SUBSCRIPTION INFORMATION: MATHEMATICS OF COMPUTATION is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. Subscription prices for Volume 32 (1978) are $55.00 list; $39.00 institutional member; $20.00 individual member; $27.00 member of CBMS organizations. Combination paper and microform (microfiche or microfilm) subscription prices are $74.00 list; $52.00 institutional member. Microfiche of each issue will be mailed the fastest way before the camera copy is sent to the printer.

BACK NUMBER INFORMATION: Back number prices *per volume* are for Volumes 1–27, $36.00 list, $27.00 member; for Volumes 28–29, $54.00 list, $40.50 member; for Volume 30, $72.00 list, $54.00 member; for Volume 31, $84.00 list, $63.00 member. Back volumes are also available on 16mm positive or negative microfilm. The microfilm may be mounted on spools or in Kodak or 3M cartridges. Only current subscribers are eligible to purchase back volumes on microfilm. Write to the AMS for a detailed price list.

UNPUBLISHED MATHEMATICAL TABLES: The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to the AMS, P.O. Box 1571, Annex Station, Providence, R.I. 02901. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, R.I. 02940.

Second class postage paid at Providence, Rhode Island, and additional mailing offices.

MATHEMATICS OF COMPUTATION

TABLE OF CONTENTS

JULY 1978

Miloš Zlámal, Superconvergence and Reduced Integration in the Finite Element Method 663

Ole H. Hald, The Inverse Sturm-Liouville Problem and the Rayleigh-Ritz Method 687

Anne M. Burns, A Necessary Condition for the Stability of a Difference Approximation to a Hyperbolic System of Partial Differential Equations 707

A. E. Frey, C. A. Hall and T. A. Porsching, Some Results on the Global Inversion of Bilinear and Quadratic Isoparametric Finite Element Transformations 725

John P. Coleman and Julie Mohamed, On de Vogelaere's Method for $y'' = f(x, y)$ 751

P. W. Gaffney, To Compute the Optimal Interpolation Formula 763

James Lucien Howland, The Resultant Iteration for Determining the Stability of a Polynomial 779

Ole Hald and Vincenza Mauceri Del Prete, Convergence of Vortex Methods for Euler's Equation 791

W. F. Smyth, The Construction of Rational Iterating Functions 811

Robert B. Schnabel, Minimum Norm Symmetric Quasi-Newton Updates Restricted to Subspaces 829

Ph. L. Toint, Some Numerical Results Using a Sparse Matrix Updating Formula in Unconstrained Optimization 839

I. Barrodale, L. M. Delves and J. C. Mason, Linear Chebyshev Approximation of Complex-Valued Functions 853

Walter Gautschi and Josef Slavik, On the Computation of Modified Bessel Function Ratios 865

J. M. Blair, C. A. Edwards and J. H. Johnson, Rational Chebyshev Approximations for the Bickley Functions $Ki_n(x)$ 876

Shui-Nee Chow, John Mallet-Paret and James A. Yorke, Finding Zeroes of Maps: Homotopy Methods that are Constructive with Probability One 887

Chih-Bing Ling, Further Evaluation of Howland Integrals 900

H. C. Williams and R. Holte, Some Observations on Primality Testing 905

J. M. Pollard, Monte Carlo Methods for Index Computation (mod p) 918

N. S. Jeans and M. D. Hendy, Determining the Fundamental Unit of a Pure Cubic Field Given Any Unit 925

Charles M. Grinstead, On a Method of Solving a Class of Diophantine Equations... 936

D. E. Shippee, Four New Factors of Fermat Numbers 941

Reviews and Descriptions of Tables and Books 942

Salzer & Levine **13**, Devitt **14**, Edwards **15**, te Riele **16**, te Riele **17**, te Riele **18**

Microfiche Supplements

J. M. Blair, C. A. Edwards and J. H. Johnson, Rational Chebyshev Approximations for the Bickley Functions $Ki_n(x)$

Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to James H. Bramble, Chairman, Editorial Committee, Mathematics of Computation, Center for Applied Mathematics, 275 Olin Hall, Cornell University, Ithaca, New York 14853. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by AMS (MOS) subject classification numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the Index to Mathematical Reviews, Volume 39 (June 1970).

The research journals of the American Mathematical Society carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.
