

Information for Contributors

Authors are encouraged to prepare articles electronically with the \mathcal{A}_{MS} - \TeX software package in the AMS pre-print style and to provide the article in this electronic form for typesetting. While this procedure may not reduce the interval between submission and publication of an article, generally much more accurate copy will be returned for proofreading. Production time for manuscripts prepared with other systems, even \TeX itself without \mathcal{A}_{MS} - \TeX , currently prevents cost-effective use of the existing electronic form. Before sending an \mathcal{A}_{MS} - \TeX manuscript for typesetting, contact the AMS Composition department for details.

Manuscripts prepared by some means other than \mathcal{A}_{MS} - \TeX should be doubled-spaced and produced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, Indiana 47907. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Chairman of the Editorial Committee, and it is the responsibility of the author to submit manuscripts directly to this office.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1991 *Mathematics Subject Classification* numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1990 Subject Index to *Mathematical Reviews*. Authors are also encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

Fifty offprints with covers are provided free for each article. In the case of multiple authors, the 50 free offprints will be divided among them. An offprint order form is sent to authors with page proof and should be filled out and returned with the proof.

Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

Vol. 458

Lyapunov Theorems for Operator Algebras

Charles A. Akemann and Joel Anderson

This book presents the result of a systematic generalization of Lyapunov's theorem to the setting of operator algebras.

1991 *Mathematics Subject Classifications*: 46: 28, 49, 52, 60, 93

ISBN 0-8218-2516-X, 96 pp. (softcover), November 1991

Indiv. mem. \$11, List \$19, Inst. mem. \$15

Your ordering code is MEMO/458MC

Vol. 457

Multiplicative Homology Operations and Transfer

Norihiko Minami

In *Multiplicative Homology Operations and Transfer*, Minami presents a completely new treatment of the homology operations QS^0 .

1991 *Mathematics Subject Classifications*: 55

ISBN 0-8218-2518-6, 80 pp. (softcover), November 1991

Indiv. mem. \$11, List \$18, Inst. mem. \$14

Vol. 456

Combinatorial Patterns for Maps of the Interval

Michal Misiurewicz and Zbigniew Nitecki

This study investigates new features of the relation between cyclic permutations and its generalization to multicyclic permutations and combinatorial patterns.

1991 *Mathematics Subject Classifications*: 58, 54, 26

ISBN 0-8218-2513-5, 120 pp. (softcover), November 1991

All prices subject to change. Free shipment by surface; for air delivery, please add \$6.50 per title. *Prepayment required.* **Order from:** American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571, or call toll free 800-321-4AMS in the continental U.S. and Canada to charge with VISA or MasterCard.

Please add 7% GST to all orders totalling over \$40 being shipped to Canada.

The American Mathematical Society
is proud to offer you a valuable journal
of Soviet mathematics...

St. Petersburg Mathematical Journal

(formerly *Leningrad Mathematical Journal*)

You, your students, and your school library will benefit from the *St. Petersburg Mathematical Journal*. This exciting journal unites the work of prominent mathematicians from the St. Petersburg branch of Steklov, the Leningrad University, and elsewhere. The AMS continues to work with the Russian mathematical community to bring you mathematics of the highest quality.

DISCOUNTS AVAILABLE NOW!

We encourage you to try the *St. Petersburg Mathematical Journal* for one year. To help you and your library gain access to this valuable journal of Soviet research mathematics, we now offer you substantial discounts on the *St. Petersburg Mathematical Journal* when you subscribe to any of our other Russian translation journals*.

St. Petersburg Mathematical Journal (List \$848, Institutional Member \$678)

- **20% off** list price for the 1992 edition to all subscribers!
- **30% off** list price for the 1992 edition to all subscribers who also subscribe to **one (1)** other AMS Russian translation journal!
- **40% off** list price for the 1992 edition to all subscribers who also subscribe to **two (2)** other AMS Russian translation journals!
- **50% off** list price for the 1992 edition to all subscribers who also subscribe to **three (3)** or more other AMS Russian translation journals!

*Note: If you are an institutional member of the AMS, these discounts apply to the institutional member price of \$678. This offer valid through December 31, 1992.

ACT TODAY!

To place your order for *St. Petersburg Mathematical Journal* and other Russian translation journals, call : AMS Customer Services at 800-321-4AMS.

Advances in Soviet Mathematics

New Titles!

Each volume of *Advances in Soviet Mathematics* contains collections of top-quality articles focused on an area of mathematical research having a strong research group in the Soviet Union. Each volume has as its editor an outstanding mathematician connected with the research school represented by the volume.

Vol. 7 **Estimates and Asymptotics for Discrete Spectra of Integral and Differential Equations**

edited by M. Sh. Birman

The papers in this collection are devoted to investigations of the spectrum of the Schrödinger operator (or its generalizations) perturbed by some relatively compact operator. The corresponding estimates and asymptotic formulas for spectrum distribution functions are considered in the large-coupling-constant limit.

Contributing Authors: M. Sh. Birman, A. M. Budylin, V. S. Buslaev, G. E. Karadzhov, G. D. Raikov, A. V. Sobolev, M. Z. Solomyak, D. R. Yafaev

1991 *Mathematics Subject Classifications:* 34, 35, 45, 47, ISBN 0-8218-4106-8, 204 pp. (hardcover), December 1991, List \$118, **Indiv. member \$71**, Inst. member \$ 94
Your ordering code is ADVSOV/7MC

Vol. 6 **Topological Classification of Integrable Systems**

edited by A. T. Fomenko

Among the topics covered are: The theory of topological invariants of integrable systems; a Morse type theory for integrals of generic systems; necessary and sufficient conditions for the topological equivalence of integrable systems; an algorithm listing all systems of the type indicated (with two degrees of freedom); the computation of the invariants of the principal integrable systems that are known today in mechanics and mathematical physics; computer studies, a list of all integrable systems of small complexity.

Contributing Authors: A. V. Bolsinov, A. T. Fomenko, V. V. Kalashnikov (Jr.), T. Z. Nguyen, G. G. Okuneva, A. A. Oshemkov, L. S. Polyakova, E. N. Selivanova, V. V. Trofimov

1991 *Mathematics Subject Classification:* 53, 57, 58, 70, ISBN 0-8218-4105-X, 345 pp. (hardcover), December 1991, List \$180, **Indiv. member \$108**, Inst. member \$144

Mathematical World

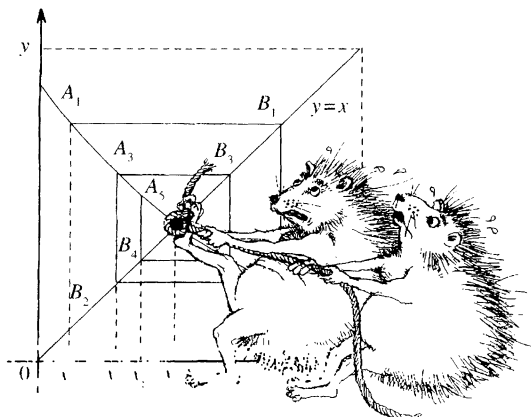

This exciting new series brings the beauty and captivation of mathematics to the undergraduate, to the mathematics teacher, to the scientist or engineer, and even to the lay reader with a strong interest in science and mathematics. *Mathematical World* features well-written, challenging expository works that capture the fascination and usefulness of mathematics. Published jointly by the American Mathematical Society and the Mathematical Association of America, *Mathematical World* is an important addition to any library and is certain to become a favorite series among those who enjoy excellent expository works.

Volume 2

Fixed Points

Yu. A. Shashkin

This book contains a popular exposition of fixed point theory. Theorems on fixed points for continuous maps of a segment, a square, a circle, and a two-dimensional sphere are proved. All required notions such as continuity, compactness, and degree of a map are explained. Auxiliary propositions, such as Sperner's lemma, are proved. Applications and exercises are given. *Fixed Points* is accessible even to students at the high school level.

1991 *Mathematics Subject Classifications*: 01, 54
 ISBN 0-8218-9000-X, 77 pages (softcover), December 1991.
 Individual member \$19, List price \$24
