

Information for Contributors

Authors are encouraged to prepare articles electronically with the \mathcal{A}_{MS} - $\text{T}_{E}X$ software package in the AMS pre-print style and to provide the article in this electronic form for typesetting. While this procedure may not reduce the interval between submission and publication of an article, generally much more accurate copy will be returned for proofreading. Production time for manuscripts prepared with other systems, even $\text{T}_{E}X$ itself without \mathcal{A}_{MS} - $\text{T}_{E}X$, currently prevents cost-effective use of the existing electronic form. Before sending an \mathcal{A}_{MS} - $\text{T}_{E}X$ manuscript for typesetting, contact the AMS Composition department for details.

Manuscripts prepared by some means other than \mathcal{A}_{MS} - $\text{T}_{E}X$ should be doubled-spaced and produced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, Indiana 47907. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Chairman of the Editorial Committee, and it is the responsibility of the author to submit manuscripts directly to this office.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1980 *Mathematics Subject Classification* (1985 Revision) numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1984 Subject Index to *Mathematical Reviews*. Authors are also encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

The Joy of TEX

A Gourmet Guide to Typesetting with the $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ macro package

M. D. SPIVAK

The Joy of $\mathcal{T}\mathcal{E}\mathcal{X}$ is the user-friendly user's guide for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$, an extension of $\mathcal{T}\mathcal{E}\mathcal{X}$, which was especially designed to simplify the input of mathematical material and to format the output according to any of various preset style specifications.

There are two primary features of the $\mathcal{T}\mathcal{E}\mathcal{X}$ system: it is a computer system for typesetting technical text, especially text containing a great deal of mathematics; and it is a system for producing beautiful text, plain or technical, which is comparable to the work of the finest printers.

One of the strengths of $\mathcal{T}\mathcal{E}\mathcal{X}$ is its ability to use macros--aggregates of several commands into one--and Spivak has created a collection of macros that makes the preparation of mathematical text for printing a true *Joy*.

Chapters cover: ordinary text and control sequences, changing fonts, running a file through $\mathcal{T}\mathcal{E}\mathcal{X}$, spacing and line breaking, symbols and accents, formatting a paper, formulas in text, displayed formulas, fractions and binomial coefficients, \sum and other large operators, braces and other variable size symbols, aligning equations in a display, and matrices. More special topics include exact sequences and continued fractions.

Exercises sprinkled generously through each chapter encourage the reader to sit down at a terminal and learn through experimentation. Appendixes list summaries of frequently used and more esoteric symbols as well as answers to the exercises.

**Journal of the
American Mathematical Society**

Editors

Michael Artin
H. Blaine Lawson, Jr.
Richard Melrose
Wilfried Schmid
Robert E. Tarjan

The new Journal of the American Mathematical Society began publication with the January 1988 issue. This quarterly journal contains research articles of the highest quality in all areas of pure and applied mathematics. Selected articles appearing in Volume 1 include: *Homology of the zero set of a unipotent vector field on a flag manifold* by C. De Concini, G. Lusztig, and C. Procesi; *Reduced Hausdorff dimension and the concentration-cancellation law for 2-dimensional incompressible flows* by Ronald J. DiPerna and Andrew Majda; *Extremals for the Sobolev inequality on the Heisenberg group and the CR Yamabe problem* by David Jerison and John M. Lee; *p-adic Hodge theory* by G. Faltings; *Flip theorem and the existence of minimal models for 3-folds* by Shigefumi Mori; *Zero-one laws for sparse random matrices* by Saharon Shelah and Joel Spencer; and *Arithmeticity of holonomy groups of Lie foliations* by Robert J. Zimmer

or call 800-556-7774 in the continental U.S. to use VISA
or MasterCard.

Look what's new in

Mathematical Surveys and Monographs

The Mathematical Surveys and Monographs series is one you're already familiar with. It's been around since 1943, when **The Problem of Moments** by J. A. Shohat and J. D. Tamarkin was published. The series has grown over the years and includes important mathematical monographs that cover a broad spectrum of areas such as function theory, analysis, approximation theory, algebra, and topology. Each of the books is designed to give a survey of the subject and a brief introduction to its recent developments and unsolved problems.

The editorial committee...

Victor W. Guillemin
Irwin Kra

M. Susan Montgomery
R. O. Wells, Jr. (Chairman)

...invites you to participate in the development of this classic series by

- consulting them as reference books
- recommending them to your library to begin a standing order
- using books in this series in your courses
- submitting manuscripts for publication to the Director of Publication at the AMS

New and Recent Publications in Mathematical Surveys and Monographs

Each new title is exceptional. All are the high quality mathematical publications you've grown to expect in the Mathematical Surveys and Monographs series. Yet the variety of topics and areas of mathematical interest make them perfect reference books or possible textbooks for graduate level courses.

□ **Amenability** by Alan L. T. Paterson, 1988, 416 pp. (ISBN 0-8218-1529-6). List \$90, Inst. mem. \$72, Indiv. mem. \$54, Code SURV/29MC

□ **Direct and inverse scattering on the line** by Richard Beals, Percy Deift, and Carlos Tomei, 1988, 209 pp. (LC 88-14487; ISBN 0-8218-1530-X). List \$53, Inst. mem. \$42, Indiv. mem. \$32, Code SURV/28MC

□ **Basic hypergeometric series and applications** by Nathan J. Fine, 1988, 144 pp. (LC 88-6235; ISBN 0-8218-1524-5). List \$39, Inst. mem. \$31, Indiv. mem. \$23, Code SURV/27MC

□ **Operator theory and arithmetic in \mathbb{H}** by Hari Bercovici, 1988, 275 pp. (LC 88-10344; ISBN 0-8218-1528-8). List \$67, Inst. mem. \$54, Indiv. mem. \$40, Code SURV/26MC

□ **Asymptotic behavior of dissipative systems** by Jack K. Hale, 1988, 198 pp. (LC 87-33495; ISBN 0-8218-1527-X). List \$54, Inst. mem. \$43, Indiv. mem. \$32, Code SURV/25MC

□ **Noetherian rings and their applications**, edited by Lance W. Small, 1987, 118 pp. (LC 87-14997; ISBN 0-8218-1525-3). List \$38, Inst. mem. \$30, Indiv. mem. \$23, Code SURV/24MC

□ **Introduction to various aspects of degree theory in Banach spaces** by E. H. Rothe, 1986, 254 pp. (LC 86-8038; ISBN 0-8218-1522-9). List \$62, Inst. mem. \$50, Indiv. mem. \$37, Code SURV/23MC

□ **Noncommutative harmonic analysis** by Michael E. Taylor, 1986, 344 pp. (LC 86-10924; ISBN 0-8218-1523-7). List \$70, Inst. mem. \$56, Indiv. mem. \$42, Code SURV/22MC

□ **The Bieberbach conjecture: Proceedings of the symposium on the occasion of the proof**, edited by Albert Baernstein, David Drasin, Peter Duren, and Albert Marden, 1986; reprinted 1987, 260 pp. (LC 86-10843; ISBN 0-8218-1521-0). List \$46, Inst. mem. \$37, Indiv. mem. \$28, Code SURV/21MC

□ **Partially ordered abelian groups with interpolation** by Kenneth R. Goodearl, 1986, 358 pp. (LC 86-7876; ISBN 0-8218-1520-2). List \$70, Inst. mem. \$56, Indiv. mem. \$42, Code SURV/20MC

For information on numbers 1-19, please see the AMS Catalogue of Publications.

Standing orders are accepted for this and any other series published by the Society. Proforma invoices are sent to standing order customers prior to the publication of each new volume. Shipment is made upon receipt of payment and publication. To begin a standing order, please contact the Membership and Sales Department of the AMS.

PREPAYMENT REQUIRED. Order from the American Mathematical Society, P. O. Box 1571, Annex Station, Providence, RI 02901-1571, or call 800-556-7774 from within the continental U. S. (401-272-9500, elsewhere) to use VISA or MasterCard. Prices subject to change. Please add for SHIPPING AND HANDLING: first book \$2, each additional \$1, \$25 maximum. By air, first book \$5, each additional \$3, \$100 maximum.
