
CHRONICLE

**The First International Congress
on *Biotechnology: The State of the Art and Prospects*
October 14–18, 2002, Moscow**

The congress program focuses on modern biotechnology and related problems. In addition to plenary reports of leading scientists, there will be oral and poster presentations within specialized sessions and round tables. The congress will be accompanied by the International exhibition *The World of Biotechnology*. For further information, please check the web page <http://www.biotechworld.ru>.
