REVIEWS IN GRAPH THEORY

Compiled and Edited by William G. Brown
McGILL UNIVERSITY
DEPARTMENT OF MATHEMATICS

This publication is a four-volume compendium of about 9,600 reviews in graph theory published by **Mathematical Reviews** in Volumes 1 through 56, i.e. between 1940 and 1978 inclusive. Reviews were selected from the several sections of **Mathematical Reviews** which were the usual repositories of such items; from the subject lists in **Mathematical Reviews** indexes, where available; and through a systematic perusal of about half of all reviews published by **Mathematical Reviews** during the 39 years under consideration. Every review cited in a selected review was also read, and the process iterated until stable.

A classification scheme containing over 500 categories was developed for the purpose. Every review has been assigned one primary classification and, on the average, one secondary classification. Reviews are reprinted in strict chronological order of **Mathematical Review** numbers in their primary subject area, with a brief citation at each secondary location.

The final volume provides a detailed author index, which can serve as an effective bibliography of the subject.

These volumes are a research tool. They are directed to anyone who has occasion to consult the literature of graph theory: mathematicians, computer scientists, engineers, and management scientists, as well as students, teachers, and practicing researchers.

The potential reader requires no more background than would be required to read papers which are reviewed in the compendium. These vary from highly erudite papers in other areas of mathematics where graph theory is used as a tool to solve specific problems, to elementary descriptive papers which would be understandable to high school students.

A few of the reviews are themselves gems of the mathematical literature. But, for the most part, the reader will use this book as a research tool—to determine what has been done in a particular area of the subject, or to locate known papers when the values of not all parameters are available.

There has been nothing of this scope or magnitude in the subject before. This is the first major bibliography in graph theory which incorporates reviews.

The editor's previous work includes research papers in graph theory and related fields, and many reviews.

	List	Inst. Memb.	Indiv. Memb.	Student
Complete set (CODE: REVGRAPH)	$200	$150.00	$50	$25.00
Volume 1, 604 pages (REVGRA/1)	68	51.00	17	8.50
Volume 2, 564 pages (REVGRA/2)	68	51.00	17	8.50
Volume 3, 592 pages (REVGRA/3)	68	51.00	17	8.50
Volume 4, 340 pages (REVGRA/4)	40	30.00	10	5.00

Prepayment is required for all AMS publications. Order from AMS, P. O. Box 1571, Annex Station, Providence, RI 02901, or call toll free 800-556-7774 to charge with Visa or MasterCard.

Mathematical Reviews Cumulative Index 1973—1979

VOLUMES 45 THROUGH 58 OF MATHEMATICAL REVIEWS

This index is available in twelve 9 x 12 inch volumes on acid-free paper or on approximately 85 standard 105 x 148mm diazo film microfiche.

Any institution that has purchased the index on either paper or microfiche at regular prices can purchase a second copy on microfiche for $535.

The CUMULATIVE INDEX has the same form as the Annual Index for 1979 as it was generated by the same computer program.

The first part, an **Author and Key Index**, contains 4,860 pages in seven volumes. The entries give full bibliographic information about all items that have been reviewed in MR between January 1973 and December 1979, inclusive. This is over 230,000 entries. In addition, there are entries for about 3,000 items not reviewed in MR for which the editors think bibliographic information should be made available. These have been treated exactly as reviewed items, generally with references to **Zentralblatt für Mathematik, Referativnyĭ Žurnal,** or other reviewing journals.

Items are listed alphabetically by author, those having several authors are listed in full under each author. Surnames of authors are cross-referenced for name changes or variations of spelling. The original entry for which an erratum or other commentary has been reviewed in a subsequent entry is identified.

The author index section is estimated to have about 300,000 entries because of multiple authors.

In the **Author Index** the names of persons associated with an item in a capacity other than that of author, e.g., editor, translator, subject of a biography, are also listed.

The **Key Index** section of the author index consists of all items for which there is no clear author and is about 70 percent cross-referenced included are proceedings of meetings, tables, obituaries, biographies, etc.

The entries under a given heading (i.e., the author or a title) are listed in order of publication dates. Co-authored items are treated on the same basis as those by the author alone.

The **Subject Index,** consisting of about 380,000 listings on 3,555 pages, in five volumes, cover all subject areas as classified by MR. For each item there is one full listing in each subject area in which it has been classified, with all authors, title and MR number, if any. Cross-references are given under each author after the first to the original listing.

The arrangement of each title entry is that of the heading of the original review in MR. Titles in English, French, German, and Italian are usually given as they appeared in the original. Articles in other languages are given in English translation.

Mathematical Reviews Sections

ENJOY THE CONVENIENCE OF HAVING MATHEMATICAL REVIEWS AT YOUR DESK. HAVE YOU THOUGHT HOW REALLY HANDY IT WOULD BE TO HAVE THE SECTIONS RELEVANT TO YOUR RESEARCH RIGHT BEFORE YOU? MR has been divided into 37 affordable Sets for individual subscribers. Each month you can receive the Section Sets you have chosen with an author index. With your June sets you will receive a semiannual author index (just as you would for MR) and in December an annual author and subject index (as with MR). Also available for 1982 Section subscribers are three-ring binders of sturdy quality in the familiar tangerine color of MR to hold your subscription. The binders have a two-inch spine and are adequate to hold 400 pages.

Section Sets are divided into Class 1 and Class 2 according to the estimated number of pages per year.

Set	Sections	Subjects
□ 1A	00, 01	General, history, biography (Class 1)
□ 1B	03, 04	Logic, foundations, set theory (Class 1)
□ 1C	05	Combinatorics (Class 1)
□ 2A	06, 08	Order, lattices, general systems (Class 2)
□ 1D	10	Number theory (Class 1)
□ 2B	12	Algebraic number theory, field theory, polynomials (Class 2)
□ 2C	13, 14	Commutative rings and algebras, algebraic geometry (Class 2)
□ 2D	15	Linear and multilinear algebra, matrix theory (Class 2)
□ 2E	16, 17	Associative/nonassociative rings, algebras (Class 2)
□ 1E	18, 55, 57	Category theory, algebraic topology, manifolds (Class 1)
□ 1F	20	Group theory, generalizations (Class 1)
□ 2F	22	Topological groups, Lie groups (Class 2)
□ 2G	26, 28	Real functions, measure, integration (Class 2)
□ 1G	30, 31, 32, 33	Complex analysis, potential theory, special functions (Class 1)
□ 1H	34	Ordinary differential equations (Class 1)
□ 1I	35	Partial differential equations (Class 1)
□ 2H	39, 40, 41	Finite differences, sequences, approximations (Class 2)

Set	Sections	Subjects
□ 2I	42, 43, 44, 45	Harmonic analysis, integral transforms/equations (Class 2)
□ 1J	46	Functional analysis (Class 1)
□ 1K	47	Operator theory (Class 1)
□ 2J	49	Calculus of variations, optimization (Class 2)
□ 2K	51, 52	Geometry, convex sets (Class 2)
□ 1L	53	Differential geometry (Class 1)
□ 2L	54	General topology (Class 2)
	55, 57	See 1E (18, 55, 57)
□ 1M	58	Global analysis, analysis on manifolds (Class 1)
□ 1N	60	Probability theory and stochastic processes (Class 1)
□ 1P	62	Statistics (Class 1)
□ 1Q	65	Numerical analysis (Class 1)
□ 1R	68	Computer science (including automata) (Class 1)
□ 2M	70, 73	Mechanics of particles, systems, (Class 2)
□ 2N	76, 78, 80	Fluid mechanics, optics, electromagnetics, thermodynamics (Class 2)
□ 1S	81	Quantum mechanics (Class 1)
□ 2P	82, 83, 85, 86	Other physics, astronomy, astrophysics, geophysics (Class 2)
□ 1T	90	Economics, operations research, programming, games (Class 1)
□ 2Q	92	Biology and behavioral sciences (Class 2)
□ 1U	93	Systems theory; control (Class 1)
□ 1V	94	Information and communication, circuits (Class 1)

	First Set		Each Add'l Set		Optional Binder
	Class 1	Class 2	Class 1	Class 2	$5.00 each
Individual member	$36	$27	$30	$21	
Reviewer	24	18	20	14	

USE THIS PAGE OR A PHOTOCOPY TO ORDER.   Date _____

$ _____ enclosed for subscriptions selected and marked above.

□ $5.00 enclosed for 2″ tangerine binder stamped MATHEMATICAL REVIEWS SECTIONS on spine and front cover. (It is not required that one buy a binder.)

$ _____ Total prepaid order.

Check this box □ if you want your subscription 3-hole punched. If the box is not checked you will receive unbound, unpunched copy.
