TABLE ERRATA

603.—W. MAGNUS & F. OBERHETTINGER, *Formeln und Sätze für die speziellen Funktionen der Mathematischen Physik*, Springer, Berlin, 1948.

On p. 147 insert a factor 2 in the left members of the seventh, eighth, and ninth formulas.

On p. 149, in the right side of the second formula from the bottom, read $\sin(\pi n \frac{u}{K})$ in place of $\sin(\pi n \frac{u}{2K})$.

On p. 150, in the seventh formula the first term in brackets on the right side should read $\mathrm{sc}(u,k')\mathrm{dn}(u,k')$ or $\mathrm{sn}(u,k')\mathrm{dc}(u,k')$.

EDITORIAL NOTE: For previous notices of errata in this edition see *Math. Comp.*, v. 33, 1979, p. 431, MTE 559 and the editorial footnote thereto.

604.—HERBERT E. SALZER & NORMAN LEVINE, *Table of Sines and Cosines to Ten Decimal Places at Thousandths of a Degree*, Pergamon Press, New York, 1962.

On page xii the second paragraph (occupying lines 9 through 14) is incorrect and should be replaced by:

Very little improvement over linear inverse interpolation is possible, since an upper bound to its total error, namely $\tau + \eta$, never exceeds $\frac{5}{3}\eta$, and no method of inverse interpolation can guarantee an error less than η.
