

# Organic & Biomolecular Chemistry

www.rsc.org/obc

Volume 3 | Number 6 | 21 March 2005 | Pages 949–1144

ISSN 1477-0520

## PERSPECTIVE

J. C. B. DeNap and  
P. J. Hergenrother  
Bacterial death comes full circle:  
targeting plasmid replication in  
drug-resistant bacteria

## COMMUNICATION

Claus Jacob *et al.*  
Asymmetric organotellurides as  
potent antioxidants and building  
blocks of protein conjugates

RSC | Advancing the  
Chemical Sciences

1477-0520 (2005) 3:6;1-H

An international, high quality journal covering the full breadth of synthetic, physical and biomolecular organic chemistry.

See for yourself - examples of forthcoming papers are listed below

For further details and free access to Issue 1, visit

[www.rsc.org/obc](http://www.rsc.org/obc)

## Emerging Area:

Synthesis of technomimetic molecules: towards rotation control in single molecular machines and motors

*Gwenaél Rapenne, France*

## Perspective:

Bacterial death comes full circle: targeting plasmid replication in drug-resistant bacteria

*Paul Hergenrother, USA*

## Communications:

Synthesis and crystal structure of a salen-type copper(II) complex derived from 3,5'-O-dimethyl-2',3'-diamino-2',3'-dideoxy-beta-D-xylo-uridine

*Michael Gottschaldt, Germany*

A multipolymer system for organocatalytic alcohol oxidation

*Patrick Toy, Hong Kong*

## Articles:

Novel carbamate derivatives of 4-beta-amino-4'-O-demethyl-4-deoxypodophyllotoxin as inhibitors of topoisomerase II: synthesis and biological evaluation

*Daniel Dauzonne, France*

A chemoenzymatic total synthesis of the undecenolide (-)-cladospolide B via a mid-stage ring-closing metathesis and a late stage photo-rearrangement of the E-isomer

*Martin Banwell, Australia*

Chiral oxime ethers in asymmetric synthesis. Part 7. O-(1-phenylbutyl)benzyloxyacetaldoxime, a versatile reagent for the asymmetric synthesis of protected 1,2-aminoalcohols,  $\alpha$ -amino acid derivatives, and 2-hydroxymethyl-nitrogen heterocycles including iminosugars

*Christopher Moody, UK*

Locked TASC probes for homogeneous sensing of nucleic acids and imaging of fixed E. coli cells

*Yasuhiro Aoyama, Japan*

Advanced approaches for the characterization of a de novo designed antiparallel coiled coil peptide

*Beate Koksich, Germany*

Synthesis of 5'-methyleneauristeromycin and its 2-fluoro derivative with potent antimalarial activity due to inhibition of the parasite S-adenosylhomocysteine hydrolase

*Satoshi Shuto, Japan*

An improved solid-phase methodology for the synthesis of putative hexa- and heptapeptide intermediates in vancomycin biosynthesis

*John Robinson, Switzerland*
