

A new interdisciplinary journal for research that is emerging at the interface between chemistry and biology

Molecular BioSystems

New for 2005

Molecular BioSystems will publish novel and significant research and development at the interface between chemistry and the -omic sciences and systems biology. In particular, this includes:

- Cellular processes
- Proteomics and genomics
- Drug discovery
- Techniques and technologies relevant to these subject areas
- Metabolism
- Systems biology
- Biomaterials

To find out more, and to submit, visit
www.molecularbiosystems.org

A new journal providing a forum for the communication of generic science underpinning the properties and applications of soft matter.

Soft Matter will publish high quality interdisciplinary research into soft materials, with a particular focus on the interface between chemistry and physics.

Main research areas will include:

- (Bulk) soft matter assemblies
- Soft nanotechnology and self-assembly
- Biological aspects of soft matter
- Surfaces, interfaces, and interactions
- Building blocks/synthetic methodology
- Theory, modelling, and simulation

Find out more, and submit at:
