.

Their attention was directed to a bright, fiery object to their left and about 100 feet perpendicular to the direction of the car. They estimated the object to be approximately 75 feet above the ground. Both adults had the impression they were watching a plane on fire and crashing. Mrs. Stanley slowed the car to 10 mph to avoid danger from any explosion or flying debris. The object was moving at a "slow plane speed." Its path was described as a rough semicircle around the car from right to left. When the object was directly in front of the car, it made a sudden maneuver which the witnesses attributed to "recognition" of their car being unexpectedly closeby. However, further investigation revealed the object most likely maneuvered over or under

some high-tension power lines which cross the highway at precisely that spot. The witnesses agreed that the object, when directly in front of the car, was about 50 feet distant (possibly 75 at most), about 30 feet above the road, and viewed at approximately a 30 degree angle. The sighting ended abruptly when the object "winked out like a light" when it was off to their left over a field. They estimate the object was 200 feet from the car and 50-75 feet in the air when it went out. In retrospect they both feel the fire was actually a strong, bright light attached to a physical object which maneuvered to avoid their car. They did not feel that fire or red hot material could "turn off" as quickly as it appeared to.

The leading part of the object appeared to be a pale silver-blue metallic lopsided sphere with a long smoothly tapered tail and a shorter top fin. The long tail, first described as a flame, was later thought to be a cone of pale yellow-white light projecting back from the sphere a distance of approximately 50 feet and on a slight incline. The witnesses stated an alternative explanation was that this cone of light was actually reflecting off or from a surface. The small fin was described as being a vivid bright orange, the color of red hot metal. On the underside of the sphere and towards the rear (under long tail) there appeared to be some shiny material that twirled, sparkled, or scintillated. Just before the object extinguished, this "sparkler-like" area seemed to be more noticeable. The object maintained the same attitude or profile towards the witnesses in the car throughout its arc. The Stanleys estimated the size of the sphere as 12 feet in diameter and felt it subtended about 4 inches (vertically) at arms length. This would figure out to be approximately a 13 foot diameter using an estimated distance of 75 feet and 22 inches as arms length. The tail was 3 to 4 times the length of the sphere, and the fin projected 4 feet from the object at between a 45 and 60 degree angle. The witnesses emphasize that the most startling part of their observation was the way in which the object "winked out."

The Stanleys continued into Saline and stopped for a cup of coffee . . . "to gather our wits." They then went to the police station to report the sighting. The police report that Stanley was highly agitated when he came in and that initially they did not believe his report.

An armed robbery occurred shortly after the Stanley report, and no patrol cars could be spared to investigate the UFO incident at the time. Other reports of lights/objects in the sky were telephoned in, but again they were not able to investigate.

A check with the Washtenaw County Sheriff Department revealed that they too had received several calls about UFOs near Saline, and they dispatched a car to investigate. However, the car was detoured to the robbery site in Saline and the report was forgotten. Both the Clinton and Ypsilanti posts of the Michigan State Police received reports of UFOs in the general vicinity and a patrol car from the Clinton post was dispatched to investigate--and it was sidetracked due to a bad traffic accident on U. S. 12 near Clinton. Unfortunately, none of the police agencies bothered to record the names of people making the calls. One did remember the name of Douglas but further investigation was unable to locate anyone by that name who had witnessed the sighting.

Mr. Stanley returned to the Saline Police department the next morning and he and Officer Connor inspected the scene of the sighting with no result. Also, Dispatcher Walters searched surrounding fields on both sides of U. S. 12 for over 3 hours with nothing unusual found. Inspection of Stanley's car failed to show any burns or other strange

effects. Inspection of the terrain where the object was alleged to have disappeared showed no drop off or hill that could have suddenly obscured vision, so its sudden "winking out" remains unexplained.

In concluding his excellent report of the investigation, Mr. Stinson states he believes the witnesses saw "a truly unexplainable phenomenon." We agree.

Two Pilots Report Chasing UFO Near Missouri Town -- Farmington, Mo. Two experienced pilots have told of chasing a glowing disc-shaped object near this southeast Missouri town before it outdistanced them in a burst of speed.

The aerial pursuit by Kenneth Pingel, a commercial pilot with more than 5,000 flying hours to his credit, is only one of the latest in a growing list of reported sightings of what many people in southeastern Missouri are calling an unidentified flying object.

Pingel said he was about to land his single-engine plane at the Farmington airport the night of April 12 when he and another pilot with him, Marvin Colyer, first saw the strange light off the left wing tip.

"The object was circular shaped and looked off-white in color, gradually turning yellow and taking on an orange tinge," he said. "It did not appear to spin."

As the plane made its final approach to land, Pingel said it looked like the object was directly in the plane's flight path.

"It looked like it was moving at us at a high rate of speed, so I pulled back and flew toward it," he said. "It immediately stopped, reversed its direction and flew away from us at a high rate of speed."

Pingel said he chased the object at 140 miles per hour for several miles before it disappeared. Colyer corroborated the story.

"We're both qualified for night operations and I've flown many nights under all kinds of conditions," Pingel, 23, explained. "This was definitely not a star or any kind of airplane and until someone explains to me what it is, I guess I'll have to say I saw a UFO."

Youth Reports UFO at Collinsville, Ill. -- Richard Barker, age 15, of 443 South Clinton, Collinsville, Ill., told the police he saw an unidentified flying object at 9:06 P. M. Monday night. He and several neighbors saw the object go overhead and the boy teased the others, saying it was a UFO. Actually, he said, no one could figure out what it was. Then the object returned, lower in the sky. It came to a dead stop about a half mile away. While it was moving it cast a flashing red light, which changed to another color and then went back to red. But when it stopped, a big white light appeared, Barker said. The object made no sound. The police suggested to Barker the object could possibly be a balloon, but Barker doesn't buy that. Not interested in UFOs until this incident, Barker says he now believes many people don't report UFOs because "people think you're crazy."

Collinsville police relayed the sighting to Scott Air Force Base. Officials there say they get four or five UFO reports every month. They don't do any investigating, but forward the reports to the FAA at Lambert Field.

=====

To our readers: Please send subscriptions to SKYLOOK, Box 129, Stover, Mo., 65078, and make check out to SKYLOOK (not MUFON). Thank you. Ye Ed

Editor's Note: Mr. Fawcett, of 607 North Main St., Mount Airy, N. C., 27030, has investigated, written and lectured in the UFO field for many years and is so well known as to need no introduction except to those who are just developing an interest in unidentified flying objects. Mr. Fawcett is a State Section Director for MUFON.

After 26 years of global UFO activity we now know what UFOs do, but are still unable to determine their nature and origin. Many patterns of UFO activity were documented by the late Charles Fort in 1934 in West Virginia and since that time others have been discovered.

Below are listed the well known and documented repetitions of UFO activity that we can count on in 1973. In fact, most of these repetitions have already occurred during the first quarter of 1973 (January-March).

We must seek and find explanations for the following listed UFO repetitions if we are able to obtain an eventual solution to the mystery of unidentified flying objects (UFOs) in our life time. Scientific studies should be so designed along these lines in the near future.

(1) Sightings of unknown flying objects that demonstrate superior speeds and intricate maneuvers beyond those of present satellites, rockets, space probes, aircraft and missiles.

(2) Radar trackings of UFOs, many times with simultaneous-radar and visual observations.

(3) Photos and movie films of UFOs.

(4) Pursuit of UFOs by planes in the skies and by cars on open highways.

(5) Falls of "fragments" and "Angel Hair," both metallic and non-metallic substances from UFOs overhead or from ground level.

(6) Increases in background radiation above normal after UFOs reported in the skies and on the ground.

(7) Near collisions and head on passes by UFOs reported by both military and civilian planes.

(8) Physiological effects such as electric shock, radiation burns, dimming of vision, blackouts, amnesia, weightlessness, temporary paralysis, blood disorders, deaths, etc. of observers in close UFO encounters both in the air and on the ground.

(9) Electro-magnetic (E-M) interference reports caused by UFOs on compasses, plane and car motors, headlights, houselights, searchlights, radar beams, radios, TV, wrist watches, electric clocks, communication devices, telephones etc.

(10) Skyquakes, sonic booms, a variety of sounds detected during UFO appearances.

(11) Smells such as ozone, sulfur, ammonia etc during UFO encounters.

(12) Landings and near landings (hovering) of UFOs and their occupants.

(13) Hostile acts due to UFOs (both towards and from these objects) with increased shooting incidents by both frightened eye witnesses and provoked UFO occupants. Various devices will be tested utilizing waves of light and waves of sound.

(14) Reports of so-called 'contactees' of space visitors and UFOs.

(15) Straight lines of flight related to UFOs.

(16) Reputable sightings by scientists, astronomers, physicists, pilots, police, astronauts, control tower personnel, radar trackers, and other trained and competent observers of UFOs.

(17) Appearance of "little men" (apparently humanoids) and other type occupants in relation to worldwide UFO landings, hoverings, who will be reported to have taken rocks, vegetation, soil, water, sand, animals,

flowers etc. Additional cases of human kidnappings.

(18) Periodic cycles of UFO increased sightings every 26 months, 5 years and 10 years in large numbers. 1973 has already produced a large global "wave of UFO sightings."

(19) Unique shapes of UFOs, especially discs, domed saucers, cigar or rocket-shaped objects, crescents and half-globes.

(20) Revolving wheel-like machines in oceans, seas, vast masses of water such as lakes and rivers also reservoirs reported by witnesses aboard ships, planes and by ground observers.

(21) Depressions, craters, holes, markings, burned areas on the ground due to UFO worldwide landings.

(22) Increased power failures due to UFO activity, with possible occasional blackouts in both local and large areas as well.

(23) Severe animal reactions to close approaches of UFOs.

(24) Increased private, public, scientific, military, theological, news media interest in this growing, global international scientific problem.

Message From Your Director - Continued from Page 1

zation and its objectives. Both Henry and John attended the 1972 Midwest UFO Conference in Quincy, Ill.

As the date June 16th approaches, anticipation and excitement crescendos, as people all over the United States and Canada confirm their plans to attend the 1973 Midwest UFO Symposium in Kansas City, Mo. To add international flavor to the event, Mr. Dominique Freymond, representing "Federation Suisse D'Ufologie" (a federation of Swiss UFO groups), has made arrangements to avail himself of this unique opportunity while visiting in the United States.

We are looking forward to meeting all of you in the "Heart of America" for what promises to be our finest symposium to date.

Walt Andrus  
Director, MUFON

WILHELM REICH, M.D., a scientist and UFO researcher, died in prison. His books were banned and burned. His discoveries hold the key to planetary survival and the UFO Invasion. Stamp brings free pamphlet, "Orgone Energy." Address: Eden, Box 34, Careywood, Idaho 83809. --Adv.

SPECTRUM, issued quarterly to PSI Associate Members. For a free sample, write to Editor, Joan O'Connell - 109 South Drive, Copperas Cove, Texas 76522. Membership dues (\$4.00 per year) to Director, Ramona Clark, P. O. Box 50605, Jacksonville, Beach, Fla. 32250. -- Adv.

Editor's Note: SKYLOOK readers will be interested in knowing that Joan O'Connell is the former editor of SAUCER SCOOP, a fine UFO magazine with a big circulation when SKYLOOK drew its first breath back in 1967. It was our model and we were sincerely flattered when the time came when someone would compare our ufozine with Joan's. We were sorry when S. S. became a drop out and we're glad the editor of SPECTRUM is back in the writing field again. This magazine deals with many subjects --from tape recorded voices from the dead to reports of encounters with beings not of this planet--the kind of material your conservative editor considers "far out"--and we realize that is exactly what many readers prefer. Send for a copy and make your own decision. And--welcome back, Joan, and good luck.

The following is from the March 16, 1968 issue of "Magazine," No. 545 of Bucharest, Romania and was authored by Ion Hobana.

More Flying Saucers Seen Over Romania -- From the city of Petrila, I received a letter from a Mr. Ladislau Schmidt, whose statements I will hereby quote:

"On November 22, 1967 at about 12:30 p. m., having stayed home, I was in the kitchen with the doors open. Suddenly I saw all the chickens running around, very frightened and coming towards me without being called or attracted with feed. I chased them out, but they came back immediately into the kitchen, even more frightened, almost flying and trying to hide. Then I chased them out again, this time following them out into the backyard. I thought there might have been a hawk around. Moreover in their fright they kept looking up and I looked up and saw very distinctly a very bright object like silver or aluminum, with the form of a disc. In the lower part a small swelling was visible and in the upper part a much larger swelling was visible and with extentions in the form of rods which resembled antennas.

"I called my wife to come out and see it. Then we both ran into the street and followed it. At this time the object which was at an altitude of about five thousand meters, had the size of a hat of a cowboy. I should mention that the first time I saw it from the yard, it was standing still in the air, and when we came out into the street it began to rotate and departed with great speed to the northwest, screwing itself into the sky until we could not longer see it, fading at a great distance in the sky until it was only the size of a ping-pong ball.

"At the time of this event I called the attention of the citizens who were in the street, among them Gyorgy Iuliana and some workers from the I.L.L., who were repairing the roof of the food store across from my house. I would also like to say that the weather was perfect and the sky was very clear." Sketch by Schmidt.

(Another UFO report made to Ion Hobana next month)

---

### National Enquirer Gives \$5,000 Award to Johnson Family

The Durel Johnson family of Delphos, Kansas, was given the \$5,000 award by the National Enquirer for supplying the most scientifically valuable UFO evidence in 1972. The Delphos case was one of more than 1,000 claims for a \$50,000 award for the first person "who can prove a UFO came from outer space and was not a natural phenomenon."

The Enquirer panel composed of Dr. J. Allen Hynek, Dr. R. Leo Sprinkle, Dr. Frank B. Salisbury, Dr. James Harder and Dr. Robert Creegan (the latter abstaining from the vote) agreed none of the claims merited the \$50,000 but the Delphos case did supply "the most scientifically valuable evidence" and was the most baffling case encountered in a full year of investigation.

Our readers know that Ted Phillips, of Sedalia, investigated the Delphos case and submitted the reports used by the panel in making their decision. He did not share in the prize money (which doesn't seem right) and the Enquirer did not even have the courtesy to give him credit for the investigation in their announcement of the award.

As the gasoline ad on TV says, "We'd like you to know."

## California Witness Says UFO Is Not Blimp

Editor's Note: We have a lengthy report on April UFO sightings in California, from Ann Druffel, and we're holding it as we don't have the space it deserves in this issue and do not want to condense it more than we just have to. The following from Mrs. Druffel is from a letter and we have her permission to use it just as written:--

Another "blimp" case turned up in Tarzana, Calif., a city about 15 miles northwest of North Hollywood, which was the scene of some of the sightings discussed in the enclosed report. / See above./

The Tarzana case occurred April 10, 1973 (within the time period of the Los Angeles Basin flap!) Two adults and a child saw a "huge, light-ed object with indescribable patterns of light flashing on and off. No advertising letters were seen. One of the light patterns involved the entire bottom of the object, which was tent-shaped on the top and rounded on the bottom. This light pattern was bright yellow, which is synonymous with one of the colors of the blimp, but the yellow pattern on the blimp is a yellow band around the center. The woman I interviewed swore it was not just a yellow band, but a light which glowed around the entire bottom. The object seemed very close to the witnesses and seemed to be hovering close to the ground over a vacant lot across the street. As it moved off after five or ten minutes, two other objects, flashing weird, similar light patterns joined it and the three flew off in a more or less straight line!

I called the blimp base and sure enough the blimp was in the Van Nuys area at the time of sighting (7:30 p.m.). Van Nuys is some 6-10 miles to the southeast of Tarzana. The woman would not accept the blimp explanation. She has seen the lights on the blimp and knows the shape of the blimp and she swears the object she saw had a different shape entirely. Note the similarity here with at least two of the witnesses to the Santa Ana blimp case / See March issue of SKYLOOK/ who swore the object was of a different shape than the blimp, even though the light patterns might have been similar.

The official at the blimp base to whom I talked this time is getting puzzled. He can't understand how the blimp can have been flying around this area since 1967 with its multicolored lights and "only now is being mistaken for UFOs." Frankly, I am getting a little puzzled too. Is it possible that UFOs are imitating the lights on the blimp for unknown reasons of their own?

Editor's Note: In a follow up letter, Mrs. Druffel writes: "I've since talked to persons who have seen the blimp cruising around Los Angeles skies, with all 7,000+ colored light bulbs and they swear in no way could it be mistaken for other than itself. 'It has Goodyear written all over it,' is the favorite comment. Needless to say, neither the Tarzana or Santa Ana witnesses saw any 'Goodyear' on the object they were viewing! But I don't want to go off the deep end. It is just an interesting situation, and one to keep our eyes on." Having read a number of Mrs. Druffel's carefully investigated and well written reports, we go along with any judgment she makes, and we're looking forward to learning more about what certainly is "an interesting situation."

=====

To Our Readers : Guess we better not announce articles for "next month" as we couldn't find room again for some fine material we planned to use this time. We'll try again next month. We DO appreciate all copy sent in and the best will appear in SKYLOOK sooner or later. We're sorry it often has to be "later." So please bear with us, and sincere thanks for your fine cooperation. --Ye Ed.

Tiptoe Through the Tabloids: The NATIONAL ENQUIRER has been featuring quite a bit of UFO material recently. The May 13 issue told of the March "flying Christmas tree" sightings in Pennsylvania. The May 20 issue gave comedian Jackie Gleason's opinions on UFOs, along with details of his two sightings. The May 27 issue announces the award of the ENQUIRER's "second prize" for UFO evidence to the Johnson family of Delphos, Kansas. It seems to me that a portion of the prize money should have gone to Ted Phillips, as his investigations of the Delphos landing were certainly of great value in the scientific evaluations of the mysterious landing site "ring." At any rate, I suppose this proves that it can be profitable to have a UFO land in your back yard! The UFO sighting of actor Ray Walston ("My Favorite Martian") is also featured in the May 27 ENQUIRER. - The May 6 issue of NATIONAL TATTLER tells of NASA engineer Josef Blumrich's theories of Ezekiel's "wheel." Blumrich considers that the object described by Ezekiel was definitely a spaceship. He has written a book detailing his ideas, but it has only been published in a German edition this far. - The May 13 issue of NATIONAL INSIDER details Northwestern University graduate student Michael Bauer's interviews of UFO witnesses and their reluctance to report their sightings. A very interesting presentation. - MIDNIGHT for May 21 tells of Hayden Hewes' search for remains of the alleged "crashed airship" of Aurora, Texas.

The bi-monthly magazine, BEYOND REALITY, is shaping up as a rather good source of UFO information. The third issue is now on the stands.

For those who have been fascinated by the recent news reports of the Scottish astronomer Duncan Lunan's "alien space probe" theories, Lunan's complete presentation of his views appears in the April issue of SPACEFLIGHT, the journal of the British Interplanetary Society (12 Bessborough Gardens - London SW1V 2JJ, England). Price, \$1.25.

A late, brief mention of the contactee story by Warren Smith in the May issue of SAGA. I only wish someone other than Smith had come up with this! Having read some of his "Eric Norman" books, I have reason to suspect him of presenting fiction as fact in some cases. So, unless the contactee story--fascinating as it is--can be confirmed by other reliable sources, I really can't give it much credence. The June issue of SAGA contains John Keel's article on UFO "hardware," as well as the first of Keel's monthly columns on matters ufological and Fortean.

Anyone who has read Pauwels & Bergiers' THE MORNING OF THE MAGICIANS or IMPOSSIBLE POSSIBILITIES will surely want to read their latest book THE ETERNAL MAN. It is another in the seemingly never-ending string of books dealing with the possibilities of advanced civilizations and/or space visitors in ancient times. There is a considerable amount of familiar material--the Piri Reis maps, the Sumerian legends of Oannes, etc.--but there is also a goodly amount of material not previously seen in similar volumes. From all parts of the world, in all ages, the authors present fascinating evidence of the hitherto-unsuspected antiquity of man and civilization. The book is available from Souvenir Press Ltd., 95 Mortimer St., London W1N 8HP, England; price is \$6.95. I would suggest that payments be made by a bank draft on Chase Manhattan Bank of N. Y., available at most banks.

Editor's Note: Mr. Farish informs us he's going to catch up on book reviews and will need more space next month. He'll get it. Tell your friends about Lou's column in SKYLOOK--the best way to keep up with what's "new" re UFOs on the news stands.

## The Stoney Creek Bridge Car Chase - Orland, California

---

Editor's Note: Paul Cerny, MUFON's Director for Northern California, heard of this interesting case and got the story in April of this year. While the sighting took place in 1967, none of the witnesses talked about their experience for several years, fearing disbelief and ridicule.

The sky was dark, but clear, at 2 AM in February, 1967 when three women--Mrs. Ruth Phillips, 54; Nita De Agio, 23; and Mrs. Margaritta Espinosa, 21, the latter driving, were going home from work at the Du-Shay Almond Company in Orland, California. They had passed through Orland and were heading out into the flat Sacramento river valley toward Hamilton City about six miles to the east.

Stoney Creek is a wide, sandy, and winding stream bed averaging 100 to 200 feet in width as it meanders lazily across the farm fields to join the river. Its actual water width in the sandy bed is probably 10 to 12 feet across. An occasional patch of brush and a few trees here and there dot its path. At the bridge on State Highway 32, a large sand and gravel company utilizes the vast supply of this material at the left side and on the approach to the long bridge.

As the car passed over the last section of the low railing bridge, off to the right side in a large sandy section of the stream bed about 150 feet away, an explosion and brilliant flash of white light startled the three occupants of the car. Immediately an elongated object with a row of square port holes, or small windows, ballooned into view.

The object rose swiftly at an angle of about 45 degrees, climbing upward in the same direction the car was traveling to about a half mile away at an elevation of 45 to 50 degrees from the observers. The speed of the car was about 55 mph after leaving the bridge area and on into the open country. The UFO paced the car at this speed for approximately six miles to the edge of Hamilton City where it suddenly zoomed upward and headed in the direction of Sacramento at high speed.

During the six mile pacing period the strange craft veered in fairly close to the car three times. On one approach the observers thought it was going to cross over the road in front of the car but it returned to its respective position about a quarter to half mile away each time. Mrs. Phillips described the UFO as cigar shaped. She said it reminded her of a submarine--the first comparison to come to mind. It appeared very metallic, apparently a dark color, but intricate details of the craft were difficult to distinguish because of the intense white light emanating from the row of square windows--so bright, the light hurt her eyes. The size of the object was estimated as two to three times the size of the car. There was no sound audible over the car engine noise, no E.M. effects and no exhaust trail visible. The object did not make any noticeable change of shape.

As they were approaching Hamilton City, the younger women, though nervous and apprehensive, began joking about seeing little men in the craft windows, but Mrs. Phillips said she was sure they were just joking as all she could see was the bright light coming from the square windows.

Several times in relating the event, Mrs. Phillips brought up the explosion sound they all heard on the bridge as the UFO took off and startled them. She described it as just one big "pop" like a champagne cork, or a concussion air pop, as someone popping an air filled paper bag.

Unfortunately, a return to the take-off spot the next day or later did not occur to the witnesses, as possible evidence might have been found.

The Constellations - Ursa Minor (The Lesser Bear)

ASTRONOMY

NOTES

\* \* \* \* \*

Ursa Minor means "The Lesser Bear " and covers the north celestial pole. It is circumpolar at the latitude of New York City. The constellation is also called "the little dipper." At the end of the handle of the dipper is Polaris (the North Star). Polaris is less than one degree from the north celestial pole. Polaris is a super giant more than 100 times the diameter of the sun and is extremely tenuous. The stars forming the bowl of the dipper are a good guide for magnitude as they are of the 2nd, 3rd, 4th and 5th magnitudes. Polaris, being one degree from the celestial pole, travels in a complete circle with a diameter four times that of the moon once every sidereal day. The star Kochab, which means "star of the north," was the pole star about 2000 years ago. --Mark Herbstritt.

The June Sky - Venus may be seen as an evening object setting at 8:30 PM (CST) on June 1st and at 9:00 PM on July 1st. Mars is an early morning object seen in the southern sky as it rises at 1:10 AM on June 1st and at midnight on July 1st. Mars will be growing in brightness into the fall. Jupiter is also a late riser, rising at 11:25 PM on June 1st and at 9:30 PM July 1st. Saturn becomes a morning object late in the month, setting at 8:10 PM on June 1st and rising at 3:50 AM July 1st. --Ted Phillips.

=====

Unusual Light Seen Near Stover, Mo.

On the morning of April 15, 1973, a bright gold-orange light was observed by a single witness as he was driving from Gravois Mills toward Stover, Mo. The object was first sighted as the witness was driving north on Highway 52, some two miles east of Stover. The time was 1:56 AM CST. The witness stopped his car and observed the light through 7 x 50 binoculars. The light was stationary at a point some 25 degrees above the horizon, was somewhat brighter than the planet Venus and appeared as a sphere. The witness decided to try and close on the light and drove west on 52 through Stover, turning north on Highway 135. The light was directly ahead of the car and was not moving. The witness was gaining on the light, now some 50 degrees above the horizon, larger and brighter. Suddenly, the light vanished as if one had turned off a light and was not seen again.

I can certainly state that I consider the witness to be a reliable observer.--Reported by Ted Phillips.

=====

With Our MUFON Members Around the Network . . . . .

Stan Gordon, Director of the Westmoreland County UFO Study Group, Greensburg, Pa., reports they have been swamped with requests for lectures from schools and organizations. The group has produced an electronic synchronized slide show entitled "UFOs--Greatest Scientific Mystery of Our Time" and it was presented for the first time at the Lincoln Heights Civic Center in Jeanette, May 22nd. The group is also now working directly with the county Civil Defense Organization and has set up a special radiation detection course with 20 field investigators and officers from the local civil air patrol unit taking part. The course is conducted by David Smith, a Greensburg Senior High School Physics teacher and consultant to WCUFOSG. Mr. Gordon has been asked by the C. D. Director to help set up an amergency communications radio system throughout the county to include radio operators from WCUFOSG, Civil Air Patrol, the National Guard and Ham radio operators. The WCUFOSG Control Center is in the Gordon home.

With Our MUFON Members Around the Network . . . . .

The Tri-State UFO Study Group will hold a carry-in picnic and sky watch (rain or shine!) at 6:30 P.M., June 20, 1973, at Wavering Park on North 36th Street, Quincy, Illinois.

The April 29th meeting of the UFO Study Group of Greater St. Louis had to be postponed because of flood conditions in the St. Louis area. The next meeting will be held on June 10, at 2 P.M. at the Lemay Bank and Trust Co., 152 Lemay Ferry Road, and all members are urged to be present for a work session in addition to the program. Volunteer to help assemble the 1973 Symposium Proceedings which will be sold at the Kansas City Symposium, June 16, and later by mail order.

Bill Christian, of St. Louis, has taped a 2-hour radio interview for KOPN-FM, of Columbia, Mo., which will devote considerable time to UFOs. It is a community owned station, but some of their programs go out to other stations, so see if you can catch it.

H. H. Fulton, our MUFON Director for New Zealand, has been involved in UFO research and investigation since 1947, served 24 years in the Royal New Zealand Air Force, and frequently addresses groups on the subject of UFOs. Since April he has spoken at the Young Farmers Club and Country Womens Club, the Palmerston North City "Jaycees, and the Marton Rotary Club. This month he will lecture to the Ashhurst-Pohangia Lions Club, and he is making arrangements for the New Zealand visit of Dr. J. Allen Hynek sometime between August 14th and Sept. 20th. Dr. Hynek will also visit Australia and New Guinea during this period. Watch for news reports re UFO sightings in New Zealand from Mr. Fulton. We have several on hand and will use them just as soon as we can find room.

The Denver U.F.O. Society, which meets at the New Columbine Room at the Jefferson Bank and Trust, Corner 14th & Wadsworth Blvd. the third Friday of each month, "reviewed" SKYLOOK at an April meeting, and this has resulted in some new subscriptions (which we welcome) and in their group giving publicity to the MUFON Symposium to be held in Kansas City on June 16 (which we appreciate). Victor E. Leroy, President of the group, tells us some of his members plan to attend. Their June meeting will be at the New Columbine Room of the J.B. T. Bank at West 14th Ave. and Wadsworth Blvd. While this group is not affiliated with MUFON at this time, we do appreciate their good will and cooperation and consider them "kissin' cousins." Okay, Cousins?

Dr. Willard (Bill) Armstrong, WQNC asks that everyone interested in assisting in the tracking exercises at the Carlyle Lake Picnic, (the skywatch July 21st - picnic, the 22nd) contact him his home, 6908 Kingsbury Blvd., St. Louis, Phone Ac 314-863-9177.

Lucius Farish, of Plumerville, Ark., will speak at the Carlyle Picnic the 22nd and we have just learned his subject will be "Mini-Saucers," the small, apparently remote-controlled objects which have been seen in many places. We didn't have this and the above item at the time we received the Picnic article, so mention it here, and will remind you again next month.

Ted Phillips, Stanton Friedman and J. Allen Hynek will appear on WHB radio, Kansas City, Mo., on the Walt Bodine program at 10 a.m. June 17. This follows the MUFON symposium the day before, with the three as speakers.

Ted Phillips was the guest speaker at a convention of Western Electric employees at the Leawood Country Club in Kansas City, May 31st, speaking on UFOs and inviting all present to attend the symposium on June 16th.

ARE YOU MOVING?

Please send us your change of address at once. Third class mail is not forwarded. SKYLOOK comes back to Ye Ed and we have to pay eight cents to get it back--then another eight cents to mail it to you when we receive your new address--and this gives us a severe pain in the budget.

A Red X By Your Name on the address label below means your subscription to SKYLOOK expires with this issue. So better look NOW as this is the only notice you will receive. Use the subscription blank enclosed and renew today before you forget and miss an issue or two. To our readers outside the United States--please do not enclose the currency of your country with your order. Remit by money order.
