IN MEMORIAM

MEMORIAL ISSUE HONORING PROF. TOHRU UEDA

This triple issue of Nucleosides & Nucleotides has been put together by a committee comprised of Professors Akira Matsuda and Eiko Ohtsuka of Hokkaido University, Dr. Kyoichi Watanabe of Memorial Sloan-Kettering Institute, Professor Jean-Louis Imbach of the University of Montpellier, and Dr. John A. Secrist III of Southern Research Institute. When Tohru Ueda died in September of 1990, it was a great loss for all of his friends and colleagues, and for the scientific community as a whole. His contributions to this journal as both editor and author were considerable, and it seemed fitting to assemble an issue in his honor. The biography that follows this page was written by Dr. Watanabe with the help of Mrs. Ueda, and presents a most interesting summary of Tohru's accomplishments. It is accompanied by a publication list, as well. The issue is comprised of 52 original articles and one review article gathered from around the world, certainly a testimony to the impact that Dr. Ueda has had in this area of research. Dr. Matsuda was the motivating force behind the issue, and did a wonderful job of arranging for and bringing together most of the articles in a timely fashion. We hope that this issue will stand as a lasting tribute to a fine scientist and a good friend.
