28 [Z].—E. L. WILLEY, MARION TRIBE, A. D'AGAPEYEFF, B. J. GIBBENS & MI-CHELLE CLARK, *Some Commercial Autocodes*, Academic Press, Inc., New York, 1961, vii + 53 p., 23 cm. Price $2.50.

Some Commerical Autocodes is a study of nine programming languages applicable to commercial data processing problems, compiled in a tabular form by language elements. The study is based upon information available in December 1960 and does not represent the final specifications for some languages which have been, or are being, implemented for the various computers.
