

Editorial Information

As of March 31, 2001, the backlog for this journal was approximately 3 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in six months (the time necessary for editing and composing a typical issue). In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send out a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. An author should submit three paper copies of the manuscript. Initial submission by email is not allowed. The author may suggest an appropriate editor for his paper. All contributions intended for publication and all books for review should be addressed to Lars B. Wahlbin, Managing Editor, Mathematics of Computation, Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall, Cornell University, Ithaca, NY 14853-3801. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Managing Editor, and it is the responsibility of the author to submit manuscripts directly to this office.

The first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* must be brief and reasonably self-contained. Included with the footnotes to the paper should be the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The list of classifications is also available in print starting with the 1999 annual index of *Mathematical Reviews*. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/publications/. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically prepared manuscripts. For the final submission of accepted papers, the AMS encourages use of electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of $\mathcal{T}\mathcal{E}\mathcal{X}$, using $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the highly preferred format of $\mathcal{T}\mathcal{E}\mathcal{X}$, but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$. Those authors who make use of these style files from the beginning of the

writing process will further reduce their own efforts. Manuscripts prepared electronically in \LaTeX or plain \TeX are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. \LaTeX users will find that $\mathcal{AMS}\text{-}\LaTeX$ is the same as \LaTeX with additional commands to simplify the typesetting of mathematics, and users of plain \TeX should have the foundation for learning $\mathcal{AMS}\text{-}\LaTeX$.

Authors may retrieve an author package from the AMS website starting from www.ams.org/tex/ or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter username as password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format following the author packages link from www.ams.org/tex/. The author package can also be obtained free of charge by sending email to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify $\mathcal{AMS}\text{-}\LaTeX$ or $\mathcal{AMS}\text{-}\TeX$, Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Managing Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via email to pub-submit@ams.org (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When sending a manuscript electronically, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available at www.ams.org/jourhtml/graphics.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

AMS policy on making changes to articles after posting. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article to the Editor. The errata article will appear in a future print issue and will link back and forth on the web to the original article online.

Secure manuscript tracking on the Web and via email. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/ or via email sent to mstrack-query@ams.org. To access by email, on the subject line of the message simply enter the AMS ID and Article ID. To track more than one manuscript by email, choose one of the Article IDs and enter the AMS ID and the Article ID followed by the word *all* on the subject line. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to mcom-query@ams.org.

T_EX files available. Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*, T_EX files can be downloaded from the AMS website, starting from www.ams.org/journals/. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995, T_EX files are available upon request for authors without Web access by sending email to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author's version of T_EX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's T_EX environment.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to mcom-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

FEATURED PUBLICATIONS

**Chaotic Elections!
A Mathematician Looks
at Voting**

Donald G. Saari

What does the 2000 U.S. presidential election have in common with selecting a textbook for a calculus course in your department? Was Ralph Nader's influence on the election of George W. Bush greater than the now-famous chads? In this book, Don Saari analyzes these questions, placing them in the larger context of voting systems in general.

**Differential Geometry,
Lie Groups, and
Symmetric Spaces**

Sigurdur Helgason

**From reviews for the
First Edition:**

"Helgason's monograph is a beautifully done piece of work and should be extremely useful for several years to come, both in teaching and in research."

—D. Spencer, Princeton University

"The mathematical community has long been in need of a book on symmetric spaces. S. Helgason has admirably satisfied this need. It is a remarkably well-written book ... a masterpiece of concise, lucid mathematical exposition ... it might be used as a textbook for 'how to write mathematics'."

—Louis Auslander

Guide for Reviewers

Reviewing schedules, style elements, etc.

MathSciNet has an especially powerful system of internal links between reviews and provides direct links to the papers themselves if they are available on line. The reviews are classified by subject and are searchable in multiple ways. Thus, it provides an unparalleled method of browsing the literature for serious content (along with accurate bibliographic data).

for updates and to view a demo.

Consortia pricing is available: Please contact Lori Sprague, Publications Administrator, by telephone at 1-401-455-4064 or by email at las@ams.org.

* Free trial available for institutions and corporations. For more information, contact the **American Mathematical Society**, Membership and Customer Services Department at: 1-800-321-4267 or 1-401-455-4000, worldwide; fax 1-401-455-4046; e-mail: cust-serv@ams.org.

AMS

AMERICAN MATHEMATICAL SOCIETY

AMS Electronic Journals

Features and tools include:

- Refereed articles are posted online significantly before their availability in print.
- Links from AMS journal article references to corresponding reviews in MathSciNet and from reviews in MathSciNet to original articles in AMS electronic journals.
- Linked PDF options, including bookmarks, references, and more.
- Abstracts and references with links available FREE for users.
- Easy browsing: Select and view recently posted articles, most recent issue, previous issue, or all issues.
- Secure manuscript tracking for authors.
- AMS author packages with various TeX options downloadable in a single zip file.
- Quick Search and Advanced Search options.

The screenshot shows the AMS website with the following elements:

- AMS Logo:** Over a Century of Publishing Mathematics.
- Navigation:** Mission Statement, About AMS Journals, About Journals Searching, Quick Search (with a search box and Go button).
- Advanced Search:** Journals Site Map | Email Alert | For Authors | Tech Support | Help | Subscribe
- Journals Published by the American Mathematical Society:**
 - » Bulletin of the American Mathematical Society
 - » Mathematics of Computation
 - » Conformal Geometry and Dynamics
 - » Proceedings of the American Mathematical Society
 - » Electronic Research Announcements
 - » Representation Theory
 - » Journal of the American Mathematical Society
 - » Transactions of the American Mathematical Society
- Additional Products Available from the AMS:**
 - Notices of the American Mathematical Society:** Notices is one of the world's most widely read periodicals for professional mathematicians. In addition to publishing expository articles about mathematics research, information and news pertaining to the mathematics profession, and opinion pieces on a range of topics, the Notices serves as the journal of record for the AMS.
 - MathSciNet:** Mathematical Reviews on the Web. MathSciNet is partnering with the AMS journals program providing links to article reviews when they become available. Those with subscriptions to MathSciNet and AMS journals now have the ability to link from AMS journals into the MathSciNet database.
 - AMS Distributed Journals:** The AMS also distributes high-quality mathematics research, applied mathematics, and specialized mathematics journals from selected publishers around the world. Visit the AMS Bookstore and view a complete listing of journals.

www.ams.org/journals

AMS Email Notification Options: This is a free service available to anyone wishing information on recently posted research articles in AMS electronic journals. Visit www.ams.org/jemail for information on how to sign up for or to cancel notifications.

Special Offers

- Subscribe to the print versions of *Journal of the American Mathematical Society*, *Mathematics of Computation*, *Proceedings of the American Mathematical Society*, or *Transactions of the American Mathematical Society*, and receive the electronic versions for FREE.
- Once you arrange access to one or more of these free electronic versions, you will have access—at no additional charge—to two electronic-only journals of the AMS, *Conformal Geometry and Dynamics* and *Representation Theory*.
- **Lower rate for the electronic version:** Enjoy a lower subscription rate on AMS journals when you choose to receive only the electronic version.

AMS electronic journals are now available through EBSCO Online, OCLC FirstSearch ECO, Dawson Information Quest, and SwetsNet, and the US Department of Energy's PubSCIENCE. The AMS is committed to enabling convenient access to its electronic journals; additional access arrangements with other journals access services are now under consideration. There are now over 4,600 AMS journal articles from 1996 to date that are accessible and searchable online to subscribers through these services.
