SUBSCRIPTION INFORMATION: MATHEMATICS OF COMPUTATION is published quarterly, with issues numbered serially since Volume 1, Number 1. Subscription prices for Volumes 36 and 37 (1981) are \$65.00 list; \$45.00 institutional member; \$35.00 member of CBMS organizations; \$25.00 individual AMS member. Combination paper and microform (microfiche or microfilm) subscription prices are \$87.00 list; \$60.00 institutional member; \$47.00 member of CBMS organizations; \$33.00 individual AMS member. Microfiche of each issue will be mailed the fastest way before the camera copy is sent to the printer.

BACK NUMBER INFORMATION: Back number prices *per volume* are for Volumes 1–27, \$36.00 list, \$27.00 member; for Volumes 28–29, \$54.00 list, \$40.50 member; for Volume 30, \$72.00 list, \$54.00 member; for Volumes 31–33, \$84.00 list, \$63.00 member; for Volumes 34–35, \$49.00 list, \$36.75 member. Beginning with Volume 32, back volumes are also available on 16mm positive or negative microfilm or on microfiche; Volumes 1–31 are available on microfilm only, not microfiche. The microfilm may be mounted on spools or in Kodak or 3M cartridges. Only current subscribers are eligible to purchase back volumes on microform. Write to the AMS for a detailed price list.

UNPUBLISHED MATHEMATICAL TABLES: The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to James H. Bramble, Chairman, Department of Mathematics, White Hall, Cornell University, Ithaca, NY 14853.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to the AMS, P. O. Box 1571, Annex Station, Providence, R.I. 02901. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R.I. 02940.

MATHEMATICS OF COMPUTATION is published quarterly by the American Mathematical Society, 201 Charles Street, Providence, RI 02904. Second-class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P. O. Box 6248, Providence, RI 02940.

Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to James H. Bramble, Chairman, Editorial Committee, Mathematics of Computation, Department of Mathematics, White Hall, Cornell University, Ithaca, New York 14853. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1980 *Mathematics Subject Classification* numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1978 Subject Index to *Mathematical Reviews*.

The research journals of the American Mathematical Society carry a page charge of \$40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United State Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

TABLE OF CONTENTS

July 1981

James H. Bramble , The Lagrange Multiplier Method for Dirichlet's Problem.....	1
Juhani Pitkäranta , The Finite Element Method With Lagrange Multipliers for Domains With Corners.....	13
M. Vogelius and I. Babuška , On a Dimensional Reduction Method. I. The Optimal Selection of Basis Functions.....	31
M. Vogelius and I. Babuška , On a Dimensional Reduction Method. II. Some Approximation-Theoretic Results.....	47
D. L. Hicks , Hydrocode Subcycling Stability.....	69
Alan E. Berger, Jay M. Solomon and Melvyn Ciment , An Analysis of a Uniformly Accurate Difference Method for a Singular Perturbation Problem.....	79
Athena Makroglou , A Block-by-Block Method for Volterra Integro-Differential Equations With Weakly-Singular Kernel.....	95
M. Madalena Martins , Note on Irreducible Diagonally Dominant Matrices and the Convergence of the AOR Iterative Method.....	101
Y. Saad , Krylov Subspace Methods for Solving Large Unsymmetric Linear Systems..	105
James A. Pennline , Improving Convergence Rate in the Method of Successive Approximations.....	127
C. B. Dunham and Jack Williams , Rate of Convergence of Discretization in Chebyshev Approximation.....	135
P. Lancaster and K. Salkauskas , Surfaces Generated by Moving Least Squares Methods.....	141
J. Marshall Ash and Roger L. Jones , Optimal Numerical Differentiation Using Three Function Evaluations.....	159
Bing-Yuan Ting and Yudell L. Luke , Computation of Integrals With Oscillatory and Singular Integrands.....	169
B. Mond , On Algorithmic Equivalence in Linear Fractional Programming.....	185
John P. Boyd , The Rate of Convergence of Chebyshev Polynomials for Functions Which Have Asymptotic Power Series About One Endpoint.....	189
J. P. Delahaye , Automatic Selection of Sequence Transformations.....	197
C. J. Smyth , On the Measure of Totally Real Algebraic Integers. II.....	205
Rudolf A. Mathon, Kevin T. Phelps and Alexander Rosa , A Class of Steiner Triple Systems of Order 21 and Associated Kirkman Systems.....	209
A. J. W. Duijvestijn and P. Leeuw , Lowest Order Squared Rectangles and Squares With the Largest Element Not on the Boundary.....	223
Robert Baillie, G. Cormack and H. C. Williams , The Problem of Sierpiński Concerning $k \cdot 2^n + 1$	229

Arne Fransen, Addendum and Corrigendum to “High-Precision Values of the Gamma Function and of Some Related Coefficients”	233
Reviews and Descriptions of Tables and Books	237
