
STATEMENT OF OWNERSHIP, MANAGEMENT, AND CIRCULATION

(Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. Date of filing: September 27, 1967
2. Title of Publication: Mathematics of Computation
3. Frequency of issue: Four issues per year
4. Location of known office of publication: P. O. Box 6248, Providence, R. I. 02904
5. Location of the headquarters or general business offices of the publishers: P. O. Box 6248, Providence, R. I. 02904
6. Names and addresses of publisher, editor, and managing editor: Publisher: American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904; Editor: Eugene Isaacson, Chairman of Editorial Committee, P. O. Box 6248, Providence, R. I. 02904; Managing Editor: None
7. Owner: None
8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None
9. Paragraphs 7 and 8 include, in cases here the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 per cent or more of the total amount of the stock or securities of the publishing corporation.

I certify that the statements made by me above are correct and complete.—Gordon L. Walker

The editorial committee would welcome readers' comments about this microfiche feature. Please send comments to Professor Eugene Isaacson, MATHEMATICS OF COMPUTATION, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012.

Mathematics of Computation

TABLE OF CONTENTS

JANUARY 1968

On Difference Approximations with Wrong Boundary Values HEINZ-OTTO KREISS & EINAR LUNDQVIST	1
On Numerical Calculation of Transonic Flow Patterns S. BERGMAN, J. G. HERRIOT & T. G. KURTZ	13
Finite-Difference Methods for Nonlinear Hyperbolic Systems A. R. GOURLAY & J. LL. MORRIS	28
Explicit $O(h^2)$ Bounds on the Eigenvalues of the Half- L Estimating Optimum Overrelaxation Parameters BLAIR K. SWARTZ L. A. HAGEMAN & R. B. KELLOGG	40
Interpolation and Quadrature Methods for Ordinary Differential Equations G. J. COOPER	69
A Special Case of the Filon Quadrature Formula . . . LLOYD D. FOSDICK	77
Error Estimates for Gauss Quadrature Formulas for Analytic Functions M. M. CHAWLA & M. K. JAIN	82
Asymptotic Error Estimates for the Gauss Quadrature Formula M. M. CHAWLA & M. K. JAIN	91
An Error Analysis for Numerical Multiple Integration. I. ROBERT E. BARNHILL	98
The Use of the Hypercircle Inequality in Deriving a Class of Numerical Approximation Rules for Analytic Functions . RICHARD A. VALENTIN	110
The Lawson Algorithm and Extensions . JOHN R. RICE & KARL H. USOW	118
A Rational Approximation to the Logarithm R. P. KELISKÝ & T. J. RIVLIN	128
On the Evaluation of Integrals Related to the Error Function C. CHIARELLA & A. REICHEL	137
On the Calculation of the Inverse of the Error Function ANTHONY J. STRECOK	144
The Incomplete Beta Function and its Ratio to the Complete Beta Function DAVID OSBORN & RICHARD MADEY	159
Zeros of Sections of the Zeta Function. II. ROBERT SPIRA	163
On Designs of Maximal $(+1, -1)$ -Matrices of Order $n \equiv 2 \pmod{4}$ C. H. YANG	174
Amicable Numbers and the Bilinear Diophantine Equation ELVIN J. LEE	181
Numerical Evaluation of an Isoperimetric Constant Z. A. MELZAK	188
TECHNICAL NOTES AND SHORT PAPERS	
Proof that Every Integer $\leq 452, 479, 659$ is a Sum of Five Numbers of the Form $Q_x \equiv (x^3 + 5x)/6, x \geq 0$ HERBERT E. SALZER & NORMAN LEVINE	191
A Map-Folding Problem W. F. LUNNON	193
The Maxima of $P_r(n_1, n_2)$ M. S. CHEEMA & H. GUPTA	199
A New Approximation Related to the Error Function W. R. SCHUCANY & H. L. GRAY	201
Improvement in Recurrence Techniques for the Computation of Bessel Functions of Integral Order FR. MECHEL	202
The Zeros of $P_{\mu}^{-1}(\cos \theta)$ and $(\partial/\partial\theta)P_{\mu}^{-1}(\cos \theta)$. . . PETER H. WILCOX	205
Substitution Formulas for Laplace Transformations R. G. BUSCHMAN	209

Joyce Weil, Tadepalli S. Murty and Desiraju B. Rao, Zeros
of $J_n(\lambda)Y_n(\eta\lambda) - J_n(\eta\lambda)Y_n(\lambda)$ and $J'_n(\lambda)Y'_n(\eta\lambda) - J'_n(\eta\lambda)Y'_n(\lambda)$

The first ten positive zeros of the two functions specified in the title are tabulated to seven significant figures (4D to 6D) for $n = 0(1)10$ and $\eta = 0(0.5)0.95$. Details of the underlying computational procedure have been published [1] by the authors. The zeros of the second function were found in the same manner as those of the first, after use was made of the relation $Z'_n(x) = \frac{n}{x} Z_n(x) - Z_{n+1}(x)$, where Z_n represents either J_n or Y_n .

J. W. W.
