332.-G. W. Spenceley, R. M. Spenceley, \& E. R. Epperson, Smithsonian Logarithmic Tables to Base e and Base 10, The Smithsonian Institution, Washington, D.C., 1952.
On page 383 , the mantissa of $\log 9005$ should read $95448 \ldots$ instead of 85448

This information supplements errata previously reported. See especially Math. Comp., v. 17, p. 103, where other references are cited.

Charles R. Sexton

## CORRIGENDA

John Brillhart, "Concerning the numbers $2^{2 p}+1, p$ prime," Math. Comp., v. 16, 1962, p. 424-430.

On page 428, delete the entry " $c$ " in the first column corresponding to $p=769$. No information is available at present regarding the factorability of this number.

## John Brillhart

University of San Francisco
San Francisco, California
John Brillhart \& G. D. Johnson, "On the factors of certain Mersenne numbers," Math. Comp., v. 14, 1960, p. 365-369.

Corresponding to the second interval, namely $103 \leqq p \leqq 157$, listed in section 2 on page 365 , for $p \neq 151$, read $p \neq 113$ and 151.

John Brillhart
L. Carlitz, "The coefficients of the leminiscate function," Math. Comp., v. 16, 1962, p. 475-478.

At the bottom of page 475, in the expansion of $p(u)$, the second factor in the denominator of the general term should read ( $4 n-2$ )! instead of $4 n-2$.
J.W.W.
