

## TABLE ERRATA

**431.**—R. KORTUM & G. MCNIEL, *A Table of Periodic Continued Fractions*, Lockheed Aircraft Corporation, Sunnyvale, California, 1961.

In a corrigendum elsewhere in this issue, it was pointed out that the  $x$  and  $y$  listed here on p. 659 for

$$x^2 - 4846 y^2 = 1$$

were erroneous in that the last ten digits of both numbers were not printed. The same is true for the  $x$  and  $y$  on p. 1085 for

$$x^2 - 7561 y^2 = -1.$$

The table must therefore be used with caution, particularly, as is the case here, when the values  $x$  and  $y$  extend across the width of the page.

D. S.

**432.**—D. H. LEHMER, "Tests for primality by the converse of Fermat's theorem," *Bull. Amer. Math. Soc.*, v. 33, 1927, pp. 327–340.

p. 332, line 10, read  $a^{N-1} \not\equiv 1 \pmod{N}$  for  $a^{N-1} \equiv 1 \pmod{N}$ .

p. 335, line -9, read 313433259338997 for 31343325933897.

p. 336, line 9, read 78523825886276 for 78533825886276.

line -3, read 8383924385890424 for 7128121476353676.

line -1, read 4282252453776776 for 428233546143224.

p. 338, line -5, read 1 for 1268486354649455149380.
