

CORRIGENDUM

M.D. HENDY, "The distribution of ideal class numbers of real quadratic fields,"
Math. Comp., v. 29, 1975, pp. 1129–1134.

Corrigenda

Table I

line	column	reads	should read
17 ($g = 2, 3 < e < 4$)	$f = 8$	30	29
17	$f = 9$	19	20
24	$f = 8$	205	204
24	$f = 9$	236	237
35 ($g = 4, 9 < e < 10$)	$f = 1$	946	945
35	$f = 2$	196	197
36	$f = 1$	8690	8689
36	$f = 2$	2015	2016

Table IV

3	$g = 2 \quad f = 15$	11321	11665
9	$g = 8 \quad f = 4$	16555	15130
13	$g = 4 \quad f = 8$	16555	17266

I wish to express my thanks to Dr. Daniel Shanks, who noted discrepancies between my original tabulations and those of Hugh C. Williams, who has recently produced a table of class numbers of $Q(\sqrt{d})$, $d = 2(1)10^5$. These discrepancies uncovered the errors listed above, together with many others already corrected in the tables as printed, and led to complete retabulation of the summary tables.
